## **Hierarchical Concepts In Psychoanalysis:**

Hierarchical Concepts in Psychoanalysis Arnold Wilson, 1993-01-01 Advances in fields such as neuropsychology and insights from such areas as psycholinguistics have shed new light on hierarchical concepts in psychoanalysis Contributors explore current concepts of hierarchy in sections on research theory and practice in a final overview chapter the editors highlight issues debates and the attendant conundrums Annotation copyright by Book News Inc Portland OR The Annual of Psychoanalysis, V. 25 Jerome A. Winer, 2021-02-25 Volume 25 of The Annual is dedicated to the memory of Michael Franz Basch who achieved distinction as both a psychoanalytic theorist of the first rank and an authority on the nature and conduct of dynamic psychotherapy A wide range of original contributions bear witness to his theoretical clinical and educational interests A number of papers remind us of Basch's prominence as a self psychological theorist Elson's self psychological reappraisal of self pity dependence and manipulation as self states Ornstein's developmental perspective on power self esteem and destructive aggression Tolpin's review of sexuality from the standpoint of normal self development and Wolf's discussion of self psychology and the aging self Basch's life long educational concerns gain expression in Goldberg's discussion of clinical teaching particularly the challenge of leading of case conferences and Ornstein's and Kay's thoughtful consideration of enduring difficulties in American medical education Additional highlights of the volume include Fawcett's consideration of the role of pharmacotherapy in psychodynamic treatment Jaffe's consideration of the applicability of hierarchical models to assessment and intervention in brief psychotherapy Galatzer Levy's review of the witch metapsychology Gedo's analysis of mythic themes in the operas Don Giovanni and Der Rosenkavalier Modell's reflections on metaphor and affects and Kernberg's discussion of a new psychoanalytic mainstream which he compares and contrasts with a parallel convergence of Kohutian and interpersonal analytic approaches Many of these contributions incorporate reflections on Basch as a teacher and colleague and the entire volume is framed by Goldberg's moving tribute Analysts and psychotherapists sharing Basch's commitment to academic and clinical excellence and his keen awareness of the pragmatic requirements of doing effective therapy will find in Volume 25 a cornucopia of riches **The Annual of Psychoanalysis, V. 28** Jerome A. Winer, 2013-06-17 Volume 28 of The Annual features stimulating original essays on the relationship between psychoanalysis and the neurosciences Edelman's Neural Darwinism informs Barry's investigation of the psychoanalytic theory of internalization and Fajardo's reassessment of breaks in consciousness whereas Gedo's hierarchical model of mental functioning informs Fisher's presentation of the treatment of an autistic child Elsewhere Hadley proposes a neurobiologically distinct motivational system devoted to the development of autonomy Solms attempts to bridge psychoanalysis and the neurophysiology of dreaming Levin and Trevarthen examine the relationship of conscious and unconscious functions to the executive control network ECN of the brain Levin examines the contributions of chaos theory to psychoanalysis and Modell explores metaphor as the crucial aspect of the developing mind and brain through which cognition itself occurs Moraitis's

examination of why analysis has been so slow to integrate its findings with the insights of contemporary neuroscience and cognitive psychology and Sadow's reprise on the role of theory in the evolution of psychoanalysis usefully frame the contributions to this section. Section II of Volume 28 reengages a subject area for which *The Annual* has become well known. The four characteristically excellent studies in applied psychoanalysis found here cover the effect of early father loss on the work of the American watercolorist Charles Burchfield, *The Creativity of Women*, the unconscious influence of metaphor on attitudes and value judgments and the application of self psychology to the dramas of Eugene O'Neill. It is altogether typical of this fine series that a collection of essays dedicated to the development of a psychobiologically sophisticated psychoanalysis should be followed by contributions that testify to the explanatory vitality of psychoanalysis with respect to issues of literature, art and creativity.

