Environmental Federalism Per G. Fredriksson, Muthukumara Mani, Jim R. Wollscheid, 2006

European Climate Diplomacy in the USA and China Katrin Buchmann, 2022-08-22 Buchmann analyses the work of UK German Danish and Swedish embassies in the USA and China on climate change in the late 2000s and early 2010s She relates which coalitions and narratives embassies sought to develop to convince China and the United States that a more progressive climate policy was possible to achieve gains supporting an agreement under the UNFCCC This book shows that a key interpretation of climate diplomacy was selling trade Europe selling technology solutions to solve climate change In this narrative Europe has already done what needs to be done and outsourcing of production to China e g is ignored In the USA embassies entered coalitions with states faith groups and the military arguing that a more progressive climate policy was mandated by either God or security concerns State politicians including Democrats often actually didn t implement any climate policies Any gains were reversed through climate denial lobbying funded by corporations Embassies did not address this

The A to Z of Environmentalism Peter Dauvergne, 2009-09-02 Environmentalism involves hundreds of international environmental groups thousands of national groups and tens of thousands of local ones It also includes hundreds of international agreements hundreds of national environmental agencies and countless environmental sections in other organizations from those in multinational corporations to ones in regional and international organizations Such environmental concepts as sustainable development the precautionary principle corporate social responsibility and eco labeling percolate from all of these sources Every year new ideas refinements policies institutions markets and problems continue to enter into environmental debates and discourses making it nearly impossible to keep abreast of the changes constantly taking place The A to Z of Environmentalism is a paperback edition of the Historical Dictionary of Environmentalism It strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This goal is accomplished through a chronology an introductory essay and over 300 cross referenced dictionary entries

Fields, 2001 **Choice**, 2003 The Oxford Guide to Library Research Thomas Mann, 2015 The information world has undergone drastic changes since the publication of the 3rd edition of *The Oxford Guide to Library Research* in 2005 and Thomas Mann a veteran reference librarian at the Library of Congress has extensively revised his text to reflect those changes This book will answer two basic questions First what is the extent of the significant research resources you will miss if you confine your research entirely or even primarily to sources available on the open Internet Second if you are trying to get a reasonably good overview of the literature on a particular topic rather than just something quickly on it what are the several alternative methods of subject searching which are not available on the Web that are usually much more efficient for that purpose than typing keywords into a blank search box with the results displayed by relevance ranking computer algorithms This book shows researchers how to do comprehensive research on any topic It explains the variety of search mechanisms available so that the researcher can have the reasonable confidence that s/he has not overlooked something important This includes not just lists of resources but discussions of the ways to search within them how to find the best search terms how to combine the terms and how to make the databases and other sources show relevant material even when you don't know how to specify the best search terms in advance The book's overall structuring by nine methods of searching that are applicable in any subject area rather than by subjects or by types of literature is unique among guides to research Also unique is the range and variety of concrete examples of what to do and of what not to do The book is not about the Internet it is about the best alternatives to the Internet the sources that are not on the open Web to begin with that can be found only through research libraries and that are more than ever necessary for any kind of substantive scholarly research More than any other research guide available this book directly addresses and provides solutions to the serious problems outlined in recent studies documenting the profound lack of research skills possessed by today's digital natives

Environmental Policy Change in Emerging Market Democracies Jale Tosun, 2013-01-01 This book examines environmental policy change in twenty eight Central and Eastern European and Latin American countries against a background of significant political and economic transformation over the past two decades Through cross regional comparison and a multi methods approach Jale Tosun investigates changes in the regulation of air soil and water pollution genetically modified corn and the sustainable management of forests Tosun also looks at the relationship between system transformation and the creation of environmental procuracies in both parts of the world *Environmental Policy Change in Emerging Market Democracies* demonstrates that although political and economic transformations have positively affected environmental policy in both regions the extent of policy change varies considerably across Central and Eastern Europe and Latin America At the same time as Tosun argues economic integration has acted as a major driver of a stronger governmental enforcement commitment as expressed by the creation of environmental procuracies **American**
