Knowledge Grid:

The Knowledge Grid Hai Zhuge, 2004 The Knowledge Grid is an intelligent and sustainable interconnection environment that enables people and machines to effectively capture, publish, share and manage knowledge resources. It also provides appropriate on-demand services to support scientific research, technological innovation, cooperative teamwork, problem solving and decision making. It incorporates epistemology and ontology to reflect human cognitive characteristics, exploits social, ecological and economic principles and adopts techniques and standards developed during work toward the future web. This book presents its methodology, theory models and applications systematically for the first time.

Knowledge Grid, The: Toward Cyber-physical Society (2nd Edition) Hai Zhuge, 2012-09-11 The Knowledge Grid is an intelligent and sustainable interaction environment that consists of autonomous individuals, self-organized semantic communities, adaptive networking mechanisms, evolving semantic link networks, keeping meaningful connection between individuals, flows for dynamic resource sharing and mechanisms supporting effective resource management and providing appropriate knowledge services for learning, innovation, teamwork, problem solving and decision making. This book presents its methodology, theory models and applications systematically for the first time. Its second edition fulfils the ideal of the Knowledge Grid by including many new contents including: 1 The insight of cyber-physical society 2 The systematic method of semantic link network that supports uncertainty management, discovery of semantic links and semantic communities, autonomous semantic data model and cyber-physical socio-semantic link network 3 Semantic peer-to-peer infrastructures for efficient knowledge sharing 4 A new centrality measure of network and 5 The Energy Knowledge Grid. This new edition will undoubtedly provide inspiring materials for researchers, academics, practitioners and students.

Grid Computing Marios D. Dikaiakos, 2004-12-07 This book constitutes the thoroughly refereed post-proceedings of the Second European AcrossGrid Conference AxGrids 2004 held in Nicosia, Cyprus in January 2004. The 27 revised full papers and 4 revised short papers presented were carefully selected during two rounds of reviewing and improvement from 57 submissions. The papers address the entire range of current topics in grid computing from computational and data grids to the semantic grid and grid application in various fields.

Knowledge Discovery Practices and Emerging Applications of Data Mining: Trends and New Domains Kumar, A.V. Senthil, 2010-08-31 Knowledge Discovery Practices and Emerging Applications of Data Mining Trends and New Domains introduces the reader to recent research activities in the field of data mining. This book covers association mining, classification, mobile marketing, opinion mining, microarray data mining, internet mining and applications of data mining on biological data, telecommunication and distributed databases among others while promoting understanding and implementation of data mining techniques in emerging domains.

Service-Oriented Distributed Knowledge Discovery Domenico Talia, Paolo Trunfio, 2012-10-05 A new approach to distributed large scale data mining service-oriented knowledge discovery extracts useful knowledge from today's often unmanageable volumes of data by

exploiting data mining and machine learning distributed models and techniques in service oriented infrastructures Service Oriented Distributed Knowledge Discovery presents techniques algorithms and systems based on the service oriented paradigm Through detailed descriptions of real software systems it shows how the techniques models and architectures can be implemented The book covers key areas in data mining and service oriented computing It presents the concepts and principles of distributed knowledge discovery and service oriented data mining The authors illustrate how to design services for data analytics describe real systems for implementing distributed knowledge discovery applications and explore mobile data mining models They also discuss the future role of service oriented knowledge discovery in ubiquitous discovery processes and large scale data analytics Highlighting the latest achievements in the field the book gives many examples of the state of the art in service oriented knowledge discovery Both novices and more seasoned researchers will learn useful concepts related to distributed data mining and service oriented data analysis Developers will also gain insight on how to successfully use service oriented knowledge discovery in databases KDD frameworks

Intelligent Technologies for Information Analysis Ning Zhong, Jiming Liu, 2013-03-14 Intelligent Information Technology iiT encompasses the theories and applications of artificial intelligence statistical pattern recognition learning theory data warehousing data mining and knowledge discovery Grid computing and autonomous agents and multi agent systems in the context of today's as well as future IT such as Electronic Commerce EC Business Intelligence BI Social Intelligence SI Web Intelligence WI Knowledge Grid KG and Knowledge Community KC among others The multi author monograph presents the current state of the research and development in intelligent technologies for information analysis in particular advances in agents data mining and learning theory from both the theoretical and application aspects It investigates the future of information technology IT from a new intelligent IT iiT perspective and highlights major iiT related topics by structuring an introductory chapter and 22 survey research chapters into 5 parts 1 emerging data mining technology 2 data mining for Web intelligence 3 emerging agent technology 4 emerging soft computing technology and 5 statistical learning theory Each chapter includes the original work of the authors as well as a comprehensive survey related to the chapter's topic This book will become a valuable source of reference for R D professionals active in advanced intelligent information technologies Students as well as IT professionals and ambitious practitioners concerned with advanced intelligent information technologies will appreciate the book as a useful text enhanced by numerous illustrations and examples

