Environmental Planning A Political And Philosophical Analysis:

Environmental Planning Lincoln Allison, 2021-11-21 Originally published in 1975 this was an entirely new approach to the study of environmental planning and problems Planning had hitherto been generally described as a technical exercise involving the solving of biological and economic problems In *Environmental Planning A Political and Philosophical Analysis* it is seen as an ideological activity and the development of planning in Britain and the nature of contemporary environment problems are analysed in terms of social and political theory The book discusses the nature of planning its relationship to politics and examines the groups and ideas which had been instrumental in its development It tries to determine how important the environment is to people and how decisions affecting planning are made In particular it looks at the theories and assumptions behind environmental policy suggests alternatives and describes the role played by participation and pressure groups in influencing planning in Britain at the time Evaluation in Planning E.R. Alexander, 2016-04-22

Evaluation is a critical stage in urban and regional planning and development with the consideration of alternative proposals essential for informed debate and decision Evaluation in planning has become even more important with the new paradigm attempting to integrate economic efficiency with equity sustainability and social responsibility The craft of pre development evaluation has long been influenced by Nathaniel Lichfield and in his honour this book brings together prominent researchers and practitioners to discuss evaluation in planning its conceptual foundations and subsequent development its strengths and persisting dilemmas and its best practices and their potential for improving future planning and development The chapters trace evaluation in planning from its historical origin to current applications Part one reviews the evolution of evaluation theory and practice and part two contains a selection of best practice application The final integrating chapter notes key problems and offers directions for future development in evaluation research and practice *Compromise*

Planning : A Theoretical Approach from a Distant Corner of Europe Louis C. Wassenhoven, 2022-03-28 The purpose of the book is to elaborate a planning theory which departs from the plethora of theories which reflect the conditions of developed countries of the North West The empirical material of this effort is derived from a country Greece which sits on the edge between North West and South East at the corner of Europe No doubt there is extensive international literature on planning theory in general from a bewildering variety of viewpoints The interested professional or student of urban and regional planning is certainly aware of the dizzying flood of books articles and research reports on planning theory and of their never ending borrowing of obscure concepts from more respectable scientific disciplines from mathematics to philosophy and from physics to economics human geography and sociology He or she probably observed that there is a growing interest in theoretical approaches from the viewpoint of the so called Global South The author of the present book has for many decades faced the impasse of attempting to transplant theories founded on the experience of the North West to countries with a totally different historical political social and geographical background He learned that the reality that planners face is

unpredictable patchy and responsive to social processes frequently of a very pedestrian nature Planning strives to deal with private interests which planners are keen to envelop in a single public interest which is extremely hard to define The behaviour of the average citizen far from being that of the neoclassical model of the homo economicus is that of an individual a kind of homo individualis who interacts with the state and the public administration within a complex web of mutual dependence and negotiation The state and its administrative apparatus i e the key determinants and fixers of urban and regional planning policy bargain with this individual offer inducements exemptions derogations and privileges deviate unhesitatingly from their grand policy pronouncements but still defend the rationality and comprehensiveness of the planning system they have legislated and operationalized It is by and large a successful modus vivendi but only thanks to a constant practice of compromise Hence the term compromise planning which the author coined as an alternative to all the existing theoretical forms of planning This is the sort of planning and of the accompanying theory with which he deals in this book It is the outcome of experience and knowledge accumulated in a long personal journey of academic teaching in England and Greece research and professional involvement
