Altman, Joachim F. Wohlwill, 2012-12-06 The theme of the present volume concerns people's response to the natural environment considered at scales varying from that of a house hold plant to that of vast wilderness areas Our decision to focus on this particular segment of the physical environment was prompted in part by the intrinsic interest in this subject on the part of a diverse group of social scientists and professionals and of laypersons for that matter and in part by the relative neglect of this topic in standard treatments of the environment behavior field It also serves to bring out once again the interdisciplinary nature of that field and we are pleased to have been able to include representatives from geography sociology social ecology and natural recreation among our contributors We believe that this volume will serve a useful purpose in helping to integrate the findings and concepts in this presently somewhat fragmented field scattered as they are over a

very diverse array of publications representing a similarly varied group of specialties. It is hoped that the result will be to stimulate future development of this area and to add a measure of increased coherence to it. Volume 7 of our series will be devoted to the theme of elderly people and the environment with M Powell Lawton joining us as guest co editor. The titles of the papers comprising Volume 7 are shown on page v. Irwin Altman, Joachim F Wohlwill ix Contents Introduction

**Virtual Landscapes** Umran Ali, 2013-09-19 The magical essence of natural landscapes since the dawn of man have been a source of intrigue, wonder and inspiration in art, philosophy and literature. With each new era in civilisation, new methods of creative expression have been used by artists, designers and writers to capture the rich natural landscapes and with the 21st century and the emergence of new interactive technologies, this innate desire is being expressed through the digital domain. From the giant mushroom forests of Morrowind, the Archipelago islands of Zelda Wind Waker to the tropical underground caves of Phantasy Star Online, Virtual Landscapes have enthralled, captured and engaged player imaginations for over 30 years. Virtual Landscapes is a three part series attempting to for the first time visually illustrate, share and critically reflect upon the unique virtual natural landscapes within Computer Video Games. Virtual Landscapes: The Embryonic Era visually illustrates the emergence and rapid evolution of the virtual natural landscapes in computer video games from 1980 to 1989. From the pixel based block form environments of Forbidden Forest, the strange lands of Golvenius, the eerie ant farm landscapes of Ghouls n Ghosts and finally to shifting interactive lands of Populous. Virtual Landscapes presents these virtual spaces for the first time in stunning, unseen, digitally enhanced, high resolution and panoramic forms.
