Environmental Stress Screening Handbook Stop The Guessing:

Environmental Stress Screening Handbook John J. Quinn, 2004 Why read this book on Environmental Stress Screening If you are working in the electronic manufacturing industry and you have heard the questions Why did it fail in the field and not in the factory The answer to this question is there was not a proper ESS program developed for this product A good ESS program is develop from the ground up and the fallout data is tracked The fallout data is used to alter the present ESS program This new altered program is tailored to the hardware and usually is less costly and should improve the product reliability Why can t we use the same ESS program as the other guy The answer to this is you can if you are manufacturing the exact same product If this is the case you must be working with the other guy A different product requires a different ESS program Or If you are working in the electronic manufacturing industry and you have heard the statements I won t do ESS it s going to cost too much Can you put a price on field returns or lost contracts because of poor quality I don t need to ESS I ll just be more careful during manufacturing You can be as careful as you want If you don t weed out the Latent defects the time bomb is ticking Or worst case condition If you are working in the electronic manufacturing industry and you have heard the front door being locked for the last time because of poor Quality hardware being shipped to the customer Unfortunately if this happens it is too late to do anything Hopefully you will develop a strong ESS program that is cost effective apply dynamic management of the ESS program by analyzing the fallout data and last but not least use common sense
