Krueger,2002 This new collection provides a much needed retrospective view of the key academic work published in this area The papers here highlight the importance of studying entrepreneurship from a wide range of perspectives including research that derives from economics history sociology psychology and from different business disciplinary bases such as marketing finance and strategy The overall focus in this set is on entrepreneurial activity rather than specifically small or family owned business and favours research articles over those that deal purely with practice

The Ethics of Neoliberalism Peter Bloom,2017-06-26 The 21st century is the age of neo liberalism a time when the free market is spreading to all areas of economic political and social life Yet how is this changing our individual and collective ethics Is capitalism also becoming our new morality From the growing popular demand for corporate social responsibility to personal desire for work life balance it would appear that non market ideals are not only surviving but also thriving Why then does it seem that capitalism remains as strong as ever The Ethics of Neoliberalism boldly proposes that neoliberalism strategically co opts traditional ethics to ideologically and structurally strengthen capitalism It produces the ethical capitalist subject who is personally responsible for making their society workplace and even their lives more ethical in the face of an immoral but seemingly permanent free market Rather than altering our morality neoliberalism individualizes ethics making

us personally responsible for dealing with and resolving its moral failings. In doing so, individuals end up perpetuating the very market system that they morally oppose and feel powerless to ultimately change. This analysis reveals the complex and paradoxical way capitalism is currently shaping us as ethical subjects. People are increasingly asked to ethically save capitalism both collectively and personally. This can range from the moral responsibility to politically accept austerity following the financial crisis to the willingness of employees to sacrifice their time and energy to make their neoliberal organizations more humane to the efforts by individuals to contribute to their family and communities despite the pressures of a frenetic global business environment. Neoliberalism thus uses our ethics against us, relying on our good nature and sense of personal responsibility to reduce its human cost in practice. Ironically

Informal Sector Innovations Mammo Muchie, Saradindu Bhaduri, Angathevar Baskaran, Fayaz Sheikh, 2017-10-02 It is well documented that the space of informal economic activity is rising across the globe This rise has been particularly significant in the least developed and developing countries especially after the onset of neo liberal policies and withdrawal of welfare state There has also been a shift in academic thinking on informal sector with attempts being made to understand the contribution of informal sector in generating employment and economic growth rather than focusing solely on exploitative labour conditions in these economic activities Indeed with the retreat of welfare state and the introduction of contract labour in the formal sector many issues related to occupational hazards and improper labour conditions do not remain unique to the informal sectors of the economy particularly in less developed countries This volume addresses a specific concern the issue of knowledge generation and innovative activities which lies at the core of sustained competitive advantage of these activities The chapters in this book were originally published in the African Journal of Science Technology Innovation and Development
