smart can 'IT' be? Malin Granath,2016-08-30 Cities are facing many challenges challenges linked to world wide trends like urbanisation climate changes and globalisation In parallel to these trends we have seen a rapid digitalisation in and of different parts of society Cities and local governments have been appointed an important role in overcoming these world wide challenges and subsequently in policy practices digitalisation is perceived as an important dimension in delivering better and sustainable services to its citizens As a result the smart city has emerged as a concept and approach to contemporary urban planning and development There is still no common understanding of the concept and what components and dimensions it covers However in all definitions digitalisation constitutes one dimension but the role and function of it is still not clear In this study I have examined how different stakeholders talk about digitalisation in policy and planning practices of urban development The aim has been to identify and analyse different repertoires of discourses on digitalisation to advance our knowledge on how goals related to the smart city and digitalisation are put into practice The results are based on a qualitative and interpretative case study with a social constructionist approach An analytical framework based on discourse analysis stakeholder theory and new institutional theory has been constructed to analyse the case Main results show that repertoires on digitalisation are limited in both policy and planning of urban development In these practices digitalisation is primarily seen as a means or as a communication infrastructure in relation to two city services functions i e services related to governance and to environment Results also show that practices of urban planning and development are institutionalised where different stakeholders salience and stakes in urban development and in digitalisation differ but it is clear that digitalisation is a secondary issue Implications of these results are that the taken for granted discourses in policy and planning practices of urban development limit both practice and research when developing a smart city St der st r inf r m nga utmaningar kopplat till v rldsomsp nnande trender s som urbanisering klimatf r ndringar och globalisering Parallellt med dessa trender har vi sett en snabb digitalisering i och av olika delar av samh llet I detta sammanhang har st der och kommuner blivit tilldelade en viktig roll i hanteringen av dessa utmaningar P policyniv ses digitalisering som en viktig dimension f r att leverera h llbar och b ttre service till medborgarna Som ett led i detta har smarta st der vuxit fram som b de begrepp och metod f r stadsplanering och stadsutveckling Det finns dock ingen gemensam tolkning av begreppet D remot finns digitalisering med som en dimension i definitionerna men vilken roll och funktion den har r fortfarande oklart I denna studie har jag unders kt hur olika intressenter talar om digitalisering i olika policy och planeringspraktiker kopplat till stadsutveckling Syftet har varit att identifiera och analysera repertoarer av digitaliseringsdiskurser f r att bidra med kunskap om hur m l kopplade till smarta st der och digitalisering oms tts i praktiken Resultaten r baserade p en kvalitativ och tolkande fallstudie med en socialkonstruktionistisk ansats Ett analytiskt ramverk baserat p diskursanalys intressentanalys och nyinstitutionell teori har tagits fram f r att analysera fallet Resultaten visar att digitaliseringsrepertoarer r begr nsade b de i policy och i planering av stadsutveckling I dessa praktiker ses digitalisering fr mst som ett verktyg eller en

Sappa,2022-09-09 This book is the result of four year work in the framework of the Ibero American Research Network TICs4CI funded by the CYTED program In the following decades 85% of the world s population is expected to live in cities hence urban centers should be prepared to provide smart solutions for problems ranging from video surveillance and intelligent mobility to the solid waste recycling processes just to mention a few More specifically the book describes underlying technologies and practical implementations of several successful case studies of ICTs developed in the following smart city areas Urban environment monitoring Intelligent mobility Waste recycling processes Video surveillance Computer aided diagnose in healthcare systems Computer vision based approaches for efficiency in production processes The book is intended for researchers and engineers in the field of ICTs for smart cities as well as to anyone who wants to know about state of the art approaches and challenges on this field **ICT, Cities, and Reaching Positive Peace** Ali Cheshmehzangi,2022-07-18 This book is the first attempt to explore the use and application of Information and Communication Technology ICT and related smart technologies in cities and for the sole purpose of reaching positive peace The everyday usage of digital technologies in cities encourages us to study the benefits co benefits disadvantages and threats of ICT application in cities and urban environments The continuous growth of digital technologies and their growing demand in everyday urban practices and systems are already known to scholars practitioners and policy makers However this book explores whether or not such applications and usage help us reaching

