Freedom and Environment Michael Hannis,2015-10-05 Must freedom be sacrificed to achieve ecological sustainability or vice versa Can we be genuinely free and live in sustainable societies This book argues that we can if we recognise and celebrate our ecological embeddedness rather than seeking to transcend it But this does not mean freedom can simply be redefined to fit within ecological limits

Addressing current unsustainability will involve significant restrictions and hence will require political justification not just scientific evidence Drawing on material from perfectionist liberalism capabilities approaches human rights relational ethics and virtue theory Michael Hannis explores the relationship between freedom and sustainability considering how each contributes to human flourishing He argues that a substantive and ecologically literate conception of human flourishing can underpin both capability based environmental rights and a eudaimonist ecological virtue ethics With such a foundation in place public authorities can act both to facilitate ecological virtue and to remove structural incentives to ecological vice Freedom and Environment is a lucid addition to existing literature in environmental politics and virtue ethics and will be an excellent resource to those studying debates about freedom with debates about ecological sustainability Canadian Issues in Environmental Ethics Wesley Cragg, Allan Greenbaum, Alex Wellington, 1997-06-10 Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business labour and First Nations representatives What is the best path through the tangle of ethical issues surrounding the collapse of the east coast fishery What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice These are the sorts of issues in applied ethics that are tackled in this collection of essays the vast majority of which have been written especially for this volume It is the first Canadian collection of its kind The book is divided in to sections detailing with such topics as the environment and the economy ethical issues relating to non human animals issues of gender and issues relating to native peoples Most of the authors are philosophers though specialists in geography geology and the social sciences are also among the contributors Frequent reference is made to theoretical ethical concerns but the focus throughout is on applied ethics and a variety of case studies are included Examples include essays on animal rights and the case of native hunters surface mining in Northern Ontario the Quebec arctic and fishing communities in the Maritimes Comparisons are frequently drawn to policies and ethical questions arising in other countries most prominently the United States **Theological Foundations for Environmental Ethics** Jame Schaefer, 2009 This book asks whether religion can make a positive contribution to preventing further destruction of biological diversity and ecosystems and threats to our earth The author reconstructs the teachings of Augustine Thomas Aquinas and other classic thinkers to reflect our current scientific understanding of the world *Environmental Ethics*, 2003 **Environmental Ethics** David R. Keller, 2010-03-15 Through a series of multidisciplinary readings *Environmental Ethics The Big Questions* contextualizes environmental ethics within the history of Western intellectual tradition and traces the development of theory since the 1970s Includes an extended introduction that provides an historical and thematic introduction to the field of environmental ethics Features a selection of brief original essays on why to study environmental ethics by leaders in the field Contextualizes environmental ethics within the history of the Western intellectual tradition by exploring anthropocentric human centered and nonanthropocentric precedents Offers an interdisciplinary approach to the field by featuring seminal work from eminent philosophers biologists ecologists historians

Environmental Ethics in the Midwest Ian Smith, Matt Ferkany, 2022-12-01 The American Midwest is environmentally rich and complex home to some of the world's largest freshwater lakes and streams as well as cities prairies forests and farmlands Nevertheless the unique environmental opportunities and challenges the region presents have been left underappreciated and underexplored by environmental ethicists The close integration of the natural and built environments of the Midwest prompts interdisciplinary inquiry in a particularly pointed way To remedy the lack of scholarly attention to this area this volume attends to the way that the broad concerns of environmental ethics manifest in the region These eight original essays cover a wide range of topics including agrarian ethics and Stoicism the Dakota access pipeline and Indigenous women's activism philosophy of law and species classification environmental justice and the Flint water crisis hog farming and antimicrobial drug resistance science education standards and climate change education virtue ethics and ecological restoration environmental pragmatism and the Clean Water Act and more Each accessibly written chapter brings multidisciplinary complexity to bear on this complex region The authors include philosophers working in environmental ethics and other subfields of philosophy and together with scholars in fields such as environmental sociology American Indian studies and environmental studies they provide a fresh and necessary perspective on the American Midwest **I More than**

