**Environmental Politics and Liberation in Contemporary Africa** M.A. Salih, 2013-03-14 Nowadays the environment looms large in the analysis of conflict in developing societies and the precise role it plays is the subject of an ongoing debate The debate has moved on from the earlier but still popular notions of power struggles class struggles and ethnic conflicts to a perception of conflict as the product of intense group competition for resources Where the state controls the distribution of resources itself inevitably becomes party to conflicts whose bone of contention is access to state power as the most efficient means of gaining access to resources The resources in question are social health education transportation communication recreation etc and material land water housing jobs contracts licenses permits etc In parts of the world and especially in Africa diminishing resources and authoritarian state rule exacerbate group competition leading to political confrontation This is the line I have followed in analysing conflict in the Horn of Africa Markakis 1987 1998 Mohamed Salih's first contribution in this volume is to move the debate a step beyond this line which can be criticized as unduly materialist He does it by bringing culture into the realm of resources not only as a resource in itself but also as the agency that assigns natural resources their value Culture thus becomes a contextual element in conflict over resources whose value is culturally determined

**Intergovernmental Decisionmaking for Environmental Protection and Public Works** United States. Advisory Commission on Intergovernmental Relations, 1992 Environmental Sustainability Fraser Smith, 2020-02-05 In 1994 representatives from all over the world met in Costa Rica to discuss the impact of ecological economics on developing countries That groundbreaking conference laid the foundation for this new collection of research on environmental

sustainability While most discussions on sustainable development focus on the industrialized nations Environmental Sustainability Practical Global Applications takes a different angle it presents the views of the developing countries themselves on issues such as wildlife resources in Namibia timber production in Costa Rica property rights and land reform in South Africa and other steps being taken to implement environmentally sustainable economies around the world This is an ideal text for students of natural and social sciences development professionals and entrepreneurs seeking opportunities for ecologically sustainable businesses Academics will find it useful as a source of current research and for making new contacts in the field For anyone interested in exploring the link between man and his environment specifically the relationship between economics and ecology Environmental Sustainability is a must *International Environmental Law and Asian Values* Roda Mushkat, 2004 Following decades of vigorous economic expansion Asia is confronting the environmental consequences of unfettered development This poses a challenge because of the strong bias of prevailing cultural systems in the region toward the goal of lifting standards of living over achieving ecological sustainability This book juxtaposes international environmental norms and practices with relevant Asian policies and their applications in key areas Roda Mushkat examines the fundamental principle of public participation in environmental law making as well as the rights approach against the emergence of democratic and human rights norms in the region The complex relationship between trade and the environment is also discussed in light of the strong regional emphasis on economic growth trade liberalization and the aversion to conditionalities Given regionalization processes in Asia Pacific and elsewhere this work seeks to establish to what extent such processes have led to the regionalization of international environmental law *International Environmental Law and Asian Values* concludes that although some gaps can be identified between international imperatives and regional responses Asian values have not proved to be an insurmountable barrier to the spread of international environmental legal ideas On the whole the region is responding to impulses emanating from the global arena rather than resisting them consciously The analysis and conclusions of this comprehensive and original work will be of considerable interest to scholars of international law and relations environmental policy comparative culture economic development and social change

**Air Transport and the Environment** Ben

Daley, 2016-04-01 Air Transport and the Environment provides an overview of the main issues relating to aviation environmental impacts. It explains the challenge facing policymakers in terms of sustainable development focusing on the importance of balancing the industry's economic, social and environmental costs and benefits both for people living now and for future generations. Individual chapters review the current scientific understanding of the main aviation environmental impacts: climate change, local air pollution and aircraft noise. Various responses to those issues are also considered, including a range of policy options based on regulatory, market based and voluntary approaches. Key concepts such as environmental capacity, radiative forcing and carbon offsetting are explained. In addition, the book emphasises the main implications of aviation environmental issues for policymakers and for the management of the air transport industry. Debates about the environmental impacts of flying often generate strongly polarised reactions, yet this book adopts a constructive approach to the subject and attempts to present the environmental issues in a clear, straightforward manner. It aims to provide a policy relevant synthesis of a wide range of perspectives rather than advocating one particular viewpoint. Yet the central purpose of this book is to bring the sustainable development challenge facing the air transport industry to the fore and so to inform effective policy responses. Air transport plays a critical role in supporting economies and societies that are increasingly interconnected by globalisation; this book presents the view that the vital economic and social benefits of the air transport industry should not be lost and in fact could be distributed far more widely and equitably, but that the environmental impacts of air transport nevertheless require urgent and effective management. Air Transport and the Environment has been written primarily for professionals in the air transport industry, policymakers and regulators. It is also intended for use by academic researchers, students and others who are interested in the complex relationship between air transport and the environment.

**Environmental Accounting in Theory and Practice** K. Uno, Peter

Bartelmus, 2013-06-29 Policy failures in environment and development have been blamed on fragmented and eclectic policies and strategies. The 1992 United Nations Conference on Environment and Development, the Earth Summit in Rio de Janeiro, called therefore for an integrated approach in planning and policy making to achieve long-term sustainable growth and development. The Conference also recognized in its action plan, the Agenda 21, that integrated policies need to be supported by integrated information, notably requiring the implementation of integrated environmental and economic accounting by its member States. During the preparations for the Rio Summit, scientists and practitioners of national accounting met in a

Special Conference on Environmental Accounting organized by the International Association for Research in Income and Wealth IARIW in Baden Austria Their aim was to explore the need for and methodologies of adjusting national accounts for environmental reasons National accountants had faced mounting criticism that conventional accounting neglected new scarcities in natural capital as well as the social cost of environmental degradation The result of their deliberations was a draft manual later issued by the United Nations Statistics Division UNSD as a handbook of Integrated Environmental and Economic Accounting
