Wet Site Archaeology
Barbara A. Purdy,2018-01-10 This volume the result of an International Conference on Wet Site Archaeology funded by the National Endowment for the Humanities explores the rewards and responsibilities of recovering unique assemblages from water saturated deposits Characteristics common to all archaeological wet sites are identified from Newfoundland to Chile

Polynesia to Florida and from the Late Pleistocene to the Twentieth Century Topics include innovative excavation and preservation methods the need for adequate funding to preserve and analyze the abundant biological and cultural remains recovered only at archaeological wet sites expanded knowledge of past environments subsistence technologies artistic expressions skeletal structure and pathologies the urgency to inform developers and governmental bodies about the invisible heritage entombed in wetlands that is often destroyed before it can be investigated a formula for establishing priorities for excavating wet sites and how to determine when enough of a wet site has been sampled Many famous sites and discoveries are described in this volume including Herculaneum Hoko River Hontoon Island Key Marco Monte Verde Ozette Somerset Levels Windover bog bodies of Northern Europe and lake dwellers of Switzerland Professional and amateur archaeologists as well as anyone interested in archaeology or the significance of wet site archaeology will find this book fascinating

Conservation of Wood Artifacts A. Unger, A.P. Schniewind, W. Unger, 2013-03-09 The impetus for this book was the desire to systematically organize the extant literature on the conservation of cultural property made of wood from its beginnings before the Christian Era to the year 2000 Various published reviews and monographs including *Holzkonservierung* Wood Conservation published by the senior author in 1988 have appeared over the years especially in English and in German They have provided exemplary treat merit of individual areas or aspects of wood conservation but a comprehensive up to date exposition of historic and current developments has been lacking The diverse professional fields of the authors as well as their insights into methods of conservation and restoration of wood artifacts in Europe North America and Asia provided a solid basis for the success of this undertaking One of the goals during the examination of the literature was that not only well known conservators and scientists from countries that are leaders in wood conservation should be represented but that less well known often not as readily accessible contributions should also be included Only in this manner was it possible to draw a comprehensive picture of the national and international state of wood conservation The Art and Archaeology Technical Abstracts AATA of the Getty Institute were very helpful in our efforts to evaluate as many publications as possible

Preventive Conservation for Historic House Museums Jane Merritt, Julie A. Reilly, 2010 Preventive Conservation for Historic House Museums is a primer on the preventive care practices that these unique sites need to slow the rate of deterioration and prevent damage and wear to the property and its collections It proposes a collaborative approach to preservation planning that is based on interdisciplinary research critical thinking and observation rather than rote maintenance schedules and everyday residential cleaning practices The authors recommend that sites have documents and plans in place that direct the intellectual and physical control of the collections and site The Effects of Light on Materials in Collections Terry T. Schaeffer, 2001-08-16 The impact of light on works of art and archival materials has long been an issue of concern to conservators and other museum professionals yet the literature on this subject has never been systematically reviewed This volume fills that gap by providing a survey of the impact of exposure to light with an emphasis on photoflash

and reprographic sources The information provided will assist the professional audience especially conservators and collections managers in assessing the risk to art and archival objects of such exposures The text surveys relevant photophysical and photochemical principles photometric and radiometric measurement and the spectral outputs of several light sources Materials discussed include colorants and natural fibers pulp paper and wood natural and synthetic polymers fluorescent whitening agents photographic and reprographic materials and objects containing combinations of materials Approximations and assumptions used in the evaluation process are discussed in some detail with examples of the different types of calculations The Research in Conservation reference series presents the findings of research conducted by the Getty Conservation Institute and its individual and institutional research partners as well as state of the art reviews of conservation literature Each volume covers a topic of current interest to conservators and conservation scientists

Conservation of Books Abigail Bainbridge, 2023-03-27 *Conservation of Books* is the highly anticipated reference work on global book structures and their conservation offering the first modern comprehensive overview on this subject The volume takes an international approach to its subject Written by over 70 specialists in conservation and conservation science based in 19 countries its 26 chapters cover traditional book structures from around the world the materials from which they are made and how they degrade and how to preserve and conserve them It also examines the theoretical underpinnings of conservation what and how to treat and the ethical cultural and economic implications of treatment Technical drawings and photographs illustrate the structures and treatments examined throughout the book Ultimately readers gain an in depth understanding of the materiality of books in numerous global contexts and reflect on the practical considerations involved in their analysis and treatment *Conservation of Books* is a quintessential reference work for book conservators and anyone working with books such as collection managers librarians curators dealers collectors historians and related professionals It is also an indispensable text for students to complement hands on training in this field

Corrosion of Archaeological and Heritage Artefacts EFC 45 Philippe Dillmann,2017-12-02 This special issue of

Corrosion Engineering Science and Technology is dedicated to the study of corrosion of objects from historical sites. The issue contains contributions from the 2009 EUROCORN session on Corrosion of Archaeological and Heritage Artefacts organised by the European Federation of Corrosion's working party and commissioned articles on other key issues. The objective is to give the reader a broad understanding of corrosion of ancient materials for the most part metal but also glass. Articles shed light on a range of analytical approaches related to the study of the complex systems that make up historical artifacts. In order to arrive at an understanding of the nanometric organisation of rust layers and interphases such studies must be approached on a macroscopic scale. Techniques used include macrophotography, synchrotron radiation and transmission electron microscopy (TEM) that ensure results that are both exhaustive and representative of particular observations. This issue demonstrates the wealth of approaches possible in the study of the corrosion of ancient materials.

The Archaeologist's Manual for Conservation Bradley A. Rodgers, 2007-05-08. This is a Foreword by an archaeologist not a conservator but as Brad Rodgers says, Conservation has been steadily pulled from archaeology by the forces of specialization. p 3 and he wants to remedy that situation through this manual. He sees this work as a call to action for the non-professional conservator permitting curators, conservators and archaeologists to identify artifacts that need professional attention and allow these professionals to stabilize most artifacts in their own laboratories with minimal intervention using simple, non-toxic procedures. p 5 It is the mission of Brad's manual to bring conservation back into archaeology. p 6 The degree of success of that goal depends on the degree to which archaeologists pay attention to and put to use what Brad has to say because as he says, The conservationist archaeologist is responsible to make preparation for an artifact's care even before it is excavated and after its storage into the foreseeable future, a tremendous responsibility. p 10 The manual is a combination of highly technical as well as common sense methods of conserving wood, iron and other metals, ceramics, glass and stone, organics and composites. A far better guide to artifact conservation than was available to me when I first faced that archaeological challenge at colonial Brunswick Town, North Carolina in 1958, a challenge still being faced by archaeologists today. The stage of conservation in 1958 is in dramatic contrast to the procedures Brad describes in this manual; conservation has indeed made great progress. For instance, a common procedure then was to heat the artifacts red-hot in a furnace, a method that made me cringe.
