Jewel series, booklets Eva L. Travers,Eva Travers Evered Poole,1888 **The Tao of Islam** Sachiko

Murata,1992-01-01 The Tao of Islam is a rich and diverse anthology of Islamic teachings on the nature of the relationships between God and the world the world and the human being and the human being and God Focusing on gender symbolism Sachiko Murata shows that Muslim authors frequently analyze the divine reality and its connections with the cosmic and human domains with a view toward a complementarity or polarity of principles that is analogous to the Chinese idea of yin yang Murata believes that the unity of Islamic thought is found not so much in the ideas discussed as in the types of relationships that are set up among realities She pays particular attention to the views of various figures commonly known as Sufis and philosophers since they approach these topics with a flexibility and subtlety not found in other schools of thought She translates several hundred pages most for the first time from more than thirty important Muslims including the Ikhwan al Safa Avicenna and Ibn al Arabi

The Hidden Church of the Holy Graal Arthur Edward Waite,1909 The author was among the first to study western occultism as a spiritual tradition rather than as pseudoscience or religion This 1909 survey of the Holy Grail legend weaves together the history of how a pagan folk tale became a vital Christian allegory Waite makes it a point to extensively describe all source texts of the Grail legend employing readable yet interesting prose **The Fluid Pantheon** Bernard

Faure,2015-12-31 Written by one of the leading scholars of Japanese religion The Fluid Pantheon is the first installment of a multivolume project that promises to be a milestone in our understanding of the mythico ritual system of esoteric Buddhism specifically the nature and roles of deities in the religious world of medieval Japan and beyond Bernard Faure introduces readers to medieval Japanese religiosity and shows the centrality of the gods in religious discourse and ritual in doing so he moves away from the usual textual historical and sociological approaches that constitute the method of current religious studies The approach considers the gods including buddhas and demons as meaningful and powerful interlocutors and not merely as cyphers for social groups or projections of the human mind Throughout he engages insights drawn from structuralism post structuralism and Actor network theory to retrieve the implicit pantheon as opposed to the explicit

orthodox pantheon of esoteric Japanese Buddhism Mikkyō Through a number of case studies Faure describes and analyzes the impressive mythological and ritual efflorescence that marked the medieval period not only in the religious domain but also in the political artistic and literary spheres He displays vast knowledge of his subject and presents his research much of it in largely unstudied material with theoretical sophistication His arguments and analyses assume the centrality of the iconographic record and so he has brought together in this volume a rich and rare collection of more than 180 color and black and white images This emphasis on iconography and the ways in which it complements supplements or deconstructs textual orthodoxy is critical to a fuller comprehension of a set of medieval Japanese beliefs and practices It also offers a corrective to the traditional division of the field into religious studies which typically ignores the images and art history which oftentimes overlooks their ritual and religious meaning The Fluid Pantheon and its companion volumes should persuade readers that the gods constituted a central part of medieval Japanese religion and that the latter cannot be reduced to a simplistic confrontation parallelism or complementarity between some monolithic teachings known as Buddhism and Shinto Once these reductionist labels and categories are discarded a new and fascinating religious landscape begins to unfold
