has recently been consulting on a new European Maritime Policy designed to stimulate economic growth but at the same time protect the resource base Within the United Kingdom the 2010 Marine Act draws upon the experience of town and country planning and brings into being a new system of Marine Spatial Planning The authors show that a common feature of all these developments is an appreciation that more integrated forms of planning and management are required for our seas and that new arrangements must draw together understanding from natural science social science and many other perspectives Adopting such a trans disciplinary and holistic or ecosystems approach the book distils the expertise of these different disciplines and seeks to promote a broader understanding of the origins and practicalities of new approaches to marine planning and management

**Multi-Stakeholder Platforms for Integrated Water Management** Jeroen Warner, 2016-09-17 As they provide a negotiating space for a diversity of interests Multi Stakeholder Platforms MSPs are an increasingly popular mode of involving civil society in resource management decisions This book focuses on water management to take a positive if critical look at this phenomenon Illustrated by a wide geographical range of case studies from both developed and developing worlds it recognizes that MSPs will neither automatically break down divides nor bring actors to the table on an equal footing and argues that MSPs may in some cases do more harm than good The volume then examines how MSPs can make a difference and how they might successfully co opt the public private and civil society sectors The book highlights the particular difficulties of MSPs when dealing with integrated water management programmes explaining how MSPs are most successful at a less complex and more local level It finally questions whether MSPs are or can be sustainable and puts forward suggestions for improving their durability

Defending Illusions Allan K. Fitzsimmons, 1999 Fitzsimmons examines the science philosophy and law of ecosystems management and shows how efforts to make federal protection of ecosystems the

centerpiece of national environmental policy are driven by religious veneration of Mother Earth wrapped in a veil of weak science *Routledge Handbook of Ecosystem Services* Marion Potschin, Roy Haines-Young, Robert Fish, R. Kerry Turner, 2016-01-22 The idea that nature provides services to people is one of the most powerful concepts to have emerged over the last two decades It is shaping our understanding of the role that biodiverse ecosystems play in the environment and their benefits for humankind As a result there is a growing interest in operational and methodological issues surrounding ecosystem services amongst environmental managers and many institutions are now developing teaching programmes to equip the next generation with the skills needed to apply the concepts more effectively This handbook provides a comprehensive reference text on ecosystem services integrating natural and social science including economics Collectively the chapters written by the world's leading authorities demonstrate the importance of biodiversity for people policy and practice They also show how the value of ecosystems to society can be expressed in monetary and non monetary terms so that the environment can be better taken into account in decision making The significance of the ecosystem service paradigm is that it helps us redefine and better communicate the relationships between people and nature It is shown how these are essential to resolving challenges such as sustainable development and poverty reduction and the creation of a green economy in developing and developed world contexts *International Encyclopedia of Geography, 15 Volume Set* Noel Castree, Michael F. management strategies are vital to the sustainable development of cities in any country. It demonstrates that cities as drivers of sustainable development can be positive forces in support of social equality, cultural vitality, economic prosperity and environmental sustainability. It takes a primary focus on Ibadan, Nigeria. Most cities in sub-Saharan Africa have become badly degraded. Leaders and planners rarely fully grasp the meaning of the concept of sustainable development and fail to combine their bids to achieve economic development with urban environmental management strategies. The book describes how reformation and transformation are still possible in Ibadan and elsewhere and discusses the Sustainable Ibadan Project (SIP) as a methodology to turn Ibadan into a globally competitive and sustainable city. It will be of interest to urban planners worldwide and to researchers and students of the Global South.

**Transboundary Marine Spatial Planning and International Law** Daud Hassan, Tuomas Kuokkanen, Niko Soininen, 2015-07-16. Marine Spatial Planning (MSP) is an integrated and comprehensive approach to ocean governance and is used to establish a rational use of marine space and reconcile conflicting interests of its users. MSP allows both a high level of environmental protection and a wide range of human activities and emphasizes coordinated networks of national, regional and global institutions. This book focuses on the framework of international law behind MSP and especially on the transboundary aspects of MSP. It first sets out a general framework for transboundary MSP and then moves on to compare and assess differences and similarities between different regions. Specific detailed case studies include the EU with the focus on the Baltic Sea and North Sea, the Bay of Bengal and Great Barrier Reef in Australia. The authors examine the national and regional significance of MSP from an integrated and sustainable ocean governance point of view. They also show how transboundary MSP can create opportunities and positive initiatives for cross border cooperation and contribute to the effective protection of the regional marine environment.

**Connectivity Conservation Management** Graeme L. Worboys, Wendy L. Francis, Michael Lockwood, 2010-02-09. In an era of climate change, deforestation and massive habitat loss, we can no longer rely on parks and protected areas as isolated islands of wilderness to conserve and protect vital biodiversity. Increasing connections are being considered and made between protected areas and connectivity thinking has started to expand to the regional and even the continental scale to match the challenges of conserving biodiversity in the face of global environmental change. This groundbreaking book is the first guide to connectivity conservation management at local, regional and continental scales. Written by leading conservation and protected area management specialists under the auspices of the World Commission on Protected Areas of IUCN, the International Union for the Conservation of Nature, this guide brings together a decade and a half of practice and covers all aspects of connectivity planning and management. The book establishes a context for managing connectivity conservation and identifies large scale naturally interconnected areas as critical strategic and adaptive responses to climate change. The second section presents 25 rich and varied case studies from six of the eight biogeographic realms of Earth, including the Cape Floristic Region of Africa, the Maloti Drakensberg Mountains, the Australian Alps, the Atherton Corridor and the Sacred

Himalayan Landscape connectivity area featuring Mount Everest The remarkable 3200 kilometre long Yellowstone to Yukon corridor of Canada and the United States of America is described in detail The third section introduces a model for managing connectivity areas shaped by input from IUCN workshops held in 2006 and 2008 and additional research The final chapter identifies broad guidelines that need to be considered in undertaking connectivity conservation management prior to reinforcing the importance and urgency of this work This handbook is a must have for all professionals in protected area management conservation land management and resource management from the field through senior management and policy It is also an ideal reference for students and academics in geography protected area management and from across the environmental and natural sciences social sciences and landuse planning Published with Wilburforce Foundation WWF ICIMOD IUCN WCPA Australian Alps and The Nature Conservancy
