Environment And Philosophy:

Environment and Philosophy Emily Brady, with Jane Howarth, Vernon Pratt, 2005-07-26 Environment and Philosophy provides an accessible introduction to the radical challenges that environmentalism poses to concepts that have become almost second nature in the modern world. These include the ideas of science and objectivity, the conventional placement of the human being within the environment, the individualism of conventional Modern thought. Written in an accessible way for those without a background in philosophy, this text examines ways of thinking about ourselves, nature, and our relationship with nature. It offers an introduction to the phenomenological perspective on environmental issues and also to the questions of what natural beauty is. **Merleau-Ponty and Environmental Philosophy** Suzanne L. Cataldi, William S.

Hamrick, 2007-04-24 This richly diverse collection looks at the contemporary relevance of the philosophy of Maurice Merleau-Ponty to environmental issues and builds a coherent philosophical ecology based on his thought. The contributors describe and analyze relations within the natural world by focusing on the centrality of relations in Merleau-Ponty's work, his concept of the bond between humanity and nature, and his novel philosophies of perception, embodiment, and wild Being. Eco-phenomenologies of living places such as Central Park in New York City, Midwestern farmlands, and communal household dwellings of Pacific Northwest Coast people are closely examined. The contributors also explore Merleau-Ponty's philosophy for environmental ethics and develop notions such as vital values, somatic empathy, and interspecies sociality.

Environmental Philosophy Christopher Belshaw, 2001-10-01 Beginning with an overview of current concerns, Belshaw locates our attitudes toward the environment within their cultural and historical milieu. He then examines the various positions in detail, ranging from the moderate view that we ought to consider not only ourselves but also other animals to the seemingly more extravagant contention that non-sentient life, rocks, deserts, etc., indeed all of the processes of nature, should be considered intrinsically valuable. In later chapters, Belshaw explores the importance of an aesthetic response to the environment, opening the way for a human-centred position that is both more generous and more flexible than those often advanced elsewhere. In contrast to many of its competitors, Environmental Philosophy challenges accepted dichotomies: human/nature, instrumental/intrinsic, green/non-green, etc., and advocates conciliation rather than confrontation. Although the arguments are rigorous, the writing is clear and non-technical, making Environmental Philosophy an excellent survey for those engaging with these issues for the first time as well as offering much to challenge the more advanced student. **Thinking Like a Mall** Steven Vogel, 2015-05 A provocative argument that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the built environment. Environmentalism in theory and practice is concerned with protecting nature. But if we have now reached the end of nature, as Bill McKibben and other environmental thinkers have declared, what is there left to protect? In *Thinking like a Mall*, Steven Vogel argues that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the environment that is the world that

actually surrounds us which is always a built world the only one that we inhabit We need to think not so much like a mountain as Aldo Leopold urged as like a mall Shopping malls too are part of the environment and deserve as much serious consideration from environmental thinkers as do mountains Vogel argues provocatively that environmental philosophy in its ethics should no longer draw a distinction between the natural and the artificial and in its politics should abandon the idea that something beyond human practices such as nature can serve as a standard determining what those practices ought to be The appeal to nature distinct from the built environment he contends may be not merely unhelpful to environmental thinking but in itself harmful to that thinking The question for environmental philosophy is not how can we save nature but rather what environment should we inhabit and what practices should we engage in to help build it

Environmental Philosophy Simon P. James, 2015-06-03 Climate change habitat loss rising extinction rates such problems call for more than just new policies and practices They raise fundamental questions about the world and our place in it What for instance is the natural world Do we humans belong to it Which parts of it are we morally obliged to protect Drawing on an exceptionally wide range of sources from virtue ethics to Buddhism leading environmental philosopher Simon P James sets out to answer these vitally important questions The book begins with a discussion of animal minds before moving on to explore our moral relations with non human organisms ecosystems and the earth as a whole James then considers environmental aesthetics humanity s place in the natural world and the question of what it means to be wild In the concluding chapter he applies his findings to the topic of global climate change building a strong moral case for urgent action This accessible entertainingly written book will be essential reading for students of the environment across the humanities and social sciences It will moreover be an ideal guide for anyone keen to deepen their understanding of environmental issues
