The New Encyclopædia Britannica, 1981 **The Sciences in Islamicate Societies in Context** Sonja Brentjes, 2023-11-30 This *Variorum* volume reprints ten papers on contextual elements of the so called ancient sciences in Islamicate societies between the thirteenth and the seventeenth centuries They address four major themes the ancient sciences in educational institutions courtly patronage of science the role of the astral and other sciences in the Mamluk sultanate and narratives about knowledge The main arguments are directed against the then dominant historiographical claims about the exclusion of the ancient sciences from the madrasa and cognate educational institutes the suppression of philosophy and other ancient sciences in Damascus after 1229 the limited role of the new experts for timekeeping in the educational and professional exercise of this science and the marginal impact of astrology under Mamluk rule It is shown that the muwaqqits timekeepers were important teachers at madrasas and Sufi convents that Mamluk officers sought out astrologers for counselling and that narratives about knowledge reveal important information about scholarly debates and beliefs Colophons and dedications are used to prove that courtly patronage for the ancient sciences continued uninterrupted until the end of the seventeenth century Furthermore these papers refute the idea of a continued and strong conflict between the ancient and modern sciences showing rather shifting alliances between various of them and their regrouping in the

classifications of the entire disciplinary edifice These papers are suited for graduate teaching in the history of science and the intellectual cultural and social history of the Middle East and for all readers interested in the study of the contexts of the sciences

Physics Of Emergence And Organization Ignazio Licata, Ammar Sakaji,2008-06-09 This book is a state of the art review on the Physics of Emergence The challenge of complexity is to focus on the description levels of the observer in context dependent situations Emergence is not only an heuristic approach to complexity but it also urges us to face a much deeper question what do we think is fundamental in the physical world This volume provides significant and pioneering contributions based on rigorous physical and mathematical approaches with particular reference to the syntax of Quantum Physics and Quantum Field Theory dealing with the bridge laws and their limitations between Physics and Biology without failing to discuss the involved epistemological features Physics of Emergence and Organization is an interdisciplinary source of reference for students and experts whose interests cross over to complexity issues

African Church Fathers - Ancient and Modern Hans S. A. Engdahl,2021-01-26 This critical and close reading of two African theologians Origen 185-254 and Mbiti 1931-2019 focuses on the following areas philosophy African philosophy and religion and Platonic cosmology ecclesiology and eschatology a parallel presentation of these three themes leads to a fourth theme that of the resurrection where it is argued that there exists a consensus and a convergence between the two This reading also highlights two convictions that partly have caused strong criticism Mbiti has suggested that African philosophy and religion have a conception of time of their own Origen that all and everything is gradually moving towards an apokatastasis at which point all will be saved Yet the contention is that even more important to both Mbiti and Origen is the resurrection of Jesus Christ In order to establish the impact of the resurrection on their lives as Christians and as theologians a contrast reading has been undertaken i.e. texts are identified which underline the need to forge a link between the resurrection and the earthly ministry of Jesus These texts also underwrite the conviction of Mbiti as well as Origen of the resurrection as something which must be lived in church and society corporately as well as in personal devotion The fact of resurrection creates a new mode of life
