Environmental Politics And Policy Making In Australia:

Environmental Politics and Policy Making in Australia Timothy Doyle, Aynsley John Kellow, 1995 Environmental politics and policy making in Australia *Environment and Politics* Timothy Doyle, Doug McEachern, 2007-08-31 Environment and Politics is a concise introduction to the study of environmental politics explaining the key concepts conflicts political systems and the practices of policy making The authors examine a diverse range of environmental problems and policy solutions within different nations and cultures This third edition expands the discussion of the differences in environmental politics between liberal democracies military dictatorships and one party states drawing on research conducted in Burma Thailand China and Iran Topics covered include the connections between green social movements and anti globalization movements the impact of globalization on NGOs the rise in local environmental governance and international bureaucratic regimes the global role of the World Bank and WTO the case of Kyoto the current phase of US unilateralism and its impact upon the global environment This text offers readers a greater understanding of international national and local environmental politics and looks at future developments for effective local and international environmental diplomacy and both global and region specific problem solving Security, the Environment and Emancipation Matt McDonald, 2012-01-30 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to

environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general

Alternatives for Environmental

Valuation Michael Getzner, Clive Spash, Sigrid Stagl, 2004-10-21 How can we value the environment this is the crucial issue that this book debates The critical analyses carried out within the book by such figures as Nick Hanley and Jonathan Aldred are vital to ensuring that future economic growth is not achieved at the expense of our environment **Global**

Environmental Governance, Civil Society and Wildlife Margi Prideaux, 2017-03-16 The world is entering a period of unprecedented environmental and political change By mid century climate change will cause dramatic ecosystem shifts Hundreds if not thousands of species will disappear from the earth including icons like polar bears gorillas Asiatic lions and bluefin tuna For many cultures species are place As our cultivated global community erodes international triage decisions about species and local ecosystems will commence and if we are not alert these decisions will be made on our collective behalf without local perspective or accountability Global Environmental Governance Civil Society and Wildlife illuminates a clear pathway for the environmental non governmental community to transition into a co governance role Many NGO diplomats have deeper experience and more technical knowledge about policy discussions than their government counterparts and are unburdened by sovereign constraints The book puts forward the perspectives of developing world civil society and the case that it must play a more significant role in future decision making Civil society from around the world must be welcomed by governments at the global environmental governance table if we are to hear birdsong after the storm

Environmental Citizenship in the Indian Ocean Region Benito Cao, 2021-06-14 The scale and severity of our environmental challenges are quickly becoming apparent The Indian Ocean region features many places particularly vulnerable to the effects of environmental degradation and climate change which will have profound social economic and cultural impacts The increasing preoccupation with the state of the environment is also having significant political effects including on the concept and content of citizenship The language of citizenship has permeated environmental discourse and conversely environmental issues are often articulated in the language of citizenship This book explores environmental citizenship and civil society responses to environmental challenges in the Indian Ocean region The articles provide practical insights to improve resilience and adaptation as well as conceptual insights into the nature of environmental citizenship discourse and practice across this vast region from Mauritius to Malaysia The volume showcases the complex field of environmental citizenship through a wide range of approaches and alongside closely related concepts such as environmental governance environmental education environmental justice and corporate social responsibility In essence the book provides a rich diverse and multidimensional picture of environmental citizenship in the Indian Ocean region The chapters in this book were originally published as a special issue in the Journal of the Indian Ocean Region **Contesting Global Environmental Knowledge, Norms and Governance** M. J. Peterson, 2019-01-08 Through theoretical discussions and case studies this volume explores how processes of contestation about knowledge norms and governance processes shape efforts to promote sustainability through international environmental governance The epistemic communities literature of the 1990s highlighted

the importance of expert consensus on scientific knowledge for problem definition and solution specification in international environmental agreements This book addresses a gap in this literature insufficient attention to the multiple forms of contestation that also inform international environmental governance These forms include within discipline contestation that helps forge expert consensus inter disciplinary contestation regarding the types of expert knowledge needed for effective response to environmental problems normative and practical arguments about the proper roles of experts and laypersons and contestation over how to combine globally developed norms and scientific knowledge with locally prevalent norms and traditional knowledge in ways ensuring effective implementation of environmental policies This collection advances understanding of the conditions under which contestation facilitates or hinders the development of effective global environmental governance The contributors examine how attempts to incorporate more than one stream of expert knowledge and to include lay knowledge alongside it have played out in efforts to create and maintain multilateral agreements relating to environmental concerns It will interest scholars and graduate students of political science global governance international environmental politics and global policy making Policy analysts should also find it useful

