**Play Index** Estelle A. Fidell, 1973      **Eugene O'Neill and the Reinvention of Theatre Aesthetics** Thierry Dubost, 2019-07-12 The plays of Eugene O'Neill testify to his continued search for new dramatic strategies. The author explores the Nobel Prize winner's attempts at creating a new Modern play. He shows how moving away from melodrama or the problem play O'Neill revisited the classical frames of drama and reinvented theater aesthetics by resorting to masks, the chorus, acoustics, silence, or immobility for the creation of his dramatic works      EBOOK: Approaches to Psychology William Glassman, Marilyn Hadad, 2013-01-16 Approaches to Psychology provides a contemporary, accessible, and coherent introduction to the field of psychology from its origins to the present and shows the contribution of psychology to understanding human behaviour and experience. The book introduces students to the five core conceptual frameworks or approaches to psychology: biological, behaviourist, cognitive, psychodynamic, and humanistic. The methods, theories, and assumptions of each approach are explored so that the reader builds an understanding of psychology as it applies to human development, social, and abnormal behaviour. New to this edition: Expanded coverage of positive psychology; Expansion of the coverage of influential psychoanalytic theorists including Anna Freud and John Bowlby; Discussion of the controversies in the formulation of DSM-5; Expanded coverage of other topics including development and types of mental disorders. Updated and expanded Online Learning Centre with student support material and instructor material at [www.mcgraw-hill.co.uk/textbooks/glassman](http://www.mcgraw-hill.co.uk/textbooks/glassman) including PowerPoint slides and videos      *The Plays and Poems of William Shakespeare* William Shakespeare, 1853

Creative Arts and Play Therapy for Attachment Problems Cathy A. Malchiodi, David A. Crenshaw, 2015-07-22 This book vividly shows how creative arts and play therapy can help children recover from experiences of disrupted or insecure attachment. Leading practitioners explore the impact of early relationship difficulties on children's emotions and behavior. Rich case material brings to life a range of therapeutic approaches that utilize art, music, movement, drama, creative writing, and play. The volume covers ways to address attachment issues with individuals of different ages as well as their caregivers. Chapters clearly explain the various techniques and present applications for specific populations, including complex trauma survivors      *The Quest for Symbolic Communication in Non-Human Animals* Ulrike Griebel, D. Kimbrough Oller, Irene M. Pepperberg, 2024-06-13 Human language is unique among animals. We assume that complex cognitive capacities in general and language in particular evolved gradually and thus are manifest in different kinds and/or degrees in other animals demonstrating social communication. This assumption is supported by the fact that we can train social species from very different groups of animals, e.g. great apes, dolphins, dogs, parrots, to understand and in several cases even use abstract symbols for communication with humans and conspecifics. Even simple grammatical rules for sequences of 2-3 symbols can be trained to be understood by several species, e.g. great apes, dogs, dolphins. Even though human language training in these species takes considerable time and effort, it convinces us that cognitive foundations for language are present in other

species and given the relevant selection pressures symbolic communication could evolve in other species      **Psychology:**

Literature and Philosophical Play in Early Childhood Education explores the role of philosophy and the humanities as

pedagogy in early childhood educational research and practice arguing that research should attend to questions about

education and growth that concern social structures individual development and existential aspects of learning It

demonstrates how we can think of pedagogy and educational practices in early childhood as artistic poetic and philosophical

and exemplifies a humanities based approach by giving literature and artful play a place in shaping the ground of practice

and research The book explores a range of alternative approaches to theory in education and the feasibility of a curriculum of

moral values for young children and contains a variety of scenes involving children's play and involvement with literature and

fiction It portrays how engaging with children's play can be a philosophical and pedagogical investigation where children's

own philosophising is taken seriously where children's thoughts are put on a par with established research and philosophy

Moreover the book engages with a range of different forms of literature picture books novels auto fiction poetry and develops
