Knowledge And Power In A Global Society:

Knowledge and Power in a Global Society Robert F. Rich, 1981-08-01 William Evan associates the emergence of modern science with the growth of international scientific and professional associations ISPA's that have been founded for the purpose of developing and applying scientific knowledge In the course of pursuing these objectives the ISPA's address global problems outside the framework of national interests and ideologies The contributions to this book are the result of a conference convened at the University of Pennsylvania with the specific aim of exploring the potential influence of ISPA's on global problems and international decision making Knowledge and Power in a Global Society William M. Evan, 1981-08 William Evan associates the emergence of modern science with the growth of international scientific and professional associations ISPA's that have been founded for the purpose of developing and applying scientific knowledge In the course of pursuing these objectives the ISPA's address global problems outside the framework of national interests and ideologies The contributions to this book are the result of a conference convened at the University of Pennsylvania with the specific aim of exploring the potential influence of ISPA's on global problems and international decision making Knowledge and Power in the Global Economy David Gabbard, 2017-07-05 Advancing a three fold political agenda this volume illuminates how the meanings assigned to a whole vocabulary of words and phrases frequently used to discuss the role and reform of U S public schools reflect an essentially economic view of the world contends that education or educational reform conducted under an economized worldview will only intensify the effects of the colonial relations of political and economic domination that it breeds at home and abroad and offers a set of alternative concepts and meanings for reformulating the role of U S public schools and for considering the implications of such a reformulation more generally for the underlying premises of all human relationships and activities Toward these ends the authors in Part I critically examine many of the most commonly used terms within the rhetoric of educational reform since the early 1980s and before Part II links today's economized worldview to curricular and instructional issues These essays are especially important for comprehending how the organization of school curriculum privileges those disciplines deemed most central to market expansion math and science and how the political centrality of the economic sphere influences the nature of the knowledge presented in specific content areas Given that language constrains as well as advances human thought the twin tasks of de economizing education and decolonizing society will require a vocabulary that transcends the familiar terminologies addressed in Parts I and II The entries in Part III cultivate the beginnings of such a vocabulary as the authors elucidate innovative concepts which they view as central to the creation of truly alternative educational visions and practices **Knowledge & Power in the Global Economy** David Gabbard, 2017-07-05 Advancing a three fold political agenda this volume illuminates how the meanings assigned to a whole vocabulary of words and phrases frequently used to discuss the role and reform of U S public schools reflect an essentially economic view of the world contends that education or educational reform conducted under an economized worldview will

only intensify the effects of the colonial relations of political and economic domination that it breeds at home and abroad and offers a set of alternative concepts and meanings for reformulating the role of U S public schools and for considering the implications of such a reformulation more generally for the underlying premises of all human relationships and activities Toward these ends the authors in Part I critically examine many of the most commonly used terms within the rhetoric of educational reform since the early 1980s and before Part II links today s economized worldview to curricular and instructional issues These essays are especially important for comprehending how the organization of school curriculum privileges those disciplines deemed most central to market expansion math and science and how the political centrality of the economic sphere influences the nature of the knowledge presented in specific content areas Given that language constrains as well as advances human thought the twin tasks of de economizing education and decolonizing society will require a vocabulary that transcends the familiar terminologies addressed in Parts I and II The entries in Part III cultivate the beginnings of such a vocabulary as the authors elucidate innovative concepts which they view as central to the creation of truly alternative educational visions and practices

Gender, Power and Knowledge for Development Lata

Narayanaswamy,2016-12-08 Knowledge for development is under theorised and under researched within development studies but as a set of policy objectives it is thriving within development practice Donors and other agencies are striving to improve the flow of information within and between decision makers and so called poor and marginalized groups in order to promote economic and social development including the empowerment of women Gender Power and Knowledge for Development questions the assumptions and practice of the knowledge for development industry Using a qualitative multi site ethnographical study of a Northern based gender information service and its beneficiaries in India the book queries the utility of the knowledge paradigm itself and the underlying assumption that a knowledge deficit exists in the Global South It questions the value of practices designed to address this presumed deficit that seek to increase information without addressing the specific problems of the knowledge systems being targeted for support After reviewing the evidence the book recommends that international organisations governments and practitioners move away from the belief that information intermediaries can employ progressive correctives to tinker at the edges and thus resolve the shortcomings of on going attempts to use knowledge alone as a driver of development Gender Power and Knowledge for Development will be of great interest to researchers students in development studies gender studies and communication studies as well as INGOs donor agencies and groups engaged in information for development i4D ICT for development ICT4D Tech4Dev knowledge mobilization and knowledge for development K4D

