Environmental Values In A Globalizing World:

Environmental Values in a Globalizing World Ian Lowe, Jouni Paavola, 2004-08-02 This volume brings together contributions from prominent philosophers political scientists and other scholars on the challenges that globalization poses to traditional environmental values

Environmental Values in a Globalising World Jouni Paavola, Ian Lowe, 2005
Forging Environmentalism Joanne R Bauer, 2015-01-28 Drawing on an unusually rich empirical base this timely and compelling book examines how environmental values are constructed and legitimized within the policy process It trains the spotlight on four environmentally significant countries China Japan India and the United States representing a wide diversity of cultural social economic and political characteristics Through a combination of case studies and comparative analysis the contributors illuminate cultural assumptions standards and analytic techniques that shape environmental actions and policies around the world Forging Environmentalism provides valuable direction regarding what can be done to secure public support for environmental policies Incorporating expert legal economic philosophical sociological and political perspective points the way toward the possibilities for a convergence of environmental norms and values across diverse cultures

Environmentalism and Global International Society Robert Falkner, 2021-07-15 Explains how environmentalism became a fundamental norm in international relations and explores the impact of the greening of international society

Institutional Supports for the International Rule of Law Charles Sampford, Ramesh Thakur, 2014-08-27 The rule of law is widely seen as the cornerstone of any effective polity and increasingly a vital component of the international political system If the international rule of law were to be strengthened it would greatly contribute to trade security human rights and global cooperation in a range of fields Yet in many areas the rule of law seems almost absent in international affairs This book explores the institutions that support the effectiveness of the rule of law domestically It focuses on the extent to which similar institutions already exist at international level and analyses the possibility of their further development The authors speculate on how the international rule of law might be advanced in the future thereby suggesting potential strategies for strengthening the international rule of law Adopting an interdisciplinary approach and combining the fields of international relations politics and law this book covers a range institutions including UN Security Council International Court of Justice Human rights machinery Regional human rights International Criminal Court World Trade Organization International Tribunal for the Law of the Sea UN Department of Peacekeeping Operations It will be of strong interest to students and scholars of international relations international organisations global governance international law migration law international peace and security law applied ethics political economy political science and sociology

Access to International Justice Patrick Keyzer, Vesselin Popovski, Charles Sampford, 2014-11-20 There is much debate about the scope of international law its compatibility with individual state practice its enforceability and the recent and limited degree to which it is institutionalized This collection of essays seeks to address the issue of access to justice the related element of domestic rule of law which does

not yet figure significantly in debates about international rule of law Even in cases in which laws are passed institutions are present and key players are ethically committed to the rule of law those whom the laws are intended to protect may be unable to secure protection This is an issue in most domestic jurisdictions but also one which poses severe problems for international justice worldwide The book will be of interest to academics and practitioners of international law environmental law transitional justice international development human rights ethics international relations and political theory A New Diplomacy for Sustainable Development Bo Kjellén, 2014-04-04 This book based in part on the author's forty years of experience in multilateral negotiations as a former diplomat and international negotiator explores the close relationship between international diplomacy and national political and social conditions **Fairness in Adaptation to Climate Change** W. Neil Adger, 2006 Assesses the social justice issues in adaptation to climate change Outlines the philosophical underpinnings of different types of justice in relation to climate change present inequities and future burdens It applies these to real world examples of climate change adaptation in Bangladesh Tanzania Botswana Namibia and Hungary Argues that the key to adapting to climate change lies in recognizing the equity and justice issues inherent in its causes and in human responses to it Handbook of Global Environmental Politics Peter Dauvergne, 2012-01-01 The second edition of this Handbook contains more than 30 new and original articles as well six essential updates by leading scholars of global environmental politics This landmark book maps the latest theoretical and empirical research in this energetic and growing field Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics It makes a case for an expansive definition of the field one that embraces an interdisciplinary literature on the connections between global politics and environmental change The remaining chapters are divided into four broad themes states and cooperation global governance the political economy of governance and knowledge and ethics with each section covering key emerging issues In depth explorations are given to topics such as climate change multinational corporations international agreements and UN organizations regulations and business standards trade and international finance multilevel and transnational governance and ecological citizenship Handbook of Global Environmental Politics Second Edition is a comprehensive review of the field and offers cutting edge ideas for further research As such scholars students and policymakers will find themselves looking to it for many years to come *Globalisation and Citizenship* Wayne Hudson, Steven Slaughter, 2007-04-11 This wide ranging volume explores the impact of globalization upon citizenship with a special focus on the transnational challenges that globalization poses While there is much debate over the concept globalization implies at least two distinct phenomena First it suggests that political economic and social activities are becoming increasingly inter regional or intercontinental in scope Secondly it suggests that there has been an intensification of levels of interaction and interconnectedness between states and societies Citizenship as one of the foundational concepts

of the modern liberal democratic states provides the normative framework within which globalization debates may be understood and evaluated. It also examines how different concepts, theories and practices of citizenship are evolving in response to globalization. Central questions explored in this text are: How does globalization challenge traditional conceptions of citizenship in specific respects? How is globalization creating new citizenships or new civil society spaces? How is transnational citizenship developing and what problems are associated with it in specific areas? Discussing the theoretical and practical prospects for new forms of liberal republican and cosmopolitan citizenship, *Globalisation and Citizenship* will appeal to students and scholars in the fields of international relations, globalization, sociology and political science.

Globalisation and the Rule of Law Spencer Zifcak, 2004-08-02 This book reassesses the idea of the rule of law within the present complex and increasingly internationalised environment and is the first to relate globalisation exclusively to law.