Historical Dictionary of the Green Movement Miranda Schreurs,Elim Papadakis,2007-08-14 Human beings have been concerned about nature and their place in it for millennia Disquiet about the consequences of human action on the natural environment date back to the ancient Greeks and Romans The efforts of the green movement can be traced back to the nineteenth century In this period individuals groups and organizations began campaigning for the conservation and preservation of natural areas and the protection of wildlife species Efforts to combat pollution also began It was not until the 1960s however that the green movement in its more modern incarnation emerged The green movements that arose at this

time maintained the concerns with conservation preservation and industrial pollution held by earlier generations but added to their agenda new issues including justice equality participatory democracy and sustainability The second edition of the Historical Dictionary of the Green Movement provides a detailed and comprehensive overview of green parties and movements green issues and green concepts This is done through a chronology an introductory essay a bibliography and hundreds of cross referenced dictionary entries on countries in the world where green parties or proto parties have formed green movement organizations major international environmental conferences and green concepts This useful reference will be greatly valued by students academics journalists and policymakers alike

Environmental Politics and Institutional Change Elim Papadakis, 1996-11-18 An examination of the responsiveness of Australian political institutions to environmental concerns

Contemporary Environmental Politics Piers Stephens, John Barry, Andrew Dobson, 2006-09-27 This new collection from the leading journal Environmental Politics presents an excellent overview of the key themes found in contemporary green political thought since the early 1990s Bringing together the journal's major work this new book charts a fascinating period in which environmental politics developed from a marginal position in society and the academy to its current place in the intellectual mainstream Subdivided into clear sections on political theory social movements political economy and policy questions and assisted by a contextualising introduction this volume focuses on a set of clear themes the character of green political theory relationships with other political traditions and theories origins and dynamics of contemporary environmental politics differences similarities and tensions between the North and South the relationship of environmentalism to market economics and ecological modernization environmental aspects of distributive justice at the local national and global levels the roles value and valuing of nature in green theory and institutional practice As a compilation this book is unique It delivers a snapshot of a variety of issues in the field and is therefore ideally suited to teaching purposes especially at postgraduate level In addition as each section is chronologically arranged an evolution of related ideas can be clearly seen and appreciated which builds an excellent understanding of the field of environmental politics

Energy, Governance and Security in Thailand and Myanmar (Burma) Adam Simpson, 2016-04-29 Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources Due to entrenched societal inequities and widespread authoritarian governance however the pursuit of national energy security through transnational energy projects has resulted in devastating impacts on the human and environmental security of local populations These effects are particularly evident in both Thailand and Myanmar Burma which located at the crossroads of Asia are increasingly engaged in the cross border energy trade Based on extensive fieldwork and theoretical analysis this ground breaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing in the absence of effective and democratic

governments in providing activist environmental governance for energy projects throughout the region. By comparing the nature of this activism under two very different political regimes it delivers crucial theoretical insights with both academic and policy implications for the sustainable and equitable development of the South's natural resources.

Community Gardening as Social Action Claire Nettle, 2016-05-23 There has been a resurgence of community gardening over the past decade with a wide range of actors seeking to get involved from health agencies aiming to increase fruit and vegetable consumption to radical social movements searching for symbols of non-capitalist ways of relating and occupying space. Community gardens have become a focal point for local activism in which people are working to contribute to food security, question the erosion of public space, conserve and improve urban environments, develop technologies of sustainable food production, foster community engagement and create neighbourhood solidarity. Drawing on in-depth case studies and social movement theory, Claire Nettle provides a new empirical and theoretical understanding of community gardening as a site of collective social action. This provides not only a more nuanced and complete understanding of community gardening but also highlights its potential challenges to notions of activism, community, democracy and culture.

Energy Security in Japan Vlado Vivoda, 2016-04-29 For a country already uneasy about energy security, the 2011 earthquake and tsunami, which caused a nuclear catastrophe at the Fukushima nuclear power plant, turned pre-existing Japanese concern about the availability of energy into outright anxiety. The subsequent closure of many nuclear reactors meant Japan needed to replace lost power quickly and so had no choice but to secure additional fossil fuels, undermining Japanese diversification policy and increasing global and regional competition for energy. This switch has been at a cost to the already weak Japanese economy, whilst the increase in fossil fuel consumption has caused a significant increase in greenhouse gas emissions. In this book, Vlado Vivoda examines the drastically changed environment following the disaster in order to analyse Japan's energy security challenges and evaluate Tokyo's energy policy options. Looking at how the disaster exacerbated Japan's existing energy security challenges, Vivoda considers the best policy options for Japan to enhance national energy security in the future, exploring the main impediments to change and how they might be overcome.

Environmental Technology Development in Liberal and Coordinated Market Economies S. Wong, 2006-11-27 This book explores the role of institutions in policy making and the state's role in promotion of technology, focusing on environmental technology development. Case studies include wind power diffusion in the UK and Germany, waste recycling in a variety of countries, and green automobile technology in the US and Japan.
