Uno, Peter Bartelmus, 2013-06-29 Policy failures in environment and development have been blamed on fragmented and eclectic policies and strategies The 1992 United Nations Conference on Environment and Development the Earth Summit in Rio de Janeiro called therefore for an integrated approach in planning and policy making to achieve long term sustainable growth and development The Conference also recognized in its action plan the Agenda 21 that integrated policies need to be supported by integrated information notably requiring the implementation of integrated environmental and economic accounting by its member States During the preparations for the Rio Summit scientists and practitioners of national accounting met in a Special Conference on Environmental Accounting organized by the International Association for Research in Income and Wealth IARIW in Baden Austria Their aim was to explore the need for and methodologies of adjusting national accounts for environmental reasons National accountants had faced mounting criticism that conventional accounting neglected new scarcities in natural capital as well as the social cost of environmental degradation The result of their deliberations was a draft manual later issued by the United Nations Statistics Division UNSD as a handbook of Integrated Environmental and Economic Accounting *Freer Trade, Sustainability, and the Primary Production Sector in the Southern EU: Unraveling the Evidence from Greece* J. Lekakis, 2013-03-09 Freer Trade Sustainability and the Primary Production Sector in the Southern

European Union is the first full scale academic work to capture the primary production sector policy aspects of trade liberalization and sustainability with a detailed focus on a typical southern EU country Greece Many efforts were pooled together in making this book In May 1996 the Department of Economics of the University of Crete organized an international conference on European Agriculture in the light of the recent WTO agreement and the need for sustainable development The conference was sponsored by the European Commission DG XII contract no ENV4 CT 96 6514 the Economic and Social Research Council ESRC contract no L320263049 the Hellenic Ministries for Agriculture and for the Environment and the University of Crete While summarizing the conclusions of the conference several speakers felt that the issues relating to the Southern EU would deserve separate coverage The conference directors judged that coverage of the issues for a single Southern EU country might have an advantage regarding detail over a cross country analysis which would certainly be welcome at a later stage Responding to this call the University of Crete generously reallocated all of its infrastructural costs covered by DG XII ESRC and the other sponsors above in the form of a new grant to host a follow up conference aiming to explore the issues for Greece

Sustainability Accounting and Reporting Stefan Schaltegger, Martin Bennett, Roger Burritt, 2006-09-14 This book provides an up to date overview of the most current developments in environmental and sustainability accounting and its links to reporting This fourth volume in the Environmental Management Accounting Network EMAN series is characterized by a broad geographical and a contextual range of topics Contributions from nearly all continents discuss new developments in environmental accounting and investigate topics and links between corporate environmental and sustainability issues as well as between strategy measurement and information management or between accounting and reporting For the last five years EMAN the environmental and sustainability accounting network has developed from a small dedicated group of European academics to a full fledged international network with strong links to corporate accounting and reporting practitioners international organizations and regulators The network provides a platform for the exchange of ideas and the sharing of experiences with environmental and sustainability accounting and reporting EMAN Global www.eman-global.net serves as an umbrella organisation of the regional sections in the Asia Pacific EMAN AP Europe EMAN EU Americas EMAN AM and Africa EMAN AF Based on the success of the annual conferences of the European and Asia Pacific sections the American and African groups are planning their first workshops The regional sections of EMAN have their own independent work agendas but are linked with each other through the steering committee of EMAN GLOBAL and by participating in other regional conferences fora and workshops

Accounting for Sustainability: Asia Pacific Perspectives Ki-Hoon Lee, Stefan Schaltegger, 2018-01-30 This book advances the understanding of corporate sustainability and challenges and roles of sustainability accounting in the Asia Pacific region The Asia Pacific region has shown fast economic growth for several decades which is expected to continue In this context Asia has become the production engine of the global economy At the same time scientific reports reveal that some planetary boundaries are crossed for example

relating to biodiversity and climate change Companies in the Asia Pacific region are therefore increasingly challenged to reduce their environmental impacts to document their social contribution and to contribute to sustainable development Key approaches to identify sustainability problems and challenges to support improvement processes and to back up sustainability contributions include accounting and reporting In contrast to the high relevance of accounting and reporting for corporate sustainability for the Asia Pacific region academic research has so far been dominated by Western researchers and pre dominantly dealt with Western and Japanese cases and approaches It is thus time to take account of Asian perspectives on accounting and reporting for sustainability in the Asia Pacific region Import Tariffs as Environmental Policy Instruments C. Kraus,2013-06-29 The theoretical claims for eco tariffs are rigorously analyzed within a unified framework formed of an international trade model enriched with both a domestic and a global externality During the course of the analysis the model is modified to analyze an array of contexts for which eco tariffs have been claimed to improve environmental quality or welfare The circumstances and conditions are characterised under which such tariffs can be shown to improve environmental quality and social welfare taking account of general equilibrium effects The theoretical results are applied in a policy analysis of eco tariffs and other trade instruments in the context of domestic and global environmental policy in order to assess the relevance of the eco tariffs that have been subjected to the theoretical analysis Finally the GATT WTO rules and regulations are presented since to date these have banned the use of eco tariffs The rules and regulations are mapped against the theoretical results to show which rules ought to be changed *Environmental Policy in an International Perspective* Laura Marsiliani,Michael Rauscher,Cees Withagen,2013-06-29 The volume contains papers presented at a conference On the International Dimension of Environmental Policy It deals with two issues international environmental agreements environmental policies in open economies Both issues are hot topics The debate on how to cope with global climate change has become increasingly heated and controversial and the relationship between trade and the environment is on the WTO agenda The book contains review papers in which leading scholars in the field summarise the state of the art and original research extending the state of the art Most of the papers are theoretically oriented but some papers also present empirical results using new econometric methods and new data The book contains material for those students of economics and researchers who wish to deepen their knowledge in the area of International Environmental Economics but also for those who endeavour to break new ground in this important field of research Environmental Economics and the International Economy Laura Marsiliani,Michael Rauscher,Cees Withagen,2006-04-11 This volume includes a selection of papers presented at the EURESCO Conference The International Dimension of Environmental Policy held in Kerkrade The Netherlands in October 2000 We would like to thank those who made this conference possible the European Science Foundation ESF which provided financial and organizational support the European Commission EURESCO Programme the Netherlands Organization for Scientific Research NWO which sponsored the conference under the research project