positive peace This approach is novel in the field of urban studies allowing us to identify and highlight best practices successes and failures of ICT application to meet positive peace pillars The scope of the book highlights our focus on positive peace and its eight pillars mainly how they are meant to be achieved in cities and urban areas With an analytical view on the topic we aim to reflect on the systematic features of urban systems using positive peace pillars as the primary targets We believe ICT application and usage in cities could be more directive and beneficial to reach peace and prosperity to achieve such a goal Therefore this book provides a holistic guideline and coverage of ICT use for positive peace pathways and peace building practices We hope the findings of the book help researchers and policy makers to come up with novel and integrated strategies ensuring that our everyday usage of digital technologies ICT and smart tools are more meaningful and people oriented   Smart Cities Anna Visvizi,Hanna Godlewska-Majkowska,2024-08-26 This book seeks to identify and to examine factors and mechanisms underlying the growth and development of smart cities It is commonplace to discuss smart cities through the lens of advances in ICT The resulting overemphasis on what is technologically possible downplays what is politically socially and economically feasible This book by analysing the smart city through a variety of perspectives offers a more comprehensive insight into and understanding of the complex and the open ended nature of the growth and development of a smart city A solid conceptual framework is developed and employed throughout the chapters and a selection of case studies from Europe Asia and the Arab Peninsula grants the readers a hands on perspective of the matters discussed The chapters included in this book address a set of questions including How do the twin processes of digitalization and smartification unfold in the context of the smart city agenda How do these processes relate to the concepts of smart city 1 0 2 0 3 0 and 4 0 In which ways have the spatial aspects of city functioning been influenced by the intrusion of ICT In which ways do the same processes contribute to the attainment of the UN Sustainable Development Goals SDGs What are the implications of smartification and the emergence of smart organizations public private and voluntary for the spatial development of smart cities Do ICT and its application in the city space boost the processes of revitalization and how does ICT influence the process of gentrification To what extent and how does the intrusion of ICT enhanced tools and applications in the city space impact on a city s relationship with its broader territorially defined context Are the administrative borders and divisions inherent in the fabric of a city becoming less more porous How should urban sprawl be conceived in the context of the smart city debate This book will have a broad appeal to academics students and policy makers with interests in urban planning sustainable development cities economics technology sociology urban studies digitalization SDGs wellbeing and resilience   Good Urban Governance Through ICT Gaurav Relhan,2012 Africa is currently experiencing the world s fastest urbanization rate at 3 5 percent annually placing increasing pressure on resource constrained local governments to maintain and improve livability standards of their cities But simultaneously an Information and Communication Technologies ICT revolution has swept across the continent as evidenced by vastly improved telecommunications and internet infrastructure

leapfrogging mobile communications penetration rates and emergence of a successful homegrown IT applications industry This report aims to 1 synthesize the role currently played by ICT towards improved governance management and accountability of urban service providers in Africa as well as other regions 2 explore current ICT initiatives that are relevant to the World Bank s thematic concerns 3 reconcile existing deficiencies barriers towards potential for replication and 4 develop a roadmap to render easy strategy implementation by project teams Section one outlines evolving trends in urban governance and presents ICT as a potential tool in the environment of modern governance Section two discusses the role of ICT in some of the Bank s core areas of urban focus namely local governance and economic development intergovernmental fiscal relations and municipal finance urban poverty and slum upgrading urban planning land and housing urban environment and climate change and water and sanitation service delivery An analysis of fundamental ICT methodologies employed is discussed in section three Section four in conclusion suggests an action plan for enhancing ICT initiatives as a component of the Bank s lending activities ICT for the Next Five Billion People Josef Lorenz,2010-06-04 Currently around one to two billion users are able to connect to the Internet most of them living in the industrialized parts of the world However if we want to improve the quality of life of the world population with the help of access to information and education it is necessary that in the next decade an additional five billion people gain access to the Internet The next five billion Internet users are mainly living in emerging economies Therefore the main challenge is to lower the economic barrier using new approaches for infrastructure deployment and service delivery to billions of people This book reflects the discussions of the challenges from the M nchner Kreis with representatives from the ICT industry academia non governmental organizations and governmental development organizations among them many representatives from emerging economies in Africa and Asia They had highlighted the real demand for ICT and what impact ICT creates for the wealth and lifestyle of the people
