## **Environmental Pollution In The Soviet Union The Spoils Of Progress:**

**The Spoils of Progress** Marshall I. Goldman, 1972 An analysis of the forces that have been brought about the abuses of water air land and raw material in Russia examining both the drawbacks and advantages of state control and conservation Because industrialism had its beginnings in capitalist countries the existence of environmental disruption in socialist and communist societies has been largely ignored The truth is that pollution of natural resources plagues the planned economy and free enterprise system alike Rapid industrial growth rather than form of government is the prime agent causing environmental havoc and where socialist reality diverges from socialist theory the ecological balance of nature suffers as in any major industrial country Marshall I Goldman whose articles on the subject have appeared in Science The New York Times and The New Yorker brings this point home as she describes abuses of water air land and raw materials in Russia analyzing the forces that have been brought about the current situation and describing both the drawbacks and advantages of state control and conservation He devotes chapters to the pollution of Lake Baikal in Siberia remarking that Baikal is a unique lake in the world and all mankind will suffer from its desecration and to the Aral and Caspian seas which is literally in danger of drying up as a result and the construction of hydroelectric stations Proposals to restore the seas by building dams and reversing the flow of major rivers from north to south Reshaping the Earth may have equally profound and undesirable results The book concludes by pointing out that the Soviet state is both manufacturer and polluter and its priorities lie with the increased production rather than conservation with progress rather than restraint Yet hopefully Goldman points to a number of beneficial state controls which if enlarged in the direction of restoring and protecting natural resources could have made Russia the most powerful and efficient of conservationists Appendixes contain selected laws on the environment the Conservation Law of the Russian Republic 1960 and the Water Law 1970 An Environmental History of the World J. Donald Hughes, 2002-09-26 An Environmental History of the World is a concise history from Ancient to Modern times of the interaction between human societies and the other forms of life that inhabit our planet This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world Each chapter concentrates on a general period in human history which has been characterised by large scale changes in the relationship of human societies to the biosphere and gives three case studies that illustrate the significant patterns occurring at that time Little environmental or historical knowledge is assumed from the reader in this introduction to environmental history

**International Dimensions Of The Environmental Crisis** Richard N Barrett, 2021-11-28 This volume is a collection of seventeen essays offering in depth and comparative studies of areas faced with environmental crisis Arranged in five sections that include practical and philosophical problems Latin America Europe Asia and Africa With focus on the problems faced in the Sahara Desert the Amazon the Punjab and a comparative study of Ethiopia and Nigeria highlighting the seriousness of certain environmental trends and the action of governments *The Environment And Marxism-leninism* Joan

Debardeleben,2019-07-11 In the past two decades environmental pollution and natural resource shortages have evoked increasing concern in the Soviet Union and Eastern Europe The emerging ecological crisis has challenged many common assumptions in the Soviet bloc as in the West This book provides for the first time a detailed and comprehensive analysis of the ecology debate in the USSR and its highly industrialized ally the German Democratic Republic GDR Based on a thorough examination of the Soviet and GDR sources Dr DeBardeleben explores the authorities attempts to explain the problem to their populations She also examines the viewpoints of scientists writers and scholars with special attention to economic dimensions of the ecology debate The study reveals the increasing sophistication of specialists in influencing public policy by adapting official values to support their positions Through comparison of the Soviet and East German cases the study clarifies the impact of natural resource endowment and legitimacy dilemmas on treatment of the ecology issue The book demonstrates that Marxist Leninist values subtly affect Soviet and GDR responses but at the same time the environmental crisis is forcing a reevaluation of some aspects of Marxist Leninist theory and ideology itself The Nature of Soviet Power

Andy Bruno,2016-04-11 During the twentieth century the Soviet Union turned the Kola Peninsula in the northwest corner of the country into one of the most populated industrialized militarized and polluted parts of the Arctic This transformation suggests above all that environmental relations fundamentally shaped the Soviet experience Interactions with the natural world both enabled industrial livelihoods and curtailed socialist promises Nature itself was a participant in the communist project Taking a long term comparative perspective The Nature of Soviet Power sees Soviet environmental history as part of the global pursuit for unending economic growth among modern states This in depth exploration of railroad construction the mining and processing of phosphorus rich apatite reindeer herding nickel and copper smelting and energy production in the region examines Soviet cultural perceptions of nature plans for development lived experiences and modifications to the physical world While Soviet power remade nature nature also remade Soviet power 1975 NASA Authorization United States.