Boman, Runar Brännlund, Bengt Kriström, 2013-03-14 This book shows we believe the breadth and the complexity of issues that economists now tackle in their analysis of the connections between the ecosystem and the economic system The book offers contributions to such disparate issues as the value of preserving the wolf in Sweden and the proper distribution of permits in an effective global warming treaty Because these questions remain at the fore front of important resource allocation problems that need to be confronted it is only appropriate that they are represented in a book that intends to paint a picture albeit certainly incomplete of the vibrant and progressing state of environmental economics The contributions cover five areas of environmental economics policy instruments cost benefit analysis cost efficiency contingent valuation and experimental economics Each area is worthy of a book by itself but here we have made a point of focusing on problems that seem directly applicable to the pressing policy issues of today Thus the contributors address topics that are directly relevant to international and regional policy making as well as those that are linked to development of supporting information systems e g resource accounting In addition the contributions seek to provide high level applications of measurement techniques as well as pertinent critiques of these methods The next section provides a summary overview of the book

Accounting for Sustainability Anthony Hopwood, Jeffrey Unerman, 2010-09-23 If businesses and other organizations are to meet the many and complex challenges of sustainable development then they all both public and private need to embed sustainability considerations into their decision making and reporting However the translation of this aspiration into effective action is often inhibited by the lack of systems and procedures that take sustainability into account Accounting for Sustainability Practical Insights will help organizations to address these issues The book sets out a number of tools and approaches that have been developed and applied by leading organizations to embed sustainability into decision making extending beyond an organization's boundaries to take into account suppliers customers and other stakeholders measure and link sustainability and financial performance integrate sustainability into mainstream reporting both to management and external stakeholders In depth cases studies from Aviva BT the Environment Agency EDF Energy HSBC Novo Nordisk

Accounting for Social and Environmental Sustainability Delphine Gibassier,2025-01-16 For a company managing its social and environmental performance is no longer just a matter of

reducing its impact it must also be able to assess its contribution to resolving or aggravating social and environmental problems This book argues that the current work on accounting for sustainability has not yet given organisations a tool to integrate their performance within the planetary and social framework that conveys actual planetary and social budgets and that business organisations lack the possibility to go beyond incremental performance measurement It offers an in depth examination of multi capital accounting which has already been integrated within the Corporate Sustainability Reporting Directive and will follow on from sustainability reporting The LIFTS model Limits and Foundations Towards Sustainability Accounting Model used in this book combines various scientific and practical contributions to develop budgets for environmental impacts and social obligations on an organisational scale It proposes an accounting mechanism that enables an organization to manage each of its budgets and measure variances between forecast and actual It provides an introduction to the principles of this model and its conditions of application and describes its implementation in numerous companies While the main audience for the book is academics advanced students and researchers in accounting for sustainability business and management and economics it will also appeal to practitioners policymakers national standard setters think tanks and non governmental organizations NGOs The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Tools, Techniques And Approaches For Sustainability: Collected Writings In Environmental Assessment Policy And Management William R Sheate, 2009-09-30 This unique volume brings together key writings from experts drawn from the first ten years of the Journal of Environmental Assessment Policy and Management JEAPM launched in 1999 as a forum for encouraging better linkages between environmental assessment and management tools The book is structured around four themes that focus on the characteristics of tools that influence their ability to link together effectively The Nature of Tools The Nature of Decision Making and Institutional Context The Nature of Engagement and The Nature of Sustainability Edited and introduced by William Sheate founding and present

editor of JEAPM the book provides an analysis of what makes for successful linking of assessment and management tools supported by theoretical and practical examples Key authors include Roland Clift David Gadenne Robert Gibson Neils Faber Thomas Fischer David Lawrence M ns Nilsson Bronwyn Ridgway and Frank Vanclay *Environmental Management Accounting and Supply Chain Management* Roger L. Burritt, Stefan Schaltegger, Martin Bennett, Tuula Pohjola, Maria Csutora, 2011-05-19 This volume s focus on the environmental accounting of supply chain processes is of particular relevance because these processes supply data about the environmental impact of relationships between business organisations an area where the boundary separating internal and external accounting is ill defined Here contributors advocate what they term accounting for cooperation as a more environmentally positive complement to the paradigmatic practice of accounting for competition
