Ideas Of History:

The Idea of History Robin George Collingwood, 1993 The Idea of History is the best known work of the great Oxford philosopher historian and archaeologist R G Collingwood Published posthumously in 1946 it examines how the idea of history has evolved from the time of Herodotus to the twentieth century and offers Collingwood s own view of what history is This revised edition has a substantial new introduction which discusses how scholars have responded to Collingwood s classic over the last fifty years It also makes available for the first time some of Collingwood s lectures on the philosophy of history essential for a fuller understanding of his thought and in particular for the interpretation of *The Idea of History* itself **The**

History of Ideas George Boas, 1969 **The Great Chain of Being** Arthur O. Lovejoy, 2011-12-31 This is arguably the seminal work in historical and philosophical analysis of the twentieth century Originally delivered for the William James lecture series at Harvard University in 1932-33 it remains the cornerstone of the history of ideas Lovejoy sees philosophy s history as one of confusion of ideas a prime example of which is the idea of a great chain of being a universe linked in theology science and values by pre determined stages in all phases of life Lovejoy s view is one of dualities in nature and society with both error and truth as part of the natural order of things The past reminds us that the ruling modes of thought of our own age which we may view as clear coherent and firmly grounded are unlikely to be seen with such certainty by posterity *The Great Chain of Being* is an excursion into the past with a clear mission to discourage the assumption that all is known or that what is known is not subject to modification at a later time Lovejoy reaffirms the intrinsic worth of diversity as a caution against certitude By this he does not mean toleration of indifference or relativity for its own sake but an appreciation of mental and physical process of human beings As Peter Stanlis notes in his introduction Faith in the great chain of being was finally largely extinguished by the combined influences of Romantic idealism Darwin s theory of evolution and Einstein s theory of relativity Few books remain as alive to prospects for the future by reconsidering follies of the past as does Lovejoy s stunning work **Collingwood's The Idea of History** Peter Johnson, 2012-12-27

The Idea of History is the best known work of the Oxford philosopher and historian RG Collingwood Published posthumously in 1946 it is in effect two books a historiography and a philosophy of history Students look to Collingwood for a history of thinking about history and to discover his ideas about the nature of historical understanding It is an indispensable text for historians and philosophers yet it is also highly challenging and many of Collingwood s innovations have been seriously misunderstood The primary focus of this book is on Collingwood s actual arguments especially the most radical of these with the aim of elucidating their construction and appraising them in the clearest possible way This guide is the ideal companion to Collingwood s classic text both for students coming to it for the first time and for those wishing to consider its arguments afresh It offers clear and concise accounts of the book s composition the intellectual context of Collingwood s ideas its central arguments concerning the nature of history and its reception and influence **Development of the Idea of History in**

Antiquity Gerald A. Press, 2003-09-10 An extensive scholarly literature written in the past century holds that in ancient Greek and Roman thought history is understood as circular and repetitive a consequence of their anti temporal metaphysics in contrast with Judaeo Christian thought which sees history as linear and unique a consequence of their messianic and hence radically temporal theology Gerald Press presents a more general view that the Graeco Roman and Judaeo Christian cultures were fundamentally alien and opposed cultural forces and that therefore Christianity's victory over paganism included the replacement or supersession of one intellectual world by another and then shows that contrary to this view there was substantial continuity between pagan and Christian ideas of history in antiquity rather than a striking opposition between cyclic and linear patterns He finds that the foundation of the Christian view of history as goal directed lies in the rhetorical rather than the theological motives of early Christian writers