Routledge Handbook of Global Environmental Politics Paul G. Harris, 2013-10-15 This handbook provides a comprehensive and authoritative survey of Global Environmental Politics. It brings together leading international academic experts and features 40 chapters that describe the history of global environmental politics as a discipline and explain the various theories and perspectives used by scholars and students to understand it. Examine the key actors and institutions in global environmental politics, explaining the role of states, international organizations, regimes, international law, foreign policy institutions, domestic politics, corporations and transnational actors. Address the ideas and themes shaping the practice and study of global environmental politics, including sustainability, consumption, expertise, uncertainty, security, diplomacy, North-South relations, globalisation, justice, ethics, participation and citizenship. Assess the key issues and policies within global environmental politics, including energy, climate change, ozone depletion, air pollution, acid rain, sustainable transport, persistent organic pollutants, hazardous wastes, water, rivers, wetlands, oceans, fisheries, marine mammals, biodiversity, migratory species, natural heritage, forests, desertification, food and agriculture. With an in-depth new preface by the Editor, this edition of the handbook is an invaluable resource for students, scholars, researchers and practitioners of environmental politics, environmental studies, environmental science, geography, international relations and political science.

Cosmopolitan Global Politics Patrick Hayden, 2017-05-15 Cosmopolitan conceptions of justice in global politics are gaining in importance in the field of international political theory. Cosmopolitanism claims that we owe duties of justice to all the persons of the world and thus that normative theories of global politics should focus first on the interests or welfare of persons rather than of states. Providing a thorough analysis of relevant literature and covering issues such as war and conflict, peace and human security, accountability for gross violations of human rights, environmental degradation and the democratic deficit in transnational political actions and institutions, Patrick Hayden deftly examines the connections between accounts of cosmopolitanism and the part they play in contemporary global politics. He identifies competing theories of cosmopolitanism and defends them as strategies for serving the aims of justice in world affairs. Furthermore, he explores how cosmopolitan theories can function

positively in processes of shaping international norms

The Economic Value of Biodiversity David Pearce, Dominic

Moran, 2013-11-05 Biodiversity loss is one of the major resource problems facing the world and the policy options available are restricted by inappropriate economic tools which fail to capture the value of species and their variety This study describes in non technical terms how cost benefit analysis techniques can be applied to species and species loss and how they provide a measure of the efficiency of conservation measures Only when conservation can be shown to pass such a basic economic test the authors claim will it be incorporated into policies David Pearce has also written *Blueprint for a Green Economy* Gary Bryner, *The Historical Dictionary of Environmentalism* strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This is done through a chronology a list of acronyms and abbreviations an introductory essay and over 300 cross referenced dictionary entries

Historical Dictionary of Environmentalism Peter Dauvergne, 2016-09-09 To capture the diversity within environmentalism this dictionary takes a global tack with a focus on ideas events institutions initiatives and green movements since the 1960s It strives to avoid a common error in many histories of environmentalism to exaggerate the input of the wealthy countries of Europe and North America and understate the influence of Africa Asia South and Central America and the Polar Regions It aims as well for a more comprehensive analysis than most histories of the modern environmental movement understanding environmentalism as emerging not only from grassroots and formal nongovernmental associations but also from corporate governmental and intergovernmental organizations and initiatives This assumes the ideas and energy infusing environmentalism with political purpose arise from hundreds of thousands of sources from corporate boardrooms to bureaucratic policies to international negotiations to activists Thus environmentalists are not only indigenous people blocking a logging road Greenpeace activists protesting a seal hunt or green candidates contesting an election an equal or larger number of environmentalists are working within the Japanese bureaucracy to implement environmental policies within the World Bank to assess the environmental impacts of loans within Wal Mart to green its purchasing practices or within intergovernmental forums to negotiate international environmental agreements This second edition of *Historical Dictionary of Environmentalism* contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced entries on important events issues organizations ideas and people shaping the direction of environmentalism worldwide This book is an excellent access point for students researchers and anyone wanting to know more about environmentalism

The A to Z of Environmentalism Peter Dauvergne, 2009-09-02 Environmentalism involves hundreds of international environmental groups thousands of national groups and tens of thousands of local ones It also includes hundreds of international agreements hundreds of national environmental agencies and countless environmental sections in other organizations from those in multinational corporations to ones in regional and international organizations Such environmental concepts as sustainable

development the precautionary principle corporate social responsibility and eco labeling percolate from all of these sources Every year new ideas refinements policies institutions markets and problems continue to enter into environmental debates and discourses making it nearly impossible to keep abreast of the changes constantly taking place The A to Z of Environmentalism is a paperback edition of the Historical Dictionary of Environmentalism It strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This goal is accomplished through a chronology an introductory essay and over 300 cross referenced dictionary entries

Global Environmental Governance and Small States Michelle Scobie, 2019 Global Environmental Governance gives the perspectives of small states on some of the most important issues of the anthropocene from trade climate change and energy security to tourism marine governance and heritage Providing an in depth analysis of global environmental governance and its impact on Caribbean small island developing states SIDS Michelle Scobie explores which dynamics and contexts influence current policy and future environmental outcomes for one of the most biodiverse regions of the planet

Bioregionalism and Global Ethics Richard Evanoff, 2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both

Heritage Tourism in China Hongliang Yan, 2017-01-25 This book offers new approaches and insights into the relationships between heritage tourism and notions of modernity identity building and sustainable development in China It demonstrates that the role of the state politics institutional arrangements and tradition have a considerable impact on perceptions of these notions The volume contributes to current debates on

tradition and modernity the study of heritage tourism the negotiated power between stakeholders in tourism planning and policy making and the study of China's society The approach and findings of the book are of value to those interested in the continuities and changes in Chinese society and to graduate students and researchers in tourism cultural studies and China studies
