Environment And Human Security:

A Changing Environment for Human Security Linda Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security A Changing Environment for Human Security Transformative Approaches to Research Policy and Action both supports and informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice **Environment and Human Security** Hans Günter Brauch, 2005 **Climate Change, Human Security and Violent Conflict** Jürgen Scheffran, Michael Brzoska, Hans Günter Brauch, Peter Michael Link, Janpeter Schilling, 2012-05-26 Severe droughts damaging floods and mass migration Climate change is becoming a focal point for security and conflict research and a challenge for the world's governance structures But how severe are the security risks and conflict potentials of climate change Could global warming trigger a sequence of events leading to economic decline social unrest and political instability What are the causal relationships between resource scarcity and violent conflict This book brings together international experts to explore these questions using in depth case studies from around the world Furthermore the authors discuss strategies institutions and cooperative approaches to stabilize the climate society interaction *Human Security and the Environment* Edward Page, M. R. Redclift, 2002-01-01 In the post Cold War era the pre eminent threats to our security derive from human degradation of vital ecosystems as well as the possibility of war and terrorist attack This substantial book examines this new security environment paradigm and the way in which the activities of societies are shifting the balance with nature The distinguished authors investigate this redefinition of security with particular reference to environmental threats such as climate change and the availability of adequate supplies of food and water They illustrate how unfettered economic growth rising levels of personal consumption and unsustainable natural resource and energy procurement are taking a heavy toll on the global environment This in turn is forcing both developed and developing countries to re evaluate the more immediate environmental security of their own populations For a truly global perspective the authors present a series of country case studies looking at issues of security and environment and comparing how they influence policy and human well being They

also discuss a number of theoretical issues which underpin discussions of environmental security demonstrating that this is a relatively new and essentially contested concept **Society, Environment and Human Security in the Arctic Barents Region** Kamrul Hossain,Dorothee Cambou,2018-05-20 The Arctic Barents Region is facing numerous pressures from a variety of sources including the effect of environmental changes and extractive industrial developments The threats arising out of these pressures result in human security challenges This book analyses the formation and promotion of societal security within the context of the Arctic Barents Region It applies the human security framework which has increasingly gained currency at the UN level since 1994 UNDP as a tool to provide answers to many questions that face the Barents population today The study explores human security dimensions such as environmental security economic security health food water energy communities political security and digital security in order to assess the current challenges that the Barents population experiences today or may encounter in the future In doing so the book develops a comprehensive analysis of vulnerabilities challenges and needs in the Barents Region and provides recommendations for new strategies to tackle insecurity and improve the wellbeing of both indigenous and local communities This book will be a valuable tool for academics policy makers and students interested in environmental and human security sustainable development environmental studies and the Arctic and Barents Region in particular **A Changing Environment for Human Security** Linda Sygna,Karen O'Brien,Johanna Wolf,2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security A Changing Environment for Human Security Transformative Approaches to Research Policy and Action both supports and informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice **Environmental Change and Human Security in Africa and the Middle East** Mohamed Behnassi,Katriona McGlade,2017-01-17 This volume brings together insights on the interactions between environmental change and human security in the Middle East and Africa These regions face particular challenges in relation to environmental degradation the decline of natural resources and consequent risks to current and future human security The chapters provide topical analysis from a range of disciplines on the theory discourse policy and practice of responding to global environmental change and

threats to human security Case studies from Morocco Tunisia Egypt Turkey Iraq and Syria provide empirical evidence with a focus section dedicated to the critical issue of water resources and water security in the region The contributions demonstrate above all that the risks posed to human security arise through multiple and interconnected processes operating across diverse spatial and temporal scales The complexity of these processes requires new ways of thinking and intervening As a contribution the current volume provides engaging insights from theory and practice for those seeking to address the challenges of environmental change

Rethinking Human Security Moufida Goucha, John Crowley, 2009-04-22 This book provides seven studies that address major issues such as the human rights and human security nexus gender aspects of human security ethical and environmental challenges human security as a basic element for a policy framework the human security agenda developed by the Human Security Network and debates on human security within the United Nations Building on its variety of themes the book takes account of the complexity and scope of the concept of human security and proposes thereby to refresh and enrich discussion Contributors are internationally renowned experts in the different subfields of human security Offers an overview of current trends and insights on what is at stake if the international community is to maintain the momentum created a few years ago when the concept of human security emerged Designed to help both newcomers and experts in the field of human security Readers will find inspiration in the new developments of a concept that aims to shape practical action to meet the needs of the most vulnerable