Others Eric R. Severson, 2009-12-14 Fyodor Dostoyevsky expressed a strange and surprising sentiment through one of the characters of *The Brothers Karamazov*. A dying young man named Markel declares, "Every one of us has sinned against all men and I more than others." He later says every one of us is answerable for everyone else and for everything. Markel's absurd claims have engendered many reflections on the nature of suffering and what it means to be responsible for someone else's suffering. The world has no shortage of pain and evil; what exactly is the relationship between suffering and responsibility? Markel's declarations press forward a question that drives this essay collection: how responsible should we consider ourselves for the suffering of the world? This volume is a collection of essays that struggle in various ways to understand and respond to several philosophical, theological, and practical problems. In each case, the authors grapple with issues surrounding suffering, immorality, evil, exploitation, and oppression. The contributors share a clear concern for the ways that philosophers and theologians should respond to the problems of suffering and evil. They also share a conviction that these remain intense and central problems for philosophy and theology. Evil is an obstacle for belief, for morality, for hospitality, and for hope. This book struggles to address the particular and strong sense of responsibility that falls on Christians when it comes to understanding and, more importantly, responding to the problems of suffering and evil in the world. Peter Dauvergne, 2009-09-02 Environmentalism involves hundreds of international environmental groups, thousands of national groups, and tens of thousands of local ones. It also includes hundreds of international agreements, hundreds of national environmental agencies, and countless environmental sections in other organizations, from those in multinational corporations to ones in regional and international organizations. Such environmental concepts as sustainable development, the precautionary principle, corporate social responsibility, and eco-labeling percolate from all of these sources. Every year, new ideas, refinements, policies, institutions, markets, and problems continue to enter into environmental debates and discourses, making it nearly impossible to keep abreast of the changes constantly taking place. *The A to Z of Environmentalism* is a paperback edition of the *Historical Dictionary of Environmentalism*. It strategically skips across issues, concepts, time, organizations, and cultures, not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive, wide-ranging, and global history of environmentalism. This goal is accomplished through a chronology, an introductory essay, and over 300 cross-referenced dictionary entries.

Rachel Carson Karen F. Stein, 2013-02-11 Karen F. Stein, University of Rhode Island, Kingston, USA. Rachel Carson is the twentieth century's most significant environmentalist. Her books about the sea blend science and poetry as they invite readers to share her celebration of the ocean's wonders. *Silent Spring*, her graphic and compelling exposé of the damage caused by the widespread aerial spraying of persistent organic pesticides such as DDT, opened our eyes to the interconnectedness of all living beings and the ecological systems we inhabit. Carson's work challenges our belief that science and technology can control the natural world; it asks us to recognize our place in the world around us and inspires us to treat the earth respectfully. She calls us to rekindle our sense of wonder at nature's

power and beauty and to tread lightly on the earth so that it will continue to sustain us and our descendants This book guides readers on a journey through Carson's life and work considers Carson's legacies and points to some of the continuing challenges to sustainability It provides a listing of resources for reading learning or teaching about the environment about nature writing and about Carson and the crucial issues she addressed

Fittingness and Environmental Ethics Michael

S. Northcott, Steven C. van den Heuvel, 2023-02-24 This volume focuses on fittingness as an ethical aesthetical idea and in particular examines how the concept is beneficial for environmental ethics It brings together an innovative set of contributions to argue that fittingness is a significant but under investigated facet of human ethical deliberation with both ethical and aesthetic dimensions In widely diverse matters from architecture to table manners individuals and communities make decisions based on fittingness also expressed in related terms such as appropriateness prudence temperance and mutuality In the realm of environmental ethics fittingness denotes a relation between conscious embodied persons and their habitats and is of relevance to judgements about how humans shape and take up with the non human environment and hence to ethical decisions about the development and use of the environment and non human creatures As such fittingness can be of great benefit in reframing human relationships to the non human stimulating a way of living in the world that is fitting to the preservation of its fruitfulness goodness beauty and truth
