Global Environment and World Politics Elizabeth R. DeSombre, 2005-01-01 Politically the world is composed of states Environmentally the world is made up of ecosystems This disconnection between ecological and political systems makes addressing environmental issues at the global level both more difficult and more necessary This volume examines how we should set about addressing the problems that face the environment internationally The field of international environmental politics draws on a variety of academic traditions It uses international relations theory to look at the concerns and actions of states but it also uses variety of new perspectives to explain issues that are unique to the study of the environment Elizabeth DeSombre explores four important approaches to the field international environmental cooperation the relationship between the environment and security the issues of science uncertainty and risk and the role of non state actors She explores these approaches with the help of case studies on specific problems facing the global environment focusing in particular on ozone depletion and global climate change the politics of whaling the protection of Amazonian biodiversity and acid rain in Europe and North America

Environmental NGOs in World Politics Matthias Finger, Thomas Princen, 2013-01-11 At a time when states are reactive at best to the global ecological crisis and when economic globalization seems to be significantly contributing to the acceleration of that crisis environmental non governmental organisations NGOs are proliferating This book explains the key role of NGOs in an emerging world environmental politics showing how NGOs act both as independent bargainers and as agents of social learning to link biophysical conditions to the political realm at both the local and global levels Through the use of case studies the authors reveal the richness and diversity of NGO activity and the difficulty of the choices facing decision makers in their attempts to protect the environment seek new forms of governance and foster social environmental learning The book generates questions that are central not only to an understanding of NGO relations but to the study of international environmental

politics Environmental NOGs in World Politics will be of great interest to upper level student sand scholars of both environmental politics and international relations It will also appeal to environmental policy professionals *The Environment and International Relations* Mark Imber,John Vogler,2005-08-12 Environmental issues and questions of global change are now firmly established on the international political agenda This book provides a wide ranging survey of the current treatment of environmental issues in international relations This book begins by looking at the relevance of the different theoretical approaches current in international relations to the study of the environment It analyzses a wide range of approaches from the debate between neo realism and liberal institutionalism to the significant connections between gender and global environmental change The book goes on to consider a range of key international processes discussing the monitoring and implementation of environmental agreements the place of ideology in negotiations and the role of international organisations **Global Environmental Politics** Gareth Porter,1991 Essays discuss environmental issues interest groups security and trade considerations and future approaches to environmental policy *The Global Environment and World Politics* Elizabeth R. DeSombre,2007-06-01 Environmental issues are increasingly important factors in world politics just think of the intense speculation over the climate change discussions at the forthcoming G8 summit The study of global environmental politics draws on a variety of academic traditions It uses international relations theory to look at the concerns and actions of states but has also had to find a variety of new concepts and perspectives in order to explain issues unique to the study of the environment Here DeSombre examines four important aspects of the field international environmental cooperation the relationship between the environment and security the issues of science uncertainty and risk and the role of non state actors In the second half of the book she examines these issues through the use of case studies on specific problems facing the global environment including global change the politics of whaling the protection of Amazonian biodiversity and acid rain in Europe and North America **Global Environmental Politics** Pamela S. Chasek,David L. Downie,Janet Welsh Brown,2006-01-03 Rev ed of Global environmental politics Gareth Porter Janet Welsh Brown and Pamela S Chasek 3rd ed 2000 *The Environment and International Relations* Kate O'Neill,2009-01-22 This textbook enables students to apply the theory and approach of International Relations to environmental challenges facing a complex international political system **Global Environmental Politics** Pamela S. Chasek,David Leonard Downie,Janet Welsh Brown,2014 Although discussions about the global environment are now a daily occurrence from companies touting energy saving products to politicians debating how to best address the issue of climate change and other environmental concerns it remains a topic plagued by misinformation and ideologically skewed arguments For more than twenty years Global Environmental Politics has provided an up to date accurate and unbiased introduction to the world s most pressing environmental issues and this new edition continues the tradition With new material on the latest international environmental regimes the 2012 UN Conference on Sustainable Development the challenges of regime implementation and

the impact of the global economic crises on the global environment the authors offer a comprehensive overview of the environment and international politics It is vital reading for anyone wishing to understand the current state of the field and to make informed decisions about which policies might best safeguard our environment for the future

The Environment and International Politics Hakan Seckinelgin, 2005-11-17 This new study shows how environmental issues represent a deep problem in conceptualising the relationship between human beings and nature This key relationship grounds the implicit ethical and political concerns of International Relations and our understandings of environmental politics It demonstrates that the core theoretical orientations of the study of International Relations are not only incapable of understanding and responding to contemporary problems but are profoundly complicit in creating the ecological problems in the first place This major book develops a sense of these realities based on the thinking of Martin Heidegger It forwards new ways of rethinking the environmental questions and addresses crucial issues such as sovereignty the International Law of The Sea the Kyoto Protocol Northern Alaskan oil exploration and exploitation and the impact of the United Nations Convention on the Law of The Sea III This is essential specialist reading for readers concerned with the environment

The Global Politics of the Environment Lorraine Elliott, 2004-08 Human activity is changing the global environment on a scale unlike that of any other era Environmental deterioration is now a global issue ecologically politically and economically that requires global solutions Yet there is considerable disagreement over what kinds of strategies we should adopt in order to halt and reverse damage to the global ecosystem What kinds of international institutions are best suited to dealing with global environmental problems Why are women and indigenous peoples still marginalized in global environmental politics What are the consequences of the global ecological crisis for economic and security policies The Global Politics of the Environment makes sense of the often seemingly irreconcilable answers to these questions It focuses throughout on the tensions between mainstream strategies which seek to build support for reforms through existing institutions and radical critiques which argue that environmental degradation is a symptom of a dysfunctional world order that must itself be transformed if we are to meet the challenge of saving the planet

Climate Change in World Politics J.