The Meaning of Environmental Security Jon Barnett, 2001 This book is a comprehensive critical discussion of the new idea of environmental security Jon Barnett looks at links between environmental degradation and national security But the meaning of the concept is ambiguous and an examination of its various interpretations and applications reveals much about the state of global environmental politics Barnett argues that environmental security is ultimately driven more by the power of security makers than by the need to address environmental problems By systematically uncovering the deficiencies of existing discourses he develops an alternative critical Green approach with practical implications

Threats, Challenges, Vulnerabilities and Risks in Environmental and Human Security Hans Günter Brauch, 2005 Handbook on Climate Change and Human Security Michael R Redclift, Marco Grasso, 2013-10-31 The Handbook is international in scope and provides an assessment that will be of value to academics students and policy professionals alike NGOs and policy institutes which need a grasp of the specificity and range of the issues and problems will all

Environmental Change and Human Security: Recognizing and Acting on Hazard Impacts Peter H. Liotta, David A. Mouat, W.G. Kepner, Judith Lancaster, 2008-07-31 Environmental and Human Security Then and Now 1 2 ALAN D HECHT AND P H LIOTTA 1 U S Environmental Protection Agency Office of Research and Development 2 Pell Center for International Relations and Public Policy Salve Regina University 1 Nontraditional Threats to Security The events of September 11 2001 have sharpened the debate over the meaning of being secure Before 9 11 there were warnings in all parts of the world that social and environmental changes were occurring While there was prosperity in North America and

Western Europe there was also increasing recognition that local and global effects of ecosystem degradation posed a serious threat. Trekking from Cairo to Cape Town thirty years after living in Africa as a young teacher for example travel writer Paul Theroux concluded that development in sub Saharan Africa had failed to improve the quality of life for 300 million people. Africa is materially more decrepit than it was when I first knew it hungrier poorer less educated more pessimistic more corrupt and you can't tell the politicians from the witch doctors. 2002 While scholars and historians will debate the causes of 9 11 for some time one message is clear. An often dizzying array of nontraditional threats and complex vulnerabilities define security today. We must understand them and deal with them or suffer the consequences. Environmental security has always required attention to nontraditional threats linked closely with social and economic well being.

Human and Environmental Security Felix Dodds, Tim Pippard, 2013-06-17 Security has tended to be seen as based on military force yet this illusion is crumbling literally and figuratively before our eyes in the conflict zones of Iraq Afghanistan and Africa. It is now clear that real human security defined by the Commission on Human Security as protecting vital freedoms can only be achieved if the full range of issues that underpin human security including environmental integrity are addressed. This ground breaking book authored by prominent international decision makers tackles the global human security problem across the range of core issues including terrorism nuclear proliferation access to water food security loss of biodiversity and climate change. The authors identify the causes of insecurity articulate the linkages between the different elements of human security and outline an agenda for engaging stakeholders from across the globe in building the foundations of genuine and lasting human security for all nations and all people. This is powerful necessary solution focused reading in these times of peril global conflict mass inequity and rampant environmental degradation.

Environmental Security Peter Hough, 2021-06-29 This textbook offers a student friendly survey of the global politics of the environment through the prism of security studies. This book is divided into three thematic sections. The first part sets out the key theoretical and practical arguments for and against bringing together environmental and security issues. The second part examines why environmental issues have been framed by some as national security concerns in the context of the effects of overpopulation resource depletion climate change and the role of the military as both a cause and a solution to problems of pollution and natural disasters. Finally the third section explores the case for treating the key issues of environmental change as matters of human security. The chapters have been updated to include the 2015 Paris Climate Change Accords the Trump and Sendai Framework for Disaster Risk Reduction and there is a new chapter on environmental history. Overall the book provides a clear systematic and thorough overview of an area of great academic and real world political interest. This book will be essential reading for students of environmental studies critical and human security human geography development studies and International Relations in general.

Human and Water Security in Israel and Jordan Philip Jan Schäfer, 2012-10-28 The work aims at answering the question as to how far discourses on human security are present in Jordan and Israel if they

converge and if political solutions for the issue of water security could be derived The analysis is based on the assumption that from human security perspective common solutions for urgent problems can be derived more easily than out of a perspective of national security Yet it is acknowledged that according to a new security perspective different security threats are being identified by relevant actors An empirical analysis of written statements and utterances of the respective security elites establishes the methodological tool for the identification of human security discourses in Israel and Jordan

Subsequently it is estimated how far water is presented as a matter of national security in Israel and Jordan using the theory of securitization