***The Annual of Psychoanalysis, V. 24*** Jerome A. Winer, 2013-05-13. Volume 24 of *The Annual* opens with a memorial tribute to the late Merton M. Gill (1914-1994), a major voice in American psychoanalysis for half a century. Remembrances of Gill by Robert Holt, Robert Wallerstein, Philip Holzman and Irwin Hoffman are followed by thoughtful appreciations of Gill's final book, *Psychoanalysis in Transition: A Personal View* (Analytic Press, 1994) by John Gedo. Jerome Oremland, Arnold Richards and Arthur Lynch, Joseph Schachter and Bhaskar Sripada and Shara Kronmal. Section II offers four papers from a major conference on Mind/Brain held in Osaka, Japan. In addition to publishing two clinical papers by the Chicago analyst John Gedo, *The Annual* introduces readers to two prominent Japanese neuroscientists whose work is relevant to psychoanalysis. Hiroshi Utena links brain development to the individual's freedom to make optimal adaptive choices, whereas Makoto Iwata outlines the modular organization of vision in the brain and then illustrates each modular potential by examining the paintings of four artists: Mondrian, Duchamp, Seurat and Rothko. Kenneth Newman's sensitive consideration of analyst self-discourse as the outcome of successful management of the countertransference and Frank Summers' astute assessment of the place of self psychology in the history of psychoanalytic ideas are followed by three engaging and instructive studies in applied analysis. Elaine Caruth and Milton Eber's examination of Woody Allen's *The Purple Rose of Cairo* as a metaphoric depiction of the blurring of boundaries in psychotherapy, Frank and Annette Lachmann's study of the creative process of Henrik Ibsen as a self-transformational response to narcissistic injury and W. W. Meissner's exploration of the role of shame in Vincent van Gogh's life and art. The volume concludes with a provocative contribution to psychoanalytic history. J. Bos's social constructivist rereading of the Minutes of the Vienna Psychoanalytic Society with an eye to illuminating why and how psychoanalysis changed during its early years. True to its distinguished lineage, volume 24 of *The Annual* continues to broaden the conceptual, clinical and historical vistas of its readers. Moreover, with its revealing reminiscences and substantive appraisals of Merton Gill, this volume becomes a fascinating marker in the very psychoanalytic history it helps recount.

**Hierarchies in the Brain, Mind and Behaviour** Gerald Wiest, 2025-03-21. The book describes the theoretical foundations and phenomenology of a hierarchical functional and organizational principle that is reflected in

various concepts of the brain and mind According to these ideas neural and mental function is understood as the result of hierarchical superpositions that are hallmarks of ontogenetic and phylogenetic development The model implies control of subordinate elements by superior elements so that a disruption in this organization offers new possibilities for interpreting neural mental and psychopathological phenomena Hierarchical principles can be found in concepts of neurology neuroethology and psychoanalysis as well as in the theory of microgenesis By incorporating evolutionary and hierarchical aspects into explanatory models of human mind and behaviour this approach contrasts with the modular concepts of cognitive neuroscience

Affect Regulation and the Origin of the Self Allan N. Schore, 2015-11-19 For over three decades Allan N Schore has authored numerous volumes chapters and articles on regulation theory a biopsychosocial model of the development psychopathogenesis and treatment of the implicit subjective self The theory is grounded in the integration of psychology psychiatry and neuroscience and it is now being used by both clinicians to update psychotherapeutic models and by researchers to generate research First published in 1994 this pioneering volume represented the inaugural expression of his interdisciplinary model and has since been hailed by a number of scientific and clinical disciplines as a groundbreaking and paradigm shifting work This volume appeared at a time when the problem of emotion ignored for most of the last century was finally beginning to be addressed by science including the emergent field of affective neuroscience After a century of the dominance of the verbal left brain it presented a detailed characterization of the early developing right brain and its unique social emotional and survival functions not only in infancy but across all later stages of the human life span It also offered a scientifically testable and clinically relevant model of the development of the human unconscious mind Affect Regulation and the Origin of the Self acts as a keystone and foundation for all of Schore's later writings as every subsequent book article and chapter that followed represented expansions of this seminal work

*Using Image and Narrative in Therapy for Trauma, Addiction and Recovery* James West, 2021-04-21 With contributions from well respected figures in the field this book explores the use of narrative and image in the therapeutic treatment of trauma and addiction The book considers topics such as early trauma and its impacts therapeutic methods based on images and narrative and recovery and post traumatic growth through community engagement Despite a close practical association between the two trauma and addiction are often addressed or treated separately By considering them together this book offers a rare perspective and is an invaluable tool for art and narrative therapists as well as professionals supporting those dealing with addiction or trauma

Parenting and Substance Abuse Nancy E. Suchman, Marjukka Pajulo, Linda C. Mayes, 2013-02-15 Historically there has been little integration of theoretical or applied research on addiction treatment and parenting intervention development Rather the fields of addiction and developmental research have progressed on largely separate trajectories even though their focus powerfully and often tragically intersects each time a parent is diagnosed with a substance use disorder Parenting and Substance Abuse is the

first book to report on pioneering efforts to move the treatment of substance abusing parents forward by embracing their roles and experiences as mothers and fathers directly and continually across the course of treatment The chapters in this volume represent important new strides among researchers and clinicians to address and close the increasingly recognizable gap between addiction and developmental science Chapters focus on current state of the art treatment models for parents primarily pregnant and parenting women including descriptions of innovative treatments currently being developed and evaluated that focus on parental addiction and the parent child relationship within a developmental framework Part I covers the theoretical understandings of how addiction impacts the developmental processes of parenting Part II discusses risk assessment evaluation and a variety of interventions and therapies This unique volume will be of importance to clinicians researchers students and trainees in the health professions who develop implement and evaluate interventions for parental addiction including in well baby clinics primary care settings pediatric clinics and residential and outpatient drug treatment programs
