Iconoclasm David Freedberg,2021-06-29

With new surges of activity from religious political and military extremists the destruction of images has become increasingly relevant on a global scale A founder of the study of early modern and contemporary iconoclasm David Freedberg has addressed this topic for five decades His work has brought this subject to a central place in art history critical to the understanding not only of art but of all images in society This volume collects the most significant of Freedberg s texts on iconoclasm and censorship bringing five key works back into print alongside new assessments of contemporary iconoclasm in places ranging from the Near and Middle East to the United States as well as a fresh survey of the entire subject The writings in this compact volume explore the dynamics and history of iconoclasm from the furious battles over images in the Reformation to government repression in modern South Africa the American culture wars of the early 1990s and today s cancel culture Freedberg combines fresh thinking with deep expertise to address the renewed significance of iconoclasm its ideologies and its impact This volume also provides a supplement to Freedberg s essay on idolatry and iconoclasm from his pathbreaking book *The Power of Images* Freedberg s writings are of foundational importance to this discussion and this volume will be a welcome resource for historians museum professionals international law specialists preservationists and students

The

Ashburnham Pentateuch and Its Contexts Jennifer Awes Freeman,2022 A fresh interpretation of an enigmatic illumination and its contexts The Ashburnham Pentateuch is an early medieval manuscript of uncertain provenance which has puzzled and intrigued scholars since the nineteenth century Its first image which depicts the Genesis creation narrative is itself a site of mystery originally it presented the Trinity as three men in various vignettes but in the early ninth century by which time the manuscript had come to the monastery at Tours most of the figures were obscured by paint leaving behind a single creator In this sense the manuscript serves as a kind of hinge between the late antique and early medieval periods Why was the Ashburnham Pentateuch s anthropomorphic image of the Trinity acceptable in the sixth century but not in the ninth This study examines the theological political and iconographic contexts of the production and later modification of the Ashburnham Pentateuch s creation image The discussion focuses on materiality the oft contested relationship between image and word and iconoclastic acts as embodied responses Ultimately this book argues that the Carolingian era reception and modification of the creation image is consistent with contemporaneous iconography a concern for maintaining the absolute unity of the Trinity as well as Carolingian image theory following the Byzantine iconoclastic controversy Tracing the changes in Trinitarian theology and theories of the image offers us a better understanding of the mutual influences between art theology and politics during Late Antiquity and the early Middle Ages

Monumental Fury Matthew Fraser,2022-11-15

Recent years in America have seen Confederate monuments toppled statues of colonizers vandalized and public icons

commemorating figures from a history of exploitation demolished Some were alarmed by the destruction claiming that pulling down public statues is a negation of an entire cultural heritage For others statue smashing is justified vandalism against a legacy of injustice Monumental Fury confronts the long neglected questions of our relationship with statues icons and monuments in public spaces providing a rich historical perspective on iconoclastic violence Organized according to specific themes that provide insights into the erection and destruction of statues from religion war and revolution to colonialism ideology art and social justice author Matthew Fraser examines the implications of our monuments from the Buddhas of Bamiyan to those of Napoleon Bonaparte Abraham Lincoln Robert E Lee Vladimir Lenin and many more Above all the book endeavors to frame moments of statue toppling throughout history so we can better understand the eruptions of iconoclastic violence that we are witnessing today Statues are erected as expressions of power and the impulse to destroy them is motivated by a desire to defy reject and eradicate their authority However the symbolic power of statues can stubbornly persist even after their destruction This enduring paradox between destruction and resurrection is at the heart of this book Fraser concludes with reflections that propose new ways of thinking about our relationship with statues and monuments and more practically about how we can creatively integrate their legacy into our collective memory in a way that inclusively enriches shared historical experience

A New History of Western Art Koenraad Jonckheere, 2022-10-15 A radical re examination of 2500 years of European art deconstructing and demystifying its long history from ancient to present How has art evolved from the pursuit of the ideal human form to a black square on a white canvas Why is a banana duct taped to a wall worth more on the art market than a beautiful seventeenth century landscape By taking art for what it actually is a piece of stone or wood a sheet of paper with some lines drawn on it a painted canvas this lively and accessible account shows how seemingly meaningless objects can be transformed into celebrated works of art Breaking with conventional notions of artistic genius Koenraad Jonckheere explores how stories and emotions give meaning to objects and why changing historical circumstances result in such shifting opinions over time Tracing its story from ancient times to present *A New History of Western Art* reframes the evolution of European art and radically reshapes our understanding of art history Published in association with Hannibal Books
