of this leading reference work provides a comprehensive discussion of the dynamic and important field of international law concerned with environmental protection. It is edited by globally recognised international environmental law scholars Professor Lavanya Rajamani and Professor Jacqueline Peel and features 67 chapters authored by 76 renowned experts in their fields. The Handbook discusses the key principles underpinning international environmental law, its relevant actors and tools and rules applying in its substantive sub-fields such as climate law, oceans law, wildlife and biodiversity law and hazardous substances regulation. It also explores the intersection of international environmental law with other areas of international law such as those concerned with trade, investment, disaster, migration, armed conflict, intellectual property, energy and human rights. The Handbook sets its discussion of international environmental law in the broader interdisciplinary context of developments in science, ethics, politics and economics which inform the way in which environmental rules are made, implemented and enforced. It provides an introduction to the foundations of international environmental law while also engaging with questions at the frontiers of research, teaching and practice in the field, including the role of Global South perspectives, the contribution made by Earth jurisprudence and the growing role of a diverse range of actors from indigenous peoples to business and industry. Like the first edition, this second edition of the Handbook is an essential reference text for all engaged with environmental issues at the international level and the applicable governance and regulatory structures.

**Environmental Law in Serbia** Vid Vukasović, Dragoljub Todić, 2024-06-17. Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides ready access to legislation and practice concerning the environment in Serbia. A general introduction covers geographic considerations, political, social and cultural aspects of environmental study, the sources and principles of environmental law, environmental legislation and the role of public authorities. The main body of the book deals first with laws aimed directly at protecting the environment from pollution in specific areas such as air, water, waste, soil, noise and radiation. Then a section on nature and conservation management covers protection of natural and cultural resources such as monuments, landscapes, parks and reserves, wildlife, agriculture, forests, fish, subsoil and minerals. Further treatment includes the application of zoning and land use planning rules on liability and administrative and judicial remedies to environmental issues. There is also an analysis of the impact of international and regional legislation and treaties on environmental regulation. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for environmental lawyers handling cases affecting Serbia. Academics and researchers as well as business investors and the various international organizations in the field will welcome this very useful guide and will appreciate its value in the study of comparative environmental law and policy.

**Shale Gas, the Environment and Energy Security** Ruven Fleming, 2017-09-29. This pioneering and in-depth study into the regulation of shale gas extraction examines how changes in the constitutional set-ups of EU Member States over the last 25 years have substantially altered the legal leverage of environmental protection and energy security as state objectives. As well as offering

the first formal assessment of the legality of fracking bans and moratoria Ruven Fleming further proposes a new methodology for the development of legally sound regulation of new energy technologies in the context of the energy transition
