Creative Development Robert Kelly,2016-06-29 Spark continual creative growth for both learners and educators Creativity is a key ingredient for success in the knowledge economy of the 21st century where skills such as collaboration communication and critical thinking are central Most educators agree that encouraging creativity must become a central goal in the classroom but they face an ongoing struggle to build and maintain an environment that promotes their students creative development In Creative Development Transforming Education through Design Thinking Innovation and Invention Robert Kelly equips educators with the theory strategies and tactics that allow creativity to flourish Creative Development features voices from the field to showcase practical real life examples of successfully fostering creative development in education Topics include How to create an educational culture conducive to creative development Effective instructional design and assessment as creativity Bridging the gap between design thinking and design doing Teacher education and training for creative classrooms Key vocabulary and theory in the field of creativity [Fighting for Space](#) Travis Lupick,2018-06-05 North America is in the grips of a drug epidemic with the introduction of fentanyl the chances of a fatal overdose are greater than ever prompting many to rethink the war on drugs Public opinion has slowly begun to turn against prohibition and policy makers are finally beginning to look at addiction as a health issue as opposed to one for the criminal

justice system While deaths across the continent continue to climb Fighting for Space explains the concept of harm reduction as a crucial component of a city's response to the drug crisis It tells the story of a grassroots group of addicts in Vancouver's Downtown Eastside who waged a political street fight for two decades to transform how the city treats its most marginalized citizens Over the past twenty five years this group of residents from Canada's poorest neighborhood organized themselves in response to the growing number of overdose deaths and demanded that addicts be given the same rights as any other citizen against all odds they eventually won But just as their battle came to an end fentanyl arrived and opioid deaths across North America reached an all time high The genocide in Vancouver finally sparked government action Twenty years later as the same pattern plays out in other cities there is much that advocates for reform can learn from Vancouver's experience Fighting for Space tells that story including case studies in Ohio Florida New York California Massachusetts and Washington state with the same passionate fervor as the activists whose tireless work gave dignity to addicts and saved countless lives

Creativity and Innovation Simona Doboli,Jared B. Kenworthy,Ali A. Minai,Paul B. Paulus,2022-01-01 This book focuses on the emergence of creative ideas from cognitive and social dynamics In particular it presents data models and analytical methods grounded in a network dynamics approach It has long been hypothesized that innovation arises from a recombination of older ideas and concepts but this has been studied primarily at an abstract level In this book we consider the networks underlying innovation from the brain networks supporting semantic cognition to human networks such as brainstorming groups or individuals interacting through social networks and relate the emergence of ideas to the structure and dynamics of these networks Methods described include experimental studies with human participants mathematical evaluation of novelty from group brainstorming experiments neurodynamical modeling of conceptual combination and multi agent modeling of collective creativity The main distinctive features of this book are the breadth of perspectives considered the integration of experiments with theory and a focus on the combinatorial emergence of ideas