Global Environmental Change and Human Security Richard A. Matthew, Jon Barnett, Bryan McDonald, Karen L. O'Brien, 2009-10-09 Experts discuss the risks global environmental change poses for the human security including disaster and disease violence and increasing inequity In recent years scholars in international relations and other fields have begun to conceive of security more broadly moving away from a state centered concept of national security toward the idea of human security which emphasizes the individual and human well being Viewing global environmental change through the lens of human security connects such problems as melting ice caps and carbon emissions to poverty vulnerability equity and conflict This book examines the complex social health and economic consequences of environmental change across the globe In chapters that are both academically rigorous and policy relevant the book discusses the connections of global environmental change to urban poverty natural disasters with a case study of Hurricane Katrina violent conflict with a study of the decade long Nepalese civil war population gender and development The book makes clear the inadequacy of traditional understandings of security and shows how global environmental change is raising new unavoidable questions of human insecurity conflict cooperation and sustainable development Contributors W Neil Adger Jennifer Bailey Jon Barnett Victoria Basolo Hans Georg Bohle Mike Brklacich May Chazan Chris Cocklin Geoffrey D Dabelko Indra de Soysa Heather Goldsworthy Betsy Hartmann Robin M Leichenko Laura Little Alexander Lopez Richard A Matthew Bryan McDonald Eric Neumayer Kwasi Nsiah Gyabaah Karen L O'Brien Marvin S Soroos Bishnu Raj Upreti

Human and Environmental Security in the Era of Global Risks Mohamed Behnassi, Himangana Gupta, Olaf Pollmann, 2018-10-24 This book discusses ways to deepen the debate on the linkages between global risks and human and environmental security The approach put forward in this book is one of questioning the ability of existing concepts regulatory frameworks technologies and decision making mechanisms to accurately deal with emerging risks to human and environmental security and to act in the direction of effectively managing their impacts and fostering the resilience of concerned systems and resources Empirical research findings from Africa Asia and the Pacific Islands are provided During the last decades the links between emerging risks and the security of humans and nature have been the object of considerable research and deliberations However it is only recently becoming an important focus of policy making and advocacy In this contributed volume it is presumed that the ability or lack thereof to make innovative conceptual frameworks institutional and policy arrangements and technological

advances for managing the current emerging risks will foster or undermine the environmental security and consequently determine the future human security Moreover taking into account the links between environmental climate security human security and sustainability will help frame a new research agenda and potentially develop a broad range of responses to many delicate questions

Understanding and Managing Threats to the Environment in South Eastern Europe

Gorazd Mesko,Dejana Dimitrijević,Charles B. Fields,2011-02-09 This volume presents reflections on a variety of environmental issues in South Eastern Europe from diverse contemporary scientific disciplines The contributions address many crucial issues including national environmental policies economic instruments for preventing crimes against the environment international waste trafficking threats to air water and soil due to mining management of dump areas environment protection and food safety from a perspective of public health The book will be a useful resource for researchers developers and decision makers interested in the stability and sustainable development of the South Eastern European countries

Environmental Security in Transnational Contexts

Harlan Koff,Carmen Maganda,2019-10-23 Much of the discussion surrounding the definition of the Sustainable Development Goals SDGs and the post 2015 global development agenda has contextualized sustainable development within the framework of transformation specifically prioritizing concepts such as equity security justice and rights While these debates correctly discussed power imbalances and relational obstacles to human development they have remained abstract because they focused only on the international level In this regard discussions have not adequately examined mechanisms that facilitate or block the emergence of sustainable development as a political priority nor do they address specific policy proposals to link environmental justice to human development strategies This book contends that human and environmental security should be framed in terms of transnational discussions rather than being limited to general international debates in order to examine both governance challenges and potential policy mechanisms that can effectively address environmental security issues that cross national boundaries The chapters in this volume undertake an empirical examination of the relationships between human and environmental security cross border exchanges and regional integration They address the relationships between international norms transnational human and environmental security issues and the regionalization of governance in different parts of the world as the book includes comparative analyses as well as case studies from Europe Asia and the Americas The chapters originally published as a special issue in Globalizations

Integrated Approaches to Peace and Sustainability

Ayyoob Sharifi,Dahlia Simangan,Shinji Kaneko,2023-01-30 This book provides new insights into the development of integrated approaches to peace and sustainability in the era of global change Since the late 1980s and in order to regulate the increasingly detrimental impacts of humans on the environment the transition towards sustainability has been high on the agenda of researchers and policymakers alike Meanwhile peace considerations have expanded in recent decades to include the varied types and sources of conflict from inter state to intra state conflicts due to various social political economic and environmental factors Through

providing theoretical and empirical insights this book demonstrates that sustainability and peace as intrinsically interrelated. The book elaborates on the multi dimensional and constantly evolving concepts of sustainability and peace. In addition the book contributes to a better understanding of the complex and dynamic interlinkages between peace and sustainability by presenting examples of pathways where sustainability and peace interact considering the different factors and contexts that are constantly shaping and reshaping the conditions for sustainable and peaceful societies.
