The Blood

The blood is a tissue.

It consists of four main components:

red blood cells
white blood cells
platelets
plasma

The cells components (mostly red blood cells) are **suspended** in the plasma meaning they are normally mixed evenly throughout the plasma.

Red Blood Cells

These are disc shaped and biconcave. This increases their surface area. They can absorb and more oxygen. Red blood cells don't have a nucleus to make more room for haemoglobin.

White Blood Cells

There are different types but they are part of the immune system and fight communicable disease. They all have large nuclei, and can also change shape so they can **engulf** microorganisms.

Plasma

This makes up most of the blood. It is mostly made of water, but with substances like glucose, proteins, ions and carbon dioxide dissolved in it. The other components are suspended in the plasma.

Platelets

Platelets are fragments of cells. Their function is to start the process of **clotting** at a wound. The clot blocks the injury until proper healing can happen, preventing excessive blood loss.

Artery	Blood vessel that carries blood away from the heart.
Blood	A tissue consisting of red blood cells, white blood cells, plasma and platelets.
Blood vessel	How blood is transported around the body.
Capillary	Blood vessel that connects arteries and veins.
Plasma	Liquid in which other blood components are suspended.
Platelets	Cells that cause wounds to clot.
Red blood cells	Cells that carry oxygen around the body.
Vein	Blood vessel that carries blood towards the heart.
White blood cells	Cells that fight microorganisms in the body.

Blood Vessels

There are three types of blood vessel; arteries, veins and capillaries.

Arteries

These carry blood at high pressure **AWAY** from the heart. They have a thick elastic wall.

Veins

These carry blood at lower pressure **back to** the heart. They have a much thinner wall. They also contain valves to prevent backflow of the blood.

Capillaries

These are where exchange takes place so the wall are only one cell thick. They connect the arteries and the veins.

Knowledge In The Blood:

Knowledge in the Blood Jonathan D. Jansen, 2009-04-07 This book tells the story of white South African students how they remember and enact an Apartheid past they were never part of How is it that young Afrikaners born at the time of Mandela's release from prison hold firm views about a past they never lived rigid ideas about black people and fatalistic thoughts about the future Jonathan Jansen the first black dean of education at the historically white University of Pretoria was dogged by this question during his tenure and *Knowledge in the Blood* seeks to answer it Jansen offers an intimate look at the effects of social and political change after Apartheid as white students first experience learning and living alongside black students He reveals the novel role pedagogical interventions played in confronting the past as well as critical theory's limits in dealing with conflict in a world where formerly clear cut notions of victims and perpetrators are blurred While Jansen originally set out simply to convey a story of how white students changed under the leadership of a diverse group of senior academics *Knowledge in the Blood* ultimately became an unexpected account of how these students in turn changed him The impact of this book's unique wide ranging insights in dealing with racial and ethnic divisions will be felt far beyond the borders of South Africa *Blood Bank Procedures & Knowledge* Dr Versha Prasad, 2022-01-01 **Blood Knowledge** Tao
