Respectability as Moral Map and Public Discourse in the Nineteenth Century Woodruff D. Smith,2017-07-20 Despite the fact that respectability is universally recognized as a feature of nineteenth century society it has seldom been studied as a subject in itself In this path breaking book Woodruff D Smith interprets respectability as a highly significant cultural phenomenon incorporating both a moral imaginary or map and a distinctive discourse Respectability was constructed in the public spheres of Europe and the Americas and eventually came to be an aspect of social life throughout the world From its origins in the late eighteenth century it was a conscious response to what were perceived as undesirable aspects of modernity It became a central feature of concepts of the modern itself and an essential part of the processes that in the twentieth century came to be called modernization and cultural globalization Respectability

though typically associated with the bourgeoisie existed independently of any particular social class and strongly affected modern constructions of class in general and of gender Although not an ideology respectability was overtly embedded in several political discourses especially those of movements such as antislavery which claimed to transcend politics While it may no longer be a coherent entity in culture and discourse respectability continues to affect contemporary public life through a fragmentary legacy **Philosophy and Oscar Wilde** Michael Y.
