Snow, 2019-07-11 The seventh edition of this highly successful textbook analyzes the history evolution and processes of national security policies It examines national security from two fundamental fault lines the end of the Cold War and the evolution of contemporary terrorism dating from the 9 11 terrorist attacks and traces their path up to ISIS and beyond The book considers how the resulting era of globalization and geopolitics guides policy Placing these trends in conceptual and historical context and following them through military semimilitary and nonmilitary concerns National Security treats its subject as a nuanced and subtle phenomenon that encompasses everything from the global to the individual with the nation at its core New to the Seventh Edition An assessment of the impact of the Trump presidency on national security and relevant domestic policies including border security and energy security matters The continuing impact and evolution of terrorism as a security problem with notable emphasis on the decline of the Islamic State IS and what terrorist threats are likely to succeed it A description of the cyber security problem with an emphasis on Russian efforts to interfere with the 2016 US presidential election and beyond A revised delineation of the geographic and substantive challenges facing the United States in the form of a chapter on lethal landscapes emphasizing the rise of China as a global rival and opponent in Asia and an attempt to deal with state aspirants like the Kurds This book will continue to be highly beneficial to students and scholars working and studying in security studies military and strategic studies defense studies foreign policy US politics and

international relations *Globalization and the National Security State* Norrin M. Ripsman, T.V. Paul, 2010-03-18 In the past two decades many have posited a correlation between the spread of globalization and the decline of the nation state In the realm of national security advocates of the globalization thesis have argued that states power has diminished relative to transnational governmental institutions NGOs and transnational capitalism Initially they pointed to declines in both global military spending which has risen dramatically in recent years and interstate war But are these trends really indicative of the decline of nation state s role as a guarantor of national security In *Globalization and the National Security State* T V Paul and Norrin M Ripsman test the proposition against the available evidence and find that the globalization school has largely gotten it wrong The decline in interstate warfare can largely be attributed to the end of the Cold War not globalization Moreover great powers the US China and Russia continue to pursue traditional nation state strategies Regional security arrangements like the EU and ASEAN have not achieved much and weak states the ones most impacted by the turmoil generated by globalization are far more traditional in their approaches to national security preferring to rely on their own resources rather than those of regional and transnational institutions This is a bold argument and Paul and Ripsman amass a considerable amount of evidence for their claims It cuts against a major movement in international relations scholarship and is sure to generate controversy

The Political Economy of National Security, Critical Infrastructure and Securitization of Foreign Investments Jakub M. Godzimirski, Morten Skumsrud Andersen, 2024-12-30 This book examines how new flows of foreign direct investments from autocracies are framed their effects and the policy responses to them within the context of challenges to the international liberal order Chapters address thematic and regional issues from national investment controls and threat perceptions to China and Russia s responses Collectively they explore a new dynamic in international politics the securitization of money crossing borders Historically foreign investments operated under minimal global regulation based on the assumption that they were beneficial and profit driven However the past decade has witnessed a radical shift in approaches to foreign investments due to changing investment patterns and the entry of state sponsored actors into this traditionally unregulated realm China and Russia are seen to leverage foreign investments to advance their long term economic and political objectives The book comprehensively examines the subsequent repositioning of foreign investment policy and its consequences for national and international politics

Christensen, 2020-05-05 This book provides a new analysis of why relations between the United States and the Chinese Communists were so hostile in the first decade of the Cold War Employing extensive documentation it offers a fresh approach to long debated questions such as why Truman refused to recognize the Chinese Communists why the United States aided Chiang Kai shek s KMT on Taiwan why the Korean War escalated into a Sino American conflict and why Mao shelled islands in the Taiwan Straits in 1958 thus sparking a major crisis with the United States Christensen first develops a novel two level approach that explains why leaders manipulate low level conflicts to mobilize popular support for expensive long term security strategies By linking grand strategy domestic politics and the manipulation of ideology and conflict Christensen provides a nuanced and sophisticated link between domestic politics and foreign policy He then applies the approach to Truman s policy toward the Chinese Communists in 1947 50 and to Mao s initiation of the 1958 Taiwan Straits Crisis In these cases the extension of short term conflict was useful in gaining popular support for the overall grand strategy that each leader was promoting domestically Truman s limited containment strategy toward the USSR and Mao s self strengthening programs during the Great Leap Forward Christensen also explores how such low level conflicts can escalate as they did in Korea despite leaders desire to avoid actual warfare *Marine Corps Concepts and Issues* ,1989 *The Oxford Handbook of International Security* Alexandra Gheciu, William C. Governing Borderless Threats Lee Jones,Shahar Hameiri,2015-07-16 Non traditional security problems like pandemic diseases climate change and terrorism now pervade the global agenda Many argue that sovereign state based governance is no longer adequate demanding and constructing new approaches to manage border spanning threats Drawing on critical literature in political science political geography and political economy this is the first book that systematically explains the outcomes of these efforts It shows that transboundary security challenges are primarily governed not through supranational organisations but by transforming state apparatuses and integrating them into multilevel regional or global regulatory governance networks The socio political contestation shaping this process determines the form content and operation of transnational security governance regimes Using three in depth case studies environmental degradation pandemic disease and transnational crime this innovative book integrates global governance and international security studies and identifies the political and normative implications of non traditional security governance providing insights for scholars and policymakers alike
