GCSE Business Business Operations

Impact of technology on customers

- **Better service** → as more work done by machines
- **Lower prices** → as lower total wage bill
- **Inferior service** → because of lower morale of workers
- **Higher prices** → to pay cost of machines
- **No effect** → as customers do not appreciate differences in service

Apps (Applications)

Definition: Pieces of software designed for a specific purpose and for use on smartphones and tablets.

Social Media

Definition: Involves websites and applications which allow users to create and share information, ideas and interests with other individuals, communities and networks.

Video Conferencing

Definition: The use of computers to provide a video link between two or more people.

Web Chat

Computer-Aided Design (CAD)

Definition: Allows designers to produce new products using 3D models displayed on computer screens.

Advantages:

- Reduce costs and improve quality are the main benefits, there are a number of different examples:
 - 1. Speeds up design → simple to edit
 - 2. Alternative designs can be considered → simple to edit
 - 3. Producing drawings of finished goods and parts / no need to build models (prototypes) nor finished goods → reduce costs
 - 4. To view finished goods before manufacture to find best design → improves quality and accuracy of the design
 - 5. Testing → materials and design to reduce errors and reduce costs
 - 6. Linked to CAM to speed up production

Disadvantages:

- 1. Cost of setting up → machinery → training of workers

Computer-Aided Manufacturing (CAM)

Definition: Uses computers to operate robots and other machines in production lines.

Advantages:

- 1. Can be linked with CAD → speeds up the whole production process
- 2. Measurements easily transferred to manufacturing process
- 3. Less scope for error in production → more accurate → allows for standardized quality → greater customer satisfaction → fewer returns
- 4. Used in mass production/flow production → easy to adjust → speed → cheaper
- 5. Fewer workers → lower wage costs → less supervision

Disadvantages:

- 1. Cost of setting up → machinery → training of workers → possible redundancy payments to unskilled workers
- 2. Reputation of business if making redundancies

Why would workers be concerned by the introduction of new technology?

- May lose jobs → technology may replace need for workers / changes require fewer workers
- Promotion opportunities may be reduced → with smaller workforce
- Lower morale → lack of job security / promotion opportunities
- Fewer hours → reduced pay
- Need to familiarise with technology → need to be trained → may need to work harder
- Health risks → technology could be dangerous

- 4. Can pay online → may save bank charges
- 5. May be cheaper → because seller costs lower
- 6. Wider choice → from many sellers
- 7. Order 24/7 → more convenient for business owners

Disadvantages:

- 1. Goods not inspected → to see if goods meet the need
- 2. Images may be misleading → so quality difficult to judge
- 3. Delays → in receiving goods → if goods need to be returned
- 4. Possibility of fraud → if goods not sent → when paid for

M-Commerce

Definition: Mobile commerce involves buying goods and services through handheld mobile devices such as smartphones.

Benefits of creating customer records using a database

- More effective data handling → sort and search for customer records quickly → inputting the data
- It is easy to make changes → save your work and print it out again
- Can create reports → print out records and store hard copies
- Can create mail merge → speed up sending correspondence via letters
- Marketing → creating customer profile and loyalty scheme

Why would customers be concerned by the introduction of new technology?

The customers:

- Delays in service → consequences of this
- Better service → as more work done by machines
- Lower prices → as lower total wage bill for the business
- Inferior service → because of lower morale of
