of the time but every experience feeds into the growth process Self leadership is our superpower and often the determinant to the level of success or failure we experience the decider of optimal or mediocre living We decide how far we want to go This book reveals the common allies and enemies to successful self leadership and provides practical insights for leveraging the benefits as well as highlighting areas for personal development The more you raise your level of awareness regarding these areas and consistently develop and express them the more effective your self leadership will be empowering you to experience more fulfilment and lead others more successfully Everything of value has a cost associated to it If self leadership was easy everyone would be a great leader but the pay off for consistently investing in yourself and living with intention is HUGELY SATISFYING If you focus the right level of time and energy in developing great self leadership consistently it will maximise EVERY part of your life minimise self sabotage AND bring exponential positive returns towards those you lead We cannot experience life to the full without taking responsibility for the power we have to think create and lead Wherever we find ourselves we can ALL by giving attention to the right inputs live and lead better This book is one of those inputs YOU Lead You How will you use the power you have Our success is determined by how well we lead ourselves The Human Behavior Valentin Matcas, 2018-04-20 Your behavior consists of everything that you do in life knowingly and unknowingly Even more your behavior represents and is a consequence of everything that you need mean and think throughout life Yet it was so easy to manage your life if your behavior was so easy to define because you always live your life alongside the rest of society and always influenced by the rest of the world in every manner You are a social value highly useful to others and this is how others end up controlling you and your behavior according to their own needs and reasoning with or without your consent And this is how you behave and live your life in society you influence and you are influenced by others continuously according to your needs beliefs duties capabilities orders and agendas And you do so successively continuously and many times simultaneously throughout life and throughout society Even more your social behavior does not define you entirely since your private hidden behavior is distinct from your open social one You work hard to keep this shadow behavior unnoticed and at bay but now when you consider it you realize that it defines you more than everything else This has always been the case it can make life fun and exciting at times yet it can become dangerous and expensive Because it has become a continuously hidden need that you are forced to fulfill consistently and many times you would rather avoid this private behavior if you only knew how What happens is that the entire world lives in this major dissociation because everybody seeks privacy and intimacy in life for various reasons as everybody lives in the hiding most of the time overwhelmed guilty and confused And now you seek to find out why you behave in this manner you want to know what you can do in order to change and improve your behavior you seek to know how to educate your children towards adopting a good behavior in life and in the world and this is why you read this book Throughout this book you learn everything about the human behavior everything necessary to help you control yourself understand others and develop to higher levels along with everything necessary for

you to help and educate others to behave well while developing consistently to higher levels      *The New Science of Getting Rich* Wallace D.
