**Advances in Computer Systems Architecture** Pen-Chung Yew,Jingling Xue,2004-08-19 On behalf of the program committee we were pleased to present this year s program for ACSAC Asia Pacific Computer Systems Architecture Conference Now in its ninth year ACSAC continues to provide an excellent forum for researchers educators and practitioners to come to the Asia Pacific region to exchange ideas on the latest developments in computer systems architecture This year the paper submission and review processes were semiautomated using the free version of CyberChair We received 152 submissions the largest number ever

Each paper was assigned at least three mostly four and in a few cases seven review committee members for review All of the papers were reviewed in a 1 month period during which the program chairs regularly monitored the progress of the review process When reviewers claimed inadequate expertise additional reviewers were solicited In the end we received a total of 594 reviews 3.9 per paper from committee members as well as 248 coreviewers whose names are acknowledged in the proceedings We would like to thank all of them for their time and effort in providing us with such timely and high quality reviews some of them on extremely short notice

**Formal Methods in Computer-Aided Design** Mark D. Aagaard,John W. O'Leary,2003-06-30 This volume contains the proceedings of the Fourth Biennial Conference on Formal Methods in Computer Aided Design FMCAD The conference is devoted to the use of mathematical methods for the analysis of digital hardware circuits and systems The work reported in this book describes the use of formal mathematics and associated tools to design and verify digital hardware systems Functional verification has become one of the principal costs in a modern computer design effort FMCAD provides a venue for academic and industrial researchers and practitioners to share their ideas and experiences of using discrete mathematical modeling and verification Over the past 20 years this area has grown from just a few academic researchers to a vibrant worldwide community of people from both academia and industry This volume includes 23 papers selected from the 47 submitted papers each of which was reviewed by at least three program committee members The

history of FMCAD dates back to 1984 when the earliest meetings on this topic occurred as part of IFIP WG10.2
