Ideas and opinions, by albert einstein Albert Einstein, Carl (editor) Seelig, 1954 *Ideas and Opinions by Albert Einstein. Based on Mein Weltbild, Edited by Carl Seelig, and Other Sources. New Translations and Revisions by Sonja Bargmann. (Second Printing.).* Albert Einstein, Sonja Bargmann, Carl SEELIG, 1956 **FTC News Summary**, 1967 [A Guided Science](#) Jaan Valsiner, 2013-09-05 That sciences are guided by explicit and implicit ties to their surrounding social world is not new Jaan Valsiner fills in the wide background of scholarship on the history of science the recent focus on social studies of sciences and the cultural and cognitive analyses of knowledge making The theoretical scheme that he uses to explain the phenomena of social guidance of science comes from his thinking about processes of development in general his theory of bounded indeterminacy and on the relations of human beings with their culturally organized environments Valsiner examines reasons for the slow and nonlinear progress of ideas in psychology as a science at the border of natural and social sciences Why is that intellectual progress occurs in different countries at different times Most responses are self serving blinders for presenting science as a given rather than understanding it as a deeply human experience For Valsiner scientific knowledge is cultural at its core Major changes have occurred in contemporary sciences collective authorship fragmentation of knowledge into small quickly published and equally quickly retractable journal articles and the counting of numbers of such articles by institutions as if that is a measure of scientific productivity Scientists are inherently ambivalent about the benefit of these changes for the actual development of knowledge There is a gradual takeover of the domain of scientific knowledge creation by other social institutions with vested interests in defending and promoting knowledge that serves their social interests Sciences are entering into a new form of social servitude

Human Rights and the Digital Divide Anne Peacock, 2019-06-03 The Internet's importance for freedom of expression and other rights comes in part from the ability it bestows on users to create and share information rather than just receive it Within the context of existing freedom of expression guarantees this book critically evaluates the goal of bridging the digital divide the gap between those who have access to the Internet and those who do not Central to this analysis is the examination of two questions first is there a right to access the Internet and if so what does that right look like and how far does it extend Second if there is a right to access the Internet is there a legal obligation on States to overcome the digital divide Through examination of this debate's history analysis of case law in the European Court of Human Rights and Inter American Court of Human Rights and a case study of one digital inclusion programme in Jalisco Mexico this book concludes that there is indeed currently a legal right to Internet access but one that it is very limited in scope The 2012 Joint Declaration on Freedom of Expression and the Internet is aspirational in nature rather than a representative summary of current protections afforded by the international human rights legal framework This book establishes a critical foundation from which some of these aspirations could be advanced in the future The digital divide is not just a human rights challenge nor will it be overcome through human rights law alone Nevertheless human rights law could and should do more than it has thus far
