Making Sustainable Commitments ,2001-01-01 CD ROM includes full text of the Strategy as well as other relevant information *Environmental Management: Issues and Concerns in Developing Countries* Pradip K. Sikdar,2021-03-17 This book deals with issues and concerns for the human environment in the developing countries incorporating natural processes and systems pollution removal technology energy conservation environmental impact assessment process economics culture political structure and societal equity from a management point of view Solutions to the emerging problems of the environment need a paradigmatic shift in approach from a process based model to a socio political economic model Hence environmental management should involve equality and control over use of the finite natural resources and the balance

between Earth's biocapacity and humanity's ecological footprint. Changes such as green technologies, human population stabilization, and adoption of ecologically harmonious lifestyles are absolutely essential and will require redesigning of political institutions, policies, and revisiting forgotten skills of sustainable practices of environmental management. These challenges should centre on environment governance using the concepts of common property, equity, and security. This book is relevant for academics, professionals, administrators, and policy makers who are concerned with various aspects of environment management and governance.
