High Stakes Writing:

Teaching Reading and Writing Beyond High-stakes Testing Rongrong Dong, 2023-03-10 This book tells about an exemplary high school Chinese language arts teacher's effort in nurturing lifelong readers and writers under the test driven culture in China's society. It looks closely at his everyday literacy practices, focuses on his ways of creating authentic reading and writing spaces for students beyond test preparation. With the lens of social constructivism, the case study reveals his efforts of creating a safe learning environment, modeling his literate life, connecting real life with literacy learning, and building a school-wide literate life for students. Furthermore, he also collaborates with other Chinese language arts faculty and reaches out to school administrators and educators to gain any potential teaching resource for students. The findings indicate exemplary teachers are not only equipped with professional knowledge but also inter-intrapersonal knowledge and practical knowledge in their teaching career, which might be enlightening in today's high stakes testing culture. The book will appeal to scholars of literacy education and teacher education as well as pre-service and in-service teachers. Teaching and

Evaluating Writing in the Age of Computers and High-Stakes Testing Carl Whithaus, 2005-04-27 This book takes on a daunting task: How do writing teachers continue to work toward preparing students for academic and real-world communication situations while faced with the increasing use of standardized high stakes testing? Teachers need both the technical ability to deal with this reality and the ideological means to critique the information technologies and assessment methods that are transforming the writing classroom. *Teaching and Evaluating Writing in the Age of Computers and High Stakes Testing* serves this dual need by offering a theoretical framework, actual case studies, and practical methods for evaluating student writing. By examining issues in writing assessment ranging from the development of electronic portfolios to the impact of state-wide standards-based assessment methods on secondary and post-secondary courses, this book discovers four situated techniques of authentic assessment that are already in use at a number of locales throughout the United States. These techniques stress interacting with students as communicators using synchronous and asynchronous environments, describing the processes and products of student learning rather than enumerating deficits, situating pedagogy and evaluation within systems that incorporate rather than exclude local variables, and distributing assessment among diverse audiences. By advocating for a flexible system of communication-based assessment in computer-mediated writing instruction, this book validates teachers' and students' experiences with writing and also acknowledges the real-world weight of the new writing components on the SAT and ACT as well as on state-mandated standardized writing and proficiency exams.

The Unintended Consequences of High-Stakes Testing Gail M. Jones, Brett D. Jones, Tracy Y. Hargrove, 2003-04-09 To understand how high stakes accountability has influenced teaching and learning, this book looks at the consequences that high stakes tests hold for students, teachers, administrators, and the public, and demonstrates the negative effects of such testing on non-tested subjects, minority students, and students with special needs. **The SAGE Handbook of Writing**

Development Roger Beard, Debra Myhill, Jeni Riley, Martin Nystrand, 2009-07-09 Writing development is currently the focus of substantial international debate because it is the aspect of literacy education that has been least responsive to central government and state reforms. Teaching approaches in writing have been slower to change than those in teaching reading and pupil attainment in writing has increased at a much more modest rate than pupil attainment in reading. This handbook critically examines research and theoretical issues that impact on writing development from the early years through to adulthood. It provides those researching or teaching literacy with one of the most academically authoritative and comprehensive works in the field. With expert contributors from across the world, the book represents a detailed and valuable overview of a complex area of study.

Online Language Learning Laurence Mann, Jieun Kiaer, Emine Çakır, 2022-01-28 This book provides tips and guidelines for teachers and learners of modern foreign languages in higher education institutions, drawing on the authors' experiences of teaching languages including Turkish, Japanese and Korean to suggest strategies and approaches that promote effective use of the online environment. As well as shedding light on modern languages that are typically under studied and under represented in the literature, this book demonstrates how the online sphere is increasingly fundamental to language use, change and contact. The authors provide practical guidance to help teachers and learners capitalise on the opportunities presented by a virtual educational context and offer a more resilient blended approach that will increase teachers and students' preparedness for changing circumstances and institutional priorities in the future. This book is primarily aimed at teachers and students of foreign languages within HE settings but its focus on new perspectives will also be of interest to scholars researching the online shift in language education, applied linguistics, curriculum design and educational technology.

Engaging Teachers, Students, and Families in K-6 Writing Instruction Danielle L. DeFauw, 2020-06-03 This text draws on interviews, assignments, field notes and observations from a flipped writing methodology course conducted with preservice elementary teachers in the US. In doing so, the text powerfully illustrates the benefits of using flipped methodologies in K-6 instruction to engage students, teachers and families in authentic writing practices. *Engaging Teachers, Students and Families in K-6 Writing Instruction* demonstrates the use of flipped writing methodologies to engage preservice teachers in literacy instruction, increase their confidence as writers and bolster their understanding and application of pedagogical content knowledge. In turn, this underpins teachers' ability to teach writing as an authentic, purpose-driven, audience-focused process. In particular, chapters explore effective teaching strategies including writing clinics, writing contests and family literacy sessions which encourage writing development within a community of students, teachers, families and authors. This text will be an engaging and informative guide for educational researchers, teacher educators and preservice and inservice teachers looking to develop effective flipped writing pedagogies to support educators, students and families.

Teaching Writing Primer Paul L. Thomas, 2005. Until a few decades ago, student writing stood as a distant third in the three R's. Since the late 1970s, however, students have been asked to write more, and teachers have been expected to teach writing more specifically. In spite of this mandate, however, little has been done to prepare teachers for this shift in the curriculum. This primer provides a brief history of the field as well as an exploration of what we now know about teaching. Teachers entering the field as well as seasoned veterans will find how to foster student writers and to grow as writers themselves.
