Advocacy Edward A. Johnson,Michael J. Mappin,2005-03-03 Environmental education has often blurred the distinction between ecological science and environmental advocacy Growing public awareness of environmental problems and desire for action may be contributing to this blurring There is a need to clarify the distinction between the role of ecological science and the role of social and political values for the environment within environmental education This book addresses this need by examining the changing perspectives of ecology in education and the changing perspectives of education in environmental

education Guidelines are provided for assessing the science and education perspectives within environmental education along with suggested frameworks for development of programs and resources that integrate current science education and action This book will be of interest to environmental educators ecologists interested in environmental education and curriculum and resource developers National Environmental Policy Act United States. Congress. Senate. Committee on Public Works,1972 Environmental Skill Mark Coeckelbergh,2015-02-20 Today it is widely recognized that we face urgent and serious environmental problems and we know much about them yet we do very little What explains this lack of motivation and change Why is it so hard to change our lives This book addresses this question by means of a philosophical inquiry into the conditions of possibility for environmental change It discusses how we can become more motivated to do environmental good and what kind of knowledge we need for this and explores the relations between motivation knowledge and modernity After reviewing a broad range of possible philosophical and psychological responses to environmental apathy and inertia the author argues for moving away from a modern focus on either detached reason and control Stoicism and Enlightenment reason or the natural the sentiments and the authentic Romanticism both of which make possible disengaging and alienating modes of relating to our environment Instead he develops the notion of environmental skill a concept that bridges the gap between knowledge and action re interprets environmental virtue and suggests an environmental ethics centered on experience know how and skillful engagement with our environment The author then explores the implications of this ethics for our lives it changes the way we think about and deal with health food animals energy climate change politics and technology