Ubiquitous Developments in Knowledge Management: Integrations and Trends Jennex, Murray E., 2010-01-31 This book presents current research in Knowledge Management highlighting new technologies approaches issues solutions or cases that can help an organization implement a knowledge management initiative or provide a knowledge base Provided by publisher

Future Generation Grids Vladimir Getov, Domenico Laforenza, Alexander Reinefeld, 2006-10-12 The CoreGRID Network of Excellence NoE project began in September 2004 Two months later in November 2004 the first CoreGRID Integration Workshop was held within the

framework of the prestigious international Dagstuhl seminars CoreGRID aims at strengthening and advancing long term research knowledge transfer and integration in the area of Grid and Peer to Peer technologies CoreGRID is a Network of Excellence a new type of project within the European 6th Framework Programme to ensure progressive evolution and durable integration of the European Grid research community To achieve this objective CoreGRID brings together a critical mass of we established researchers and doctoral students from forty two institutions that have constructed an ambitious joint programme of activities Although excellence is a goal to which CoreGRID is committed durable integration is our main concern It means that CoreGRID has to carry out activities to improve the effectiveness of European research in Grid by coordinating and adapting the participants activities in Grid research to share resources such as Grid testbeds to encourage exchange of research staff and students and to ensure close collaboration and wide dissemination of its results to the international community Organising CoreGRID Integration Workshops is one of the activities that aims at identifying and promoting durable collaboration between partners involved in the network

Knowledge-Based Intelligent Information and Engineering Systems Ignac Lovrek, Robert J. Howlett, L. C. Jain, 2008-08-18 Annotation The three volume set LNAI 5177 LNAI 5178 and LNAI 5179 constitutes the refereed proceedings of the 12th International Conference on Knowledge Based Intelligent Information and Engineering Systems KES 2008 held in Zagreb Croatia in September 2008 The 316 revised papers presented were carefully reviewed and selected The papers present a wealth of original research results from the field of intelligent information processing in the broadest sense topics covered in the first volume are artificial neural networks and connectionists systems fuzzy and neuro fuzzy systems evolutionary computation machine learning and classical AI agent systems knowledge based and expert systems intelligent vision and image processing knowledge management ontologies and data mining Web intelligence text and multimedia mining and retrieval and intelligent robotics and control

Organizational Learning and Knowledge: Concepts, Methodologies, Tools and Applications Management Association, Information Resources, 2011-07-31 Organizational Learning and Knowledge Concepts Methodologies Tools and Applications demonstrates exhaustively the many applications issues and techniques applied to the science of recording categorizing using and learning from the experiences and expertise acquired by the modern organization A much needed collection this multi volume reference presents the theoretical foundations research results practical case studies and future trends to both inform the decisions facing today's organizations and the establish fruitful organizational practices for the future Practitioners researchers and academics involved in leading organizations of all types will find useful grounded resources for navigating the ever changing organizational landscape

Data Mining and Knowledge Discovery Handbook Oded Maimon, Lior Rokach, 2010-09-10 Knowledge Discovery demonstrates intelligent computing at its best and is the most desirable and interesting end product of Information Technology To be able to discover and to extract knowledge from data is a task that many researchers and practitioners are endeavoring to accomplish There is a lot of hidden knowledge

waiting to be discovered this is the challenge created by today's abundance of data Data Mining and Knowledge Discovery Handbook Second Edition organizes the most current concepts theories standards methodologies trends challenges and applications of data mining DM and knowledge discovery in databases KDD into a coherent and unified repository This handbook first surveys then provides comprehensive yet concise algorithmic descriptions of methods including classic methods plus the extensions and novel methods developed recently This volume concludes with in depth descriptions of data mining applications in various interdisciplinary industries including finance marketing medicine biology engineering telecommunications software and security Data Mining and Knowledge Discovery Handbook Second Edition is designed for research scientists libraries and advanced level students in computer science and engineering as a reference This handbook is also suitable for professionals in industry for computing applications information systems management and strategic research management

