High Efficiency Silicon Solar Cells Materials Science Surveys No 5:

High Efficiency Silicon Solar Cells Martin A. Green, 1987 The early chapters comprehensively review the optical and transport properties of silicon Light trapping is described in detail Limits on the efficiency of silicon cells are discussed as well as material requirements necessary to approach these limits The status of current approaches to passivating surfaces contacts and bulk regions is reviewed The final section of the book describes the most practical approaches to the fabrication of high efficiency cells capable of meeting the efficiency targets for both concentrated and non concentrated sunlight including a discussion of design and processing approaches for non crystalline silicon **Energy Research Abstracts**

Handbook on Climate Change and Technology Frauke Urban,Johan Nordensvärd,2023-12-11 This timely Handbook presents the latest knowledge on technological innovation for climate change mitigation and adaptation Looking beyond technical fixes it further draws on economics politics and sociology to explore how modern technology can contribute to effective and socially just sustainability transitions **Energy Research Abstracts** ,1988 Includes all works deriving from DOE other related government sponsored information and foreign nonnuclear information **Japanese Technical Literature Bulletin** ,1988 **Concentrating Photovoltaics (CPV): The Path Ahead** Harry Apostoleris,Marco Stefancich,Matteo Chiesa,2017-09-08 This book is a concise review of the current status and future prospects of concentrating photovoltaic CPV technology Starting with a summary of the current technical and economic status of CPV technology it identifies the factors that hold CPV back in the commercial market The main technical areas considered are solar cells tracking and optics The solar cells section focuses on spectrum splitting systems which offer potentially higher efficiency than multi junction cells with reductions in the manufacturing constraints that lead to high costs It also offers a brief survey of the latest developments in spectral splitting alongside a discussion of the advances in solar cell manufacturing that aid the development of such systems Further it examines electrical design principles for spectral splitting systems that can improve the spectral stability of these systems performance The section on tracking includes a description of tracking integration with an update of the review published in Nature presenting the latest advances in the field and focusing on surveying conceptual approaches rather than providing an exhaustive description of the literature The optics section explores 3D printing and other emerging methods of fabricating optics for both prototype and large scale production as well as new classes of concentrators particularly those based on novel photonic materials such as angular filters Lastly the authors consider the impact that environmental factors have on the performance of CPV in non standard environments before

concluding with a discussion of the combinations of technologies that they anticipate will most effectively boost CPV in the commercial market **Physics Briefs** ,1991 **Fatigue Strength Calculation** A.
