## **Environmental Effects On Cognitive Abilities:**

**Environmental Effects on Cognitive Abilities** Robert J. Sternberg, Elena L. Grigorenko, 2014-04-08 This bk explores how the environment influences the development and maintenance of cognitive abilities. It offers both a response to those who focus primarily on genes as determiners of developmental outcomes and an elaboration of just what it is about contexts that makes for their effects on these outcomes. **Family Environment and Intellectual Functioning**

Elena L. Grigorenko, Robert J. Sternberg, 2001-04-01 What is the impact of the family environment on us particularly with regard to our intellectual functioning? Does the role of early family environment wear off as some researchers have suggested or does it maintain or possibly even become more important as we grow older? This book examines the interrelationship between family environment and intellectual functioning in a lifespan perspective. Covering a wide range of topics, it provides the most comprehensive and up-to-date examination of life-span family influences on various aspects of intellectual function. For cognitive development, lifespan, and educational psychologists and scholars studying the family and its influences, this volume will help students learn about family effects, researchers update themselves in this active area of investigation, therapists understand problems in intellectual functioning in their clients, and in treating these clients successfully, and educators gain a better grasp on how the students they teach are products not only of their genes and environments in general but of their family environments in particular. **Behavior Genetics of Cognition Across the Lifespan**

Deborah Finkel, Chandra A. Reynolds, 2013-07-09 Along with psychopathology, cognition has been one of the primary phenotypic focal points of the field of behavior genetics since its inception. Francis Galton's 1874 examination of eminent families in Britain was among the earliest attempts to investigate whether cognitive achievements run in families. This volume presents current methodologies for understanding cognitive abilities that move beyond the outdated nature vs. nurture paradigm. Recent advances in both collection and statistical modeling of twin data, particularly longitudinal twin data, make this an especially advantageous moment to produce a work that presents a collection of the groundbreaking research on cognitive abilities across the lifespan. This volume presents an overview of the current state of quantitative and molecular genetic investigations into the many facets of cognitive performance and functioning across the lifespan. **Human Intelligence**

**Handbook of Educational Psychology** Lyn Corno, Eric M. Anderman, 2015-07-06 The third edition of the Handbook of Educational Psychology is sponsored by Division 15 of the American Psychological Association. In this volume, thirty chapters address new developments in theory and research methods while honoring the legacy of the field's past. A diverse group of recognized scholars within and outside the U.S. provide integrative reviews and critical syntheses of developments in the substantive areas of psychological inquiry in education: functional processes for learning, learner readiness and development, building knowledge and subject matter expertise, and the learning and task environment. New chapters in this edition cover topics such as learning sciences research, latent variable models, data analytics, neuropsychology, relations between emotion, motivation, and volition, EMOVO, scientific literacy, sociocultural perspectives on learning, dialogic instruction, and networked learning. Expanded treatment has been given to relevant individual differences, underlying processes, and new research on subject matter acquisition. The Handbook of Educational Psychology, Third Edition, provides an indispensable reference volume for scholars in education and the learning sciences, broadly conceived, as well as for teacher educators, practicing teachers, policy makers, and the academic libraries serving these audiences. **Advances in the Psychology of Human Intelligence** Robert J. Sternberg, 2014-02-25 First published in 1987. Since the 1960s, we have witnessed a remarkable resurgence of interest in the psychology of human intelligence. In the late 1960s, research in the field of intelligence seemed to have gone into at least partial remission. But today, a large number of investigators are pursuing active research programs concerning human intelligence. *Advances in the Psychology of Human Intelligence*, of which this is the fourth volume, contains chapters by leaders in the field that document the progress being made toward understanding human intelligence.

**Discourses of Globalisation and Education Reforms** Joseph Zajda, 2022-05-17 This book focuses on discourses of effective learning environments globally for reducing discrimination in schools. It offers innovative ideas concerning the future directions that education and policy reforms could take in order to promote equality, social justice, and access to quality of education for all. The chapters offer a timely analysis of current issues affecting schooling and strategies for creating effective learning environments globally for overcoming discriminations in schools. It is argued that one of the most significant variables in creating effective learning environments for reducing classroom discrimination is the student's cultural identity, the self-concept, and self-esteem. The next variables influencing students' learning environment are motivational strategies, self-regulated learning, and students' active engagement in constructivist learning. This book contributes in a very scholarly way to a more holistic understanding of the nexus between globalisation, comparative education research, and education reforms for reducing discrimination. It will be beneficial for a broad spectrum of users, including policy makers, academics, graduate students, and education policy.

*Separate Social Worlds of Siblings* E. Mavis Hetherington, David Reiss, Robert Plomin, 2013-05-13 One of the most notable findings in contemporary behavior genetics is that children growing up in the same family are not very comparable Findings suggest that in order to understand individual differences between siblings it is necessary to examine not only the shared experiences but also the differences in experiences of children growing up in the same family In the past decade a group of investigators has begun to examine the contributions of genetics and both shared and nonshared environment to development As with many new research endeavors this has proven to be a difficult task with much controversy and disagreement not only about the most appropriate models and methods of analysis to be used but also about the interpretation of findings Written by some of the foremost scholars working in the area on nonshared environment the papers in this book present their perspectives concerns strategies and research findings dealing with the impact of nonshared environment on individual differences in the development of siblings This volume will have heuristic value in stimulating researchers to think in new ways about the interactions between heredity shared and nonshared environment and the challenges in identifying their contributions to sibling differences These papers should raise new questions about how to examine the contributions of genetic and environmental factors to development with consideration given to the findings of this study of sibling differences and nonshared environment Further these papers may encourage a growing trend to integrate genetic and environmental perspectives in studies of development      **Advances in Agricultural Animal Welfare** Joy Mench, 2017-12-11 *Advances in Agricultural Animal Welfare* fully explores developments in the key areas of agricultural