Mathematical Methods for Knowledge Discovery and Data Mining Felici, Giovanni, Vercellis, Carlo, 2007-10-31 This book focuses on the mathematical models and methods that support most data mining applications and solution techniques covering such topics as association rules Bayesian methods data visualization kernel methods neural networks text speech and image recognition an invaluable resource for scholars and practitioners in the fields of biomedicine engineering finance manufacturing marketing performance measurement and telecommunications Provided by publisher

Proceedings of the 2011 International Conference on Informatics, Cybernetics, and Computer Engineering (ICCE2011) November 19-20, 2011, Melbourne, Australia Liangzhong Jiang, 2011-11-24 The volume includes a set of selected papers extended and revised from the International Conference on Informatics Cybernetics and Computer Engineering An information system IS or application landscape is any combination of information technology and people's activities using that technology to support operations management In a very broad sense the term information system is frequently used to refer to the interaction between people algorithmic processes data and technology In this sense the term is used to refer not only to the information and communication technology ICT an organization uses but also to the way in which people interact with this technology in support of business processes Some make a clear distinction between information systems and computer systems ICT and business processes Information systems are distinct from information technology in that an information system is typically seen as having an ICT component It is mainly concerned with the purposeful utilization of information technology Information systems are also different from business processes Information systems help to control the performance of business processes Computer engineering also called computer systems engineering is a discipline that integrates several fields of electrical engineering and computer science required to develop computer systems Computer engineers usually have training in electronic engineering software design and hardware software integration instead of only software engineering or electronic engineering Computer engineers are involved in many hardware and software aspects of computing from the design of individual microprocessors personal computers and

supercomputers to circuit design This field of engineering not only focuses on how computer systems themselves work but also how they integrate into the larger picture ICCE 2011 Volume 2 is to provide a forum for researchers educators engineers and government officials involved in the general areas of Information system and Software Engineering to disseminate their latest research results and exchange views on the future research directions of these fields 81 high quality papers are included in the volume Each paper has been peer reviewed by at least 2 program committee members and selected by the volume editor Special thanks to editors staff of association and every participants of the conference It s you make the conference a success We look forward to meeting you next year Special thanks to editors staff of association and every participants of the conference It s you make the conference a success We look forward to meeting you next year

Artificial Intelligence for Knowledge Management Eunika Mercier-Laurent,Danielle Boulanger,2017-04-10 This book features a selection of papers presented at the Third IFIP WG 12.6 International Workshop on Artificial Intelligence for Knowledge Management AI4KM 2015 held in Buenos Aires Argentina in July 2015 in the framework of the International Joint Conference on Artificial Intelligence IJCAI 2015 The 9 revised and extended papers were carefully reviewed and selected from 15 submissions They present new research and innovative aspects in the field of knowledge management such as knowledge models KM and Web knowledge capturing and learning and KM and AI intersections Data Mining and Knowledge Discovery Handbook Oded Z. Maimon,Oded Maimon,Lior Rokach,2005 Organizes major concepts theories methodologies trends challenges and applications of data mining DM and knowledge discovery in databases KDD This book provides algorithmic descriptions of classic methods and also suitable for professionals in fields such as computing applications information systems management and more , **2000 4th International Conference on Algorithms and Architectures for Parallel Processing** Andrzej Gołczyński,2000 ICA3PP 2000 was an important conference that brought together researchers and practitioners from academia industry and governments to advance the knowledge of parallel and distributed computing The proceedings constitute a well defined set of innovative research papers in two broad areas of parallel and distributed computing 1 architectures algorithms and networks 2 systems and applications Information Modelling and Knowledge Bases XX Y. Kiyoki,T. Tokuda,H. Jaakkola,2009-02-11 In the last decades information modelling and knowledge bases have become essentially important subjects not only in academic communities related to information systems and computer science but also in the business area where information technology is applied The 18th European Japanese Conference on Information Modelling and Knowledge Bases EJC 2008 continues the series of events that originally started as a cooperation initiative between Japan and Finland Later the geographical scope of these conferences expanded to cover the whole of Europe and other countries as well The EJC conferences constitute a worldwide research forum for the exchange of scientific results and experiences achieved in computer science and other related disciplines using innovative methods and progressive approaches In this way a platform has been established drawing together researches as well as

practitioners dealing with information modelling and knowledge bases The main topics of EJC conferences target the variety of themes in the domain of information modelling conceptual analysis multimedia knowledge bases design and specification of information systems multimedia information modelling multimedia systems ontology software engineering knowledge and process management The aim of this publication is also applying new progressive theories To this end much attention is paid also to theoretical disciplines including cognitive science artificial intelligence logic linguistics and analytical philosophy
