High Spin Physics And Gamma-soft Nuclei - Proceedings Of The International Conference Juerg X Saladin, Raymond A Sorensen, C Martin Vincent, 1991-03-06 The proceedings present the most recent results of experimental and theoretical nuclear spectroscopy revealing the effects of rapid rotation and thermal fluctuations on the shapes and superfluid properties of a wide range of atomic nuclei Unstable and novel shapes are emphasized e g super and hyper deformed shapes and triaxial quadrupole and octupole shapes both static and vibrational Theoretical treatments are given in terms of a variety of mean field models as well as the Fermion Dynamical Symmetry Model and the Interacting Boson Model New experimental methods of gamma ray spectroscopy are discussed including fluctuation analysis and energy ordered gamma ray spectroscopy

Exotic Nuclear Excitations S.C. Pancholi, 2011-03-23 By providing the reader with a foundational background in high spin nuclear structure physics and exploring exciting current discoveries in the field this book presents new phenomena in a clear and compelling way The quest for achieving the highest spin states has resulted in some remarkable successes which this monograph will address in comprehensive detail The text covers an array of pertinent subject matter including the rotational alignment and bandcrossings magnetic rotation triaxial strong deformation and wobbling motion and chirality in nuclei This book offers a clearly written and up to date treatment of the topics covered. The prerequisites for a proper appreciation are courses in nuclear physics and nuclear models and measurement techniques of observables like gamma ray energies intensities multi fold coincidences angular correlations or distributions linear polarization internal conversion coefficients short lifetime pico second range of excited states etc and instrumentation and data analysis methods Contemporary Nuclear Physics C. R. Praharaj, 2003-09 Contributed papers presented at the National Seminar on Contemporary Nuclear Physics held at the Institute of Physics Bhubaneswar Nuclear Physics Of Our Times Akunuri V Ramayya, 1993-07-31 Sixty internationally well known physicist from 15 countries will reflect on past accomplishments in nuclear physics to current challenges and future directions in nuclear physics Topics range from neutrino physics and grand unification physics of compressed and hot nuclear matter the nuclear equation of state expected phase transition to quark gluon plasma meson condensates etc the tremendous potential of high energy heavy ion physics to nuclear structure Recent developments in nuclear instrumentation for studying nuclei far from stability and applications of nuclear physics will also be discussed

research to result from facilities exhibiting radioactive ion beam capabilities new generation recoil mass spectrometers and sophisticated gamma ray detector arrays With the participation of leading researchers in the field the proceedings of this conference is a major reference work for graduate students and research workers in nuclear physics **Nuclear Physics** J.W. Negele, Erich W. Vogt, 2012-12-06 The guest for many body techniques and approximations to describe the essential physics of strongly interacting systems with many degrees of freedom is one of the central themes of contemporary nuclear physics. The three articles in this volume describe advances in this guest in three different areas of nuclear many body physics multi quark degrees of freedom in nucleon nucleon interactions and light nuclei multinucleon clusters in many nucleon wave functions and reactions and the nuclear shell model In each case the common issues arise of identifying the relevant degrees of freedom truncating those that are inessential formulating tractable approximations and judiciously invoking phenomenology when it is not possible to proceed from first principles Indeed the parallels between the different applications are often striking as in the case of the similarities in the treatment of clusters of quarks in nucleon nucleon interactions and clusters of nucleons in nuclear reactions and the central role of the resonating group approximation in treating both Despite two decades of effort since the experimental discovery of quarks in nucleons we are still far from a derivation of nucleon structure and nucleon nucleon interactions directly from quantum chromodynamics **Physics at the Borderlines** Jose M. Arias, Maria I. Gallardo, Manuel Lozano, 2012-12-06 This volume contains the lectures presented by invited speakers at the IV La Rlibida International Summer School on Nuclear Physics This was the IV edition of a summer school organized by our group every three years on topics related to nuclear physics This Summer School was aimed mainly at young nuclear physicists both theoreticians and experimentalists engaged in research work at predoctoral or recent postdoctoral level The topics treated in the three previous editions of the School were Heavy Ion Collisions Theory of Nuclear Structure and Reactions and Nuclear As trophysics This year's School was entitled Nuclear Physics at the Borderlines Special emphasis was placed on those topics along which nuclear physics is expected to develop in the next few years The aim of the School was to provide the attendants with an opportunity to get into close contact with experienced researchers and listen to their account of the present state of the art in nuclear physics and the main future lines of Nuclear Shapes and Nuclear Structure at Low Excitation Energies Michel Vergnes, Jocelyne development Sauvage, Paul-Henri Heenen, Hong Tuan Duong, 2012-12-06 Proceedings of a NATO ARW held in Cargese France June 3.7 1991 Physics Briefs ,1992 Capture Gamma-ray Spectroscopy And Related Topics - Proceedings Of The 8th International Symposium Jean Kern, 1994-03-08 **Nuclear Physics - Proceedings Of The 15th Workshop** Jorge Fernandez Niello, Leszek Szybisz, Claudia Patricia Massolo, 1993-06-28 The XV Workshop on Nuclear Physics was devoted to the study of nucleon models nuclear structure nuclear reactions as well as exotic forms of nuclear matter In particular studies of the link between gauge theories and nuclear decay were presented Nuclear reactions at intermediate energies
