Technical Information Center,1976 Society, Power, and Land in Northeastern Zimbabwe, ca. 1560-1960 Admire Mseba,2024-11-12

A little over two decades ago Zimbabwe undertook its Fast Track Land Reform Programme Critics saw it as nothing more than an assault on human and property rights for political expedience by a ruling elite that was fast losing its power In contrast those sympathetic to the land reform program saw it as fundamental to the righting of colonialism s historical wrongs Yet rural displacements at the hands of state actors or of those closely connected to them continue As in the past the continuing land conflicts are mostly understood as the result of the actions of an authoritarian state that exploits its control of land for the political and economic benefit of those who inhabit it These explanations share one thing in common each understands the country s perpetual land questions in terms of the actions or inactions of the colonial or the postcolonial state This book refocuses attention on how regimes of power rooted in kinship gender generation

and status have individually and in combination informed access to land in precolonial northeastern Zimbabwe. It then examines how these regimes of power interacted with colonial policies to inform the African experience in colonial Zimbabwe. Further, the book places land and the ability to ensure its fecundity at the center of the making and moderation of precolonial political power and how this power was impacted by the imposition of colonial rule. Tracing the dynamics of land and power from precolonial times together with their entanglement with colonial policies is important for this relationship is almost always neglected by both scholars and policymakers drawn to the high drama of colonial and postcolonial politics of land. This oversight has real consequences on our understandings of landed inequalities and how they are addressed. When Zimbabwe's postcolonial state focused on colonially induced racialized land inequalities, its land reform efforts left older forms of landed inequalities based on gender, generation, and ideas of belonging intact. The book, which details these inequalities, reminds Zimbabweans and others that if the quest for equity espoused in postcolonial land reforms is to be meaningful, it must be attentive to both colonially induced inequalities and those enduring disparities that predated, were deepened by, and outlived colonial rule. At the same time, Zimbabweans who now live with a postcolonial state that is increasingly centralizing power over land may well learn from past societies' creative efforts to limit the authority of their leaders.

Power & Society  
Thomas R. Dye, 1996

Through six successful editions of *Power and Society*, Thomas R. Dye has encouraged readers to pursue their interests in the social sciences by illustrating how important these disciplines are to understanding many conditions of our lives. As Dye introduces readers to the central concepts of sociology, anthropology, economics, political science, history, and psychology, he links elements of these disciplines through a dynamic and unifying theme: the manifestation of power in society. With this idea in mind, readers gain a real sense of social scientists' interests as they explore power in the context of social problems such as racism, sexism, poverty, crime, violence, urban decay, and international and ideological conflict. Dye's presentation includes analyses of social science research studies and the contributions of masters of social thought such as Bertrand Russell, Karl Marx, Sigmund Freud, and Martin Luther King Jr. Evocative discussions are enhanced with case studies and cross-national perspectives to highlight critical ideas, including the power and society theme. The approach of learning to understand power as an integral part of our social world continues with great impact in this seventh edition. Among the new topics, readers will find how men and women view their relations today, evolutionary psychology, the mating game, the burdens of government debt, Native Americans, an historical overview, social scientists look at sex in America, treating mental illness, a brief history of the cold war, the long history of women's protests, sexual harassment, and the law, and should we limit the terms of Congress members.
