Koohaas Considering Koolhaas And The Office For Metropolitan Architecture:

Considering Rem Koolhaas and the Office for Metropolitan Architecture Rem Koolhaas, Véronique Patteeuw, 2003 Edited by Veronique Patteeuw Essays by Aaron Betsky Okwui Enwezor Neal Leach Matthew Stadler Bart Verschaffel H J A Hofland and Bruce Sterling Excerpts by Michael Sorkin Jean Attali Anthony Vidler Fredric Jameson et al What is OMA Véronique Architecture and Spectacle: A Critique Gevork Hartoonian, 2016-12-05 Focusing on six leading contemporary architects Peter Eisenman Frank Gehry Bernard Tschumi Zaha Hadid Rem Koolhaas and Steven Holl this book puts forward a unique and insightful analysis of neo avant garde architecture It discusses the spectacle and excess which permeates contemporary architecture in reference to the present aesthetic tendency for image making but does so by applying the tectonic of theatricality discussed by the 19th century German architect Gottfried Semper In doing so it breaks new ground by opening up a dialogue between the study of the past and the design of the present The work of each discussed architect is seen as addressing a historiographical problem To this end and this is the second important aspect of this book the chosen buildings are discussed in terms of the thematic of the culture of building the tectonic of column and wall for example rather the formal and this through a discussion that is informed by the latest available theories Having set the aesthetic implication of the processes of the digitalization of architecture the book s conclusion highlights strategies by which architecture might postpone the full consequences of digitalization and thus the becoming of architecture as ornament Made by the Office for Metropolitan Architecture Albena Yaneva, 2009 Summary The book presents an on its own right ethnographic account of the design rhythm in the Office for Metropolitan Architecture Written as a collection of short stories it draws on the mundane trajectories of models and architects at the OMA Includes photo documentation on various projects the Seattle Public Library the Whitney Museum of American Art in New York the China Central Television CCTV in Beijing the Los Angeles County Museum of Art LACMA la Casa da Musica in Porto etc The Urban Design Reader Michael Larice, Elizabeth Macdonald, 2013-05-07 The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design Nearly 50 generous selections include seminal contributions from Howard Le Corbusier Lynch and Jacobs to more recent writings by Waldheim Koolhaas and Sorkin Following the widespread success of the first edition of The Urban Design Reader this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today. The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and

lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

Architecture as Cultural and Political Discourse Daniel Grinceri, 2016-02-26 This book is concerned with cultural and political discourses that affect the production of architecture It examines how these discursive mechanisms and technologies combine to normalise and aestheticise everyday practices. It queries the means by which buildings are appropriated to give shape and form to political aspirations and values Architecture is not overtly political It does not coerce people to behave in certain ways However architecture is constructed within the same rules and practices whereby people and communities self govern and regulate themselves to think and act in certain ways This book seeks to examine these rules through various case studies including the reconstructed Notre Dame Cathedral the Nazi era Munich Konigsplatz Auschwitz concentration camp and the Prora resort Sydney's suburban race riots and the Australian Immigration Detention Centre on The Architecture of Use Stephen Grabow, Kent Spreckelmeyer, 2014-10-03 By analyzing ten examples of Christmas Island buildings that embody the human experience at an extraordinary level this book clarifies the central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper purposes and meanings of everyday life The Dissertation Iain Borden, Katerina Ruedi

Ray, 2014-05-09 The Dissertation is one of the most demanding yet potentially most stimulating components of an architectural course This classic text provides a complete guide to what to do how to do it when to do it and what the major pitfalls are This is a comprehensive guide to all that an architecture student might need to know about undertaking the dissertation The book provides a plain guide through the whole process of starting writing preparing and submitting a dissertation with minimum stress and frustration The third edition has been revised throughout to bring the text completely up to date for a new generation of students Crucially five new and complete dissertations demonstrate and exemplify all the advice and issues raised in the main text These dissertations are on subjects from the UK USA Europe and Asia and offer remarkable insights into how to get it just right Architecture and the Image at the Turn of the 21st Century Sanja Rodeš.2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture s far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies Architecture's Pretexts Aarati Kanekar, 2014-11-13 The aim of this book is to expose readers to architecture s pretexts that include literary narratives film theatre painting music and ritual as a bridge between diverse intellectual territories and architecture It introduces a selection of seminal modern and contemporary architectural projects their situation within the built environment and their intellectual and formal situation context as pretexts and design paradigms Connections between diverse bodies of information will be cultivated along with the ability to posit consequential relationships for the production of architecture Architecture s Pretexts seeks to cultivate a vision for architecture that sponsors operative links between the discipline of architecture and those outside of architecture Exploring the works of various architects including Guiseppe Terragni Peter Eisenman Peter Zumthor Perry Kulper and

Smout Allen and Rem Koolhaas this book provides the framework to understanding architecture through the lens of art Key concepts discussed are allegories diagrams form material montage movement musical ratios narrative sequence and representation A valuable tool with over 75 black and white illustrations for students and professionals interested in interdisciplinary methods of design thinking **Envisioning Architecture** Eugenio Morello, Barbara E.
