## **Knowledge Social Structure An Introduction:**

**Knowledge and Social Structure (RLE Social Theory)** Peter Hamilton, 2014-08-13 The primary concern of this study is to present elucidate and analyse the developments which have characterized the sociology of knowledge and which have set for it the outlines of its major problematics Peter Hamilton examines the most distinctive approaches to the determinate relationship between knowledge and social structure He considers the three main pre paradigms of the sociology of knowledge based on the work of Marx Durkheim and Weber and looks at the contribution of Scheler Mannheim and phenomenological studies to this complex field He explores the intellectual context particularly that of Enlightenment philosophy in which the problems involved in producing a sociology of knowledge first came to light In conclusion the author suggests an inclusive perspective for approaching the difficulties posed in any attempt to describe and explain relations between knowledge and social structure

*The New Natural Resource* Hans Christian Garmann Johnsen, 2016-03-03 Increasingly in the public discourse there are references to the knowledge economy knowledge society knowledge workers and knowledge organisations The argument is that knowledge is becoming the main economic resource replacing the natural resources that drove the industrial revolution The new knowledge economy is driven by knowledge development innovation and highly skilled employees Increasing investment in higher education and in universities is in line with this strategy and understanding In an earlier book *Creating Collaborative Advantage* edited with Richard Ennals Professor Hans Christian Garmann Johnsen argued that it is knowledge that links social and economic processes He believes that what is missing in the current discussion on innovation is a conceptualisation of exactly what

knowledge is In The New Natural Resource he digs deeper into what it is and how it develops and subsequently leads to widespread change The author argues that knowledge is inherently a social phenomenon That is why social processes are closely linked to economic development and why this relationship becomes even more apparent in the new knowledge economy Knowledge is not an objective entity established once and for all Knowledge development is interrelated with values norms perceptions and interpretations We need to know what the mechanisms are by which knowledge becomes legitimate true and relevant