Knowledge, Power and Dissent Guy R. Neave,2006-01-01 This publication is based on the discussions of the 2004 Global Colloquium on Research and Higher Education Policy of the UNESCO Forum for Higher

Education Research and Knowledge held in Paris in December 2004 It contains contributions from 17 international experts in the field of higher education which explore the global rise of the knowledge society and its implications for higher education and for sustainable human development in the future

Contesting Global Environmental Knowledge, Norms and Governance M. J. Peterson, 2019-01-08 Through theoretical discussions and case studies this volume explores how processes of contestation about knowledge norms and governance processes shape efforts to promote sustainability through international environmental governance The epistemic communities literature of the 1990s highlighted the importance of expert consensus on scientific knowledge for problem definition and solution specification in international environmental agreements This book addresses a gap in this literature insufficient attention to the multiple forms of contestation that also inform international environmental governance These forms include within discipline contestation that helps forge expert consensus inter disciplinary contestation regarding the types of expert knowledge needed for effective response to environmental problems normative and practical arguments about the proper roles of experts and laypersons and contestation over how to combine globally developed norms and scientific knowledge with locally prevalent norms and traditional knowledge in ways ensuring effective implementation of environmental policies This collection advances understanding of the conditions under which contestation facilitates or hinders the development of effective global environmental governance The contributors examine how attempts to incorporate more than one stream of expert knowledge and to include lay knowledge alongside it have played out in efforts to create and maintain multilateral agreements relating to environmental concerns It will interest scholars and graduate students of political science global governance international environmental politics and global policy making Policy analysts should also find it useful

Cognitive Justice in a Global World Boaventura de Sousa Santos, 2007-10-23 Cognitive Justice in a Global World Prudent Knowledges for a Decent Life is an edited collection that springs from the now dormant debates known as The Science Wars which questioned the nature of scientific theories Learning from the debates about the plurality of truths and opinions editor Boaventura de Sousa Santos has realized an opportunity for strengthening the relations between the natural and social sciences with more epistemological affinities and for opening up new transnational dialogues between scientists and other producers of knowledge This book analyses in detail some of the topics that amount to a set of problematic relations between science and ethics between objectivity and neutrality between the sociological and theoretical condition of production and the limits of scientific rigor between public faith in science and the economic powers that determine scientific priorities and between science and other kinds of knowledge existing in society Maintaining that global social injustice is by and large epistemological injustice and that there can be no global social justice without global cognitive justice Cognitive Justice in a Global World is an important collection for higher level students and researchers in the social sciences philosophy of science and intellectual history

Expert Knowledge in Global Trade Erin Hannah, James Scott, Silke Trommer, 2015-08-27 This

book explores tensions in global trade by examining the role of experts in generating disseminating and legitimating knowledge about the possibilities of trade to work for global development To this end contributors assess authoritative claims on knowledge They also consider structural features that uphold trade experts monopoly over knowledge such as expert language and legal and economic expertise The chapters collectively explore the tensions between actors who seek to effect change and those who work to uphold the status quo exacerbate asymmetries and reinforce the dominant narrative of the global trade regime The book addresses the following key overarching research questions Who is considered to be a trade expert and how does one become a knowledge producer in global trade How do experts acquire disseminate and legitimate knowledge What agendas are advanced by expert knowledge How does the discourse generated within trade expertise serve to close off alternative institutional pathways and modes of thinking What potential exists for the emergence of more emancipatory global trade policies from contemporary developments in the field of trade expertise This book will be of great interest to students and scholars of IPE Trade Politics International Relations and International Organizations **Making**

