Environmental Data Bank United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation, 1970 , The Impact of Environmental Assessment , 1997-01-01 China is in the throes of two transitions from a command economy to a market based one and from a rural agricultural society to an urban industrial one So far both transitions have been spectacularly successful China is the fastest growing economy in the world

with per capita incomes more than quadrupling since 1978 achieving in two generations what took other countries centuries. Although swift growth and structural change have resolved many problems they also have created new challenges: employment insecurity, growing inequality, stubborn poverty, mounting environmental pressures, rising costs of food, self-sufficiency, and periods of macroeconomic instability stemming from incomplete reforms. Unmet, these challenges could undermine the sustainability of growth and China's promise could fade. China 2020, a seven volume set, examines China's recent history where it is today and the path it should follow during the first two decades of the 21st century. The volume in the set entitled Old Age Security Pension Reform in China highlights two severe difficulties with China's current pension system: the urgent and immediate problem of the pension burden placed on state owned enterprises and the longer term predicament arising from a rapidly aging population. State enterprises inherited heavy pension obligations from the central planning era. With the transition to a market economy employment in the state enterprise sector is declining while the number of pensioners is rising rapidly. The study recommends a unified pension system that includes both mandatory funded individual accounts and a social insurance scheme. It also endorses a sustainable contribution rate that attaches considerable importance to long term financial viability more than 60 years and examines the risks associated with low compliance rates and low interest rates.

*Improving Compliance with International Environmental Law* Jacob Werksman, James Cameron, Peter Roderick, 2014-01-14 Measures for regulating the behaviour of nation states in relation to the global environment have increasingly taken the form of international treaties and conventions. Many have argued that this has proved to be an ineffective way of halting unsustainable development for the provisions of these agreements are either too weak or are flouted regularly by the parties concerned. This volume seeks to address the crucial question of how compliance with these agreements could be encouraged effectively without damaging the fragile political consensus that is emerging on environmental issues. With extensive use of case studies *Improving Compliance* will make stimulating reading for all students and researchers working in this area as well as for anyone concerned about the effectiveness of international environmental measures.

*Introduction to Environmental Management* Mary K. Theodore, Louis Theodore, 2009-10-08 It is hard to imagine an area of study or a discipline in which a basic knowledge of the issues would not be beneficial since environmental concerns are very much in the public consciousness. Written at a level that is accessible to students in all disciplines *Introduction to Environmental Management* translates complex environmental issues into
