Amchitka and the Bomb Dean W. Kohlhoff,2011-07-01 More than a quarter century has now passed since the United States set off the last of three underground atomic blasts in the remote wilderness of the Aleutian islands off the coast of Alaska Cannikin as this third test was called exploded as planned on November 6 1971 on Amchitka Island The first test Project Long Shot 1965 was designed to determine whether the blast s shock waves could be distinguished from earthquakes Milrow the second 1969 and Cannikin were part of the U S anti ballistic missile development program Amchitka and the Bomb looks at how these nuclear explosions were planned and conducted by the U S Department of Defense and the Atomic Energy Commission in spite of vehement protests by political and civilian groups In addition to demonstrating the feasibility of a new generation of weapons the government defended the nuclear tests on Amchitka as providing U S presidents and especially Richard Nixon with negotiating power to force the Soviet Union to accept a satisfactory arms limitation agreement Dean Kohlhoff traces the enormous environmental impact of the blasts on the Aleutian wildlife refuge system He also examines the social and political fallout from the tests on Aleut civilian populations As the tests inexorably went forward an emerging environmental movement was galvanized to action Passionate but ultimately futile attempts to stop the blasts were made by such nascent groups as Greenpeace Friends of the Earth and the Wilderness Society Although Alaskan Aleuts sued to halt Cannikin and environmental groups joined them for an injunction against the test a split U S Supreme Court eventually approved the 5 1 megaton explosion Amchitka and the Bomb tells a harrowing story of the struggle of private citizens and small environmental groups to counter the weight of the federal government It adds immeasurably to our understanding of the nuclear history of the United States Its concise interweaving of the military scientific economic and social implications surrounding the nuclear explosions on Amchitka Island exposes the unpleasant consequences of allowing treasured national values to become victim to political necessity Kohlhoff has contributed a vital chapter to Alaska s history and to the history of the American environmental movement *The Environment of Amchitka Island, Alaska* ,1970

Kangas,2022-12-26 This book presents a history of radioecology from World War II through to the critical years of the Cold War finishing with a discussion of recent developments and future implications for the field Drawing

on a vast array of primary sources the book reviews synthesizes and discusses the implications of the ecological research supported by the Atomic Energy Commission AEC of the United States government from World War II to the early 1970s This was a critical period in the history of ecology characterized by a transition from the older largely descriptive studies of communities of plants and animals to the modern form of the science involving functional studies of energy flow and mineral cycling in ecosystems This transition was in large part due to the development of radioecology which was a by product of the Cold War and the need to understand and predict the consequences of a nuclear war that was planned but has never occurred The book draws on important case studies such as the Pacific Proving Grounds the Nevada Test Site El Verde in Puerto Rico the Brookhaven National Laboratory and recent events such as the nuclear disasters at Chernobyl and Fukushima By revisiting studies and archived information from the Cold War era this book offers lessons from the history of radioecology to provide background and perspective for understanding possible present day impacts from issues of radiation risks associated with nuclear power generation and waste disposal Post Cold War developments in radioecology will be also reviewed and contrasted with the AEC supported ecology research for further perspectives This book will be of great interest to students and scholars of radioecology environmental pollution environmental technology bioscience and environmental history