Global Society Barry Buzan,2023-08-10 Barry Buzan proposes a new approach to making International Relations a truly global discipline that transcends both Eurocentrism and comparative civilisations He narrates the story of humankind as a whole across three eras using its material conditions and social structures to show how global society has evolved Deploying the English School s idea of primary institutions and setting their story across three domains interpolity transnational and interhuman this book conveys a living historical sense of the human story whilst avoiding the overabstraction of many social science grand theories Buzan sharpens the familiar story of three main eras in human history with the novel idea that these eras are separated by turbulent periods of transition This device enables a radical retelling of how modernity emerged from the late 18th century He shows how the concept of global society can build bridges connecting International Relations Global Historical Sociology and Global World History **Epistemology and Transformation of Knowledge in Global Age**

Zlatan Delic,2017-07-26 This book consists of seven chapters containing multiple questions of the global socially epistemological situation in science and higher education Despite the progress of techno sciences we are facing blind flaws in leading systems of knowledge and perception The global era in a paradox way connects the new knowledge of economics postpolitics postdemocracy and biopolitical regulation of live and unrepresentable forms of the global geo located violence Techno optimism and techno dictatorship in the twenty first century coincide with the ideology of market biopolitics of mandatory satisfaction religious revivalism and collapse of higher education In order for sciences to recover it is necessary to make a globally epistemological and moral turn toward the truth The book shows that when joint desires of the new economics of knowledge and technology erase epistemology in a way to assign definitions of knowledge and rules and practices of the public usage of the mind then the time for epistemology is on its way Medical Power and Social Knowledge Bryan S Turner,1995-08-22 The fully revised edition of this successful textbook provides a comprehensive

introduction to medical sociology and an assessment of its significance for social theory and the social sciences It includes a completely revised chapter on mental health and new chapters on the sociology of the body and on the relationship between health and risk in contemporary societies Bryan S Turner considers the ways in which different social theorists have interpreted the experience of health and disease and the social relations and power structures involved in medical practice He examines health as an aspect of social action and looks at the subject of health at three levels the individual the social and the societal Among the perspectives analyzed are Parsons view of the sick role and the patient s relation to society Foucault s critique of medical models of madness and sexuality Marxist and feminist debates on the relation of health and medicine to capitalism and patriarchy and Beck s contribution to the sociological understanding of environmental pollution and hazard in the politics of health

Developing Successful ICT Strategies: Competitive Advantages in a Global Knowledge-Driven Society Rahman, Hakikur, 2007-08-31 Presents research investigating the notion that information communication technologies ICTs have the potential to improve the lives of people and contribute to enhancing social conditions in developing countries through such concepts as the Knowledge Society open education and e governance

The Politics of Knowledge and Global Biodiversity Alice B.M. Vadrot, 2014-04-24 The establishment of the Intergovernmental Platform on Biodiversity and Ecosystem Services IPBES points to the crucial role attributed to science and knowledge for the successful implementation of biodiversity politics by both scientists and policy makers With the increased importance of biodiversity in international politics and in part inspired by the success the Intergovernmental Panel on Climate Change IPCC has had in raising awareness of global warming the call for an IPCC for Biodiversity was successful The Politics of Knowledge and Global Biodiversity gives a full overview of the process of its implementation as finalised in 2013 and proposes an innovative conceptual framework that puts this specific case into a more general perspective of international politics and relations It provides a detailed empirical analysis of the knowledge politics associated with the establishment of IPBES and its conceptual framework and methodological approach is grounded in a theoretical perspective This pioneering work is the first to examine IPBES in this way and is essential reading for researchers and scholars of International Relations Environmental and Biodiversity Politics Science Policy Interfaces and Global Environmental Governance It will also be of interest to political scientists and social scientists

Knowledge, Desire and Power in Global Politics Chengxin Pan, 2012-01-01 China threat or China opportunity like beauty is in the eyes of the beholder Western imaginations of China come under close scrutiny in this book in a new philosophical depth seldom attempted before Dr Pan displays in full force his analytical skills and his mastery of knowledge both East and West Contrary to conventional approaches he takes a step back to exercise a powerful reflective process to watch the China watchers with illuminating results Dr Pan s book deserves wide and careful reading Professor Gerald Chan University of Auckland New Zealand The rise of China is largely seen as either a threat or an opportunity Chengxin Pan exposes both of these representations as