Vogler, 2016-02-02 John Vogler examines the international politics of climate change with a focus on the United Nations Framework Convention UNFCCC He considers how the international system treats the problem of climate change analysing the ways in which this has been defined by the international community and the interests and alignments of state governments

The Greening of Sovereignty in World Politics Karen Litfin, 1998 This is the first book to connect two important subfields in international relations global environmental politics and the study of sovereignty the state's exclusive authority within its territorial boundaries The authors argue that the relationship between environmental practices and sovereignty is by no means straightforward and in fact elucidates some of the core issues and challenges in world politics today Although a number of international relations scholars have assumed that transnational environmental organizations

and institutions are eroding sovereignty this book makes the case that ecological integrity and state sovereignty are not necessarily in opposition It shows that the norms of sovereignty are now shifting in the face of attempts to cope with ecological destruction but that this greening of sovereignty is an uneven variegated and highly contested process By establishing that sovereignty is a socially constructed institution that varies according to time and place with multiple meanings and changing practices *The Greening of Sovereignty in World Politics* illuminates the complexity of the relationship between sovereignty and environmental matters and casts both in a new light Contributors Daniel Deudney Margaret Scully Granzeier Joseph Henri Jupille Sheldon Kamieniecki Thom Kuehls Ronnie D Lipschutz Karen T Litfin Marian A L Miller Ronald B Mitchell Paul Wapner Veronica Ward Franke Wilmer World Politics Jeffrey Haynes, Peter Hough, Shahin Malik, Lloyd Pettiford, 2013-09-13 From the war on terror to the global financial crisis traditional concepts of world politics are being challenged on a daily basis In these uncertain times the study of international relations and the forces that shape them have never been more important Written specifically for students who are approaching this subject for the first time *World Politics* is the most accessible coherent and up to date account of the field available It covers the historical backdrop to today's political situations the complex interactions of states and non state actors the role of political economy human security in all its forms and the ways in which culture religion and identity influence events *World Politics* takes a new approach that challenges traditional interpretations and will equip students with the knowledge and the confidence needed to tackle the big issues *Understanding Global Environmental Politics* M. Paterson, 2000-04-07 *Understanding Global Environmental Politics* develops a new critical approach to global environmental politics It argues that the major power structures of world politics are deeply problematic in ecological terms and that they cannot be easily used to resolve major environmental challenges such as global warming Instead of simply advocating the construction of new international institutions to respond to such challenges therefore the book argues that the construction of alternative social and political structures is necessary Palgrave Advances in International Environmental Politics M. Betsill, K. Hochstetler, D. Stevis, 2005-10-31 *Palgrave Advances in International Environmental Politics* provides a state of the art review of the major theoretical approaches and substantive debates of the field The first section reviews the historical development of international environmental politics as well as the theoretical and methodological approaches used in its study The following chapters each review the trajectory of a key research area within international environmental politics and elaborate on current approaches and debates Case studies in each chapter illuminate the main theoretical questions that emerge from the review **Environmental Activism and World Civic Politics** Paul Kevin Wapner, 1996-01-01 Based on case studies of three transnational groups it argues that in addition to lobbying governments activists operate within and across societies to effect widespread change They work through transnational social economic and cultural networks to alter corporate practices educate vast numbers of people pressure multilateral development banks and shift standards of good conduct

Wapner argues that because this activity takes place outside the formal arena of inter state politics environmental activists practice world civic politics they politicize global civil society **International Environmental Politics** L.

Elliot,1994-09-15 While environmental protection has been a focus of decision making under the Antarctic Treaty the rules adopted did not engender an effective protection regime This book examines the international politics of environmental protection in the Antarctic It analyses recent events including the demise of the Antarctic Minerals Convention and the negotiation of the Madrid Protocol which hold out the hope of much improved protection of the fragile Antarctic environment This study also considers what political lessons the Antarctic experience might have for broader concerns in international environmental relations **Advances in International Environmental Politics** M. Betsill,K. Hochstetler,D.

Stavis,2014-07-16 This book provides authoritative and up to date research for anyone interested in the study of international environmental politics It demonstrates how the field of international environmental politics has evolved and identifies key questions topics and approaches to guide future research Understanding Global Environmental Politics Matthew

Paterson,2001-12-14 This book develops a new critical approach to global environmental politics Instead of simply advocating the construction of new international institutions to respond to such challenges it argues that the construction of alternative social and political structures is necessary After an examination of policy making surrounding sea defenses which challenges the notion that political institutions are neutral regarding environmental change it examines the political dynamics of car culture and of the meat centered fast food industry