expressions of Western fears and desires for certainty and predictability His call for a more reflective and culturally sensitive understanding of China offers an important contribution to one of the big political debates of our time Professor Roland Bleiker University of Queensland Australia This is a brilliant and insightful treatment of Western representations of China with a theoretical framework suggesting they come not only from China itself but also the West Although it is not the first treatment of this topic it is innovative in considering the China threat and China opportunity both aspects of the rise of China are of crucial importance for our times With provocative conclusions it is a truly path breaking contribution to the literature I recommend it highly Emeritus Professor Colin Mackerras Griffith University Australia Pan has produced a book which not only challenges some basic assumptions about the nature of China s rise but more importantly forces us to rethink the very basic starting points of how we know what we know about China Professor Shaun Breslin University of Warwick UK How is the rise of China perceived in the West Why is it often labelled as threat and or opportunity What are the implications of these China imageries for global politics Taking up these important questions this groundbreaking book argues that the dominant Western perceptions of China s rise tell us less about China and more about Western self imagination and its desire for certainty Chengxin Pan expertly illustrates how this desire masked as China knowledge is bound up with the political economy of fears and fantasies thereby both informing and complicating foreign policy practice in Sino Western relations Insofar as this vital relationship is shaped not only by China s rise but also by the way we conceptualise its rise this book makes a compelling case for critical reflection on China watching Knowledge Desire and Power in Global Politics is the first systematic and deconstructive analysis of contemporary Western representation of China s rise Setting itself apart from the mainstream empiricist literature its critical interpretative approach and unconventional and innovative perspective will not only strongly appeal to academics students and the broader reading public but also likely spark debate in the field of Chinese international relations British World Policy and the Projection of Global Power, c.1830-1960 T. G. Otte,2019-09-26

Reshapes the discourse surrounding the nature of British global power in this crucial period of transformation in international politics **Politics of the One** Artemy Magun,2012-11-08 This volume in the Political Theory and Contemporary Philosophy series examines one of the most important topics in contemporary political theory how to conceptualize the relationship between the one and the many The essays discuss how to reconcile multiple ontologies without subsuming them to a totalitarian unity While one school of thought Deleuze Negri seeks to create a new ontology based on the many instead of the one which politically is close to anarchy another proposes to understand the one as the ultra one of the event Badiou In this groundbreaking work leading thinkers explore these debates and offer alternative concepts Building on Jean Luc Nancy s essay who proposes an ontology of singular plurality contributors aim to synthesize the one and the many and suggest different ways of forming collectives beyond the dominant representative political forms An original and challenging work Politics of the One addresses new possible ways of bringing people together integrating philosophy with

theoretical and practical problems of politics Knowledge Capitalism Nico Stehr, 2022-06-01 In his newest book Stehr builds on his classic book *Knowledge Societies* 1994 to expand the concept toward one of knowledge capitalism for a now much changed era It is not only because of the onset of the Covid 19 pandemic that we are living in a new epoch it is the idea that modern societies increasingly constitute comprehensive knowledge societies under intensive capitalism whereby the legal encoding of knowledge through national and international law is the lever that enables the transformation of the knowledge society into knowledge capitalism The Trade Related Aspects of Intellectual Property Rights agreement negotiated between 1986 and 1994 as part of the World Trade Organization is the backbone of the modern society and marks a clear historical demarcation and although knowledge capitalism is primarily an economic development the digital giants who are in the driver's seat have significant effects on the social structure and culture of modern society **The Global Politics of Science and Technology - Vol. 2** Maximilian Mayer, Mariana Carpes, Ruth Knoblich, 2014-08-20 An increasing number of scholars have begun to see science and technology as relevant issues in International Relations IR acknowledging the impact of material elements technical instruments and scientific practices on international security statehood and global governance This two volume collection brings the debate about science and technology to the center of International Relations It shows how integrating science and technology translates into novel analytical frameworks conceptual approaches and empirical puzzles and thereby offers a state of the art review of various methodological and theoretical ways in which sciences and technologies matter for the study of international affairs and world politics The authors not only offer a set of practical examples of research frameworks for experts and students alike but also propose a conceptual space for interdisciplinary learning in order to improve our understanding of the global politics of science and technology The second volume raises a plethora of issue areas actors and cases under the umbrella notion techno politics Distinguishing between interactional and co-productive perspectives it outlines a toolbox of analytical frameworks that transcend technological determinism and social constructivism
