Highlights of Astronomy Walter Bartky, 1935 **Highlights of Astronomy** Jacqueline Bergeron, 2013-12-01 Since 1967 the most prominent events of a General Assembly of the International Astronomical Union are published in a separate volume The Highlights of Astronomy volume 9 report on the major scientific presentations made at the XXIst General Assembly July 23 August 1 1991 Buenos Aires Argentina The present volume contains the texts of the three invited Discourses and of the papers presented during seven Joint Discussion Meetings and eight Joint Commission Meetings The invited Discourses were arranged by the IAU Executive Committee and the Joint Discourses and Commission Meetings by the respective chairpersons The overall responsibility of the General Assembly was carried out by the IAU General Secretary 1988 1991 Dr D McNally I am indebted to the authors of the invited Discourses to the organizers and editors of the scientific sessions for having provided me with all the material for publication in due time I want to particularly acknowledge the case with which Dr J H Hughes who unfortunately died a few days ago from cancer prepared and checked until the last few weeks the report on the new IAU Reference System This report itself concludes long and difficult discussions among IAU members that he led in a wise and clear sighted manner **Literature 1971, Part 2** S. Böhme, W. Fricke, U. Güntzel-Lingner, F. Henn, D. Krahn, U. Scheffer, G. Zech, 2013-11-11

Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 *Astronomy and Astrophysics Abstracts* aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user Volume 6 contains literature published in 1971 and received before March 15 1972 some older literature which was received late and which is not recorded in earlier volumes is also included

Literature 1977, Part 2 Siegfried Böhme, Ute Esser, Walter Fricke, Inge Heinrich, Dietlinde Krahn, Lutz D. Schmadel, Gert Zech, 2013-03-14 *Astronomy and Astrophysics Abstracts* which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 *Astronomy and Astrophysics Abstracts* aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of

greater convenience for the user Volume 20 contains literature published in 1977 and received before February 20 1978 some older literature which was received late and which is not recorded in earlier volumes is also included We acknowledge with thanks contributions to this volume by Dr J Bouška Prague who surveyed journals and publications in Czech and supplied us with abstracts in English and by Prof P Brosche Bonn who supplied us with literature concerning some border fields of astronomy

Highlights of Astronomy: Volume 14 Karel van der Hucht, 2008-01-21 Recording the proceedings of the IAU XXVI General Assembly this volume of the IAU Highlights of Astronomy covers virtually all aspects of modern astrophysics as discussed by 2400 participants from 73 countries Notably the common aspects of astrophysical phenomena known to exist in widely differing interstellar environments is thoroughly examined providing fertile cross correlation from one specialisation to another This text highlights the importance of the triennial IAU General Assemblies in bringing together the work of observers and theoreticians in widely different fields but working towards a common goal understanding the physics of the Universe Together with the Proceedings of the IAU Symposia 235-240 this volume examines all of the astrophysics presented at the General Assembly

Highlights of Astronomy E.A. Müller, 2012-12-06 It has become a tradition in the Union to publish the Invited Discourses and the Proceedings of the Joint Discussions held at a General Assembly in a separate volume entitled HIGHLIGHTS OF ASTRONOMY This is the fourth volume of its kind and it contains some of the scientific highlights of the Grenoble General Assembly In order to reduce its size it was decided to publish its content in two separate parts The part I contains the full texts of the Invited Discourses given by Prof J C Pecker and by Dr C Sagan and an abstract of Dr P Morrison's paper thus complying with his wish to forego publication of the full text of his Discourse Furthermore it collects the proceedings of three Joint Discussions and one Joint Meeting all of which are related essentially to observations from space to external galaxies and to cosmology Part II contains the proceedings of the four Joint Discussions and one Joint Meeting related essentially to stars and the structure of our Galaxy Clearly Volume 4 parts I and II of the Highlights reflects only a part of the scientific activities which took place at the Grenoble General Assembly Many more important papers and discussions were held during Commission meetings and joint meetings They may be found in the Commissions reports published in the Transactions Vol XVI B 1977

Perek,2012-12-06 The XIIIth General Assembly of the International Astronomical Union held in Prague from 22 to 31 August 1967 brought together more than 1800 active astronomers from 40 countries The agenda of the Assembly ranged from administrative questions to highly intricate scientific problems Thirty eight Presidents of the IAU Commissions contributed by their reports to a detailed survey of Astronomy for the period 1964 67 These reports were published in the Transactions of the IAU Volume XIII A Transactions volume XIII B bring the results of the administrative meetings and of the meetings of Commissions held during the General Assembly The present volume is devoted to the most important scientific results of the General Assembly as presented in the Invited Discourses Joint Discussions and at Special Meetings It is an established policy of the Union to invite prominent astronomers to hold during the General Assembly formal discourses on topics of major importance due to recent significant developments These Invited Discourses cover as a rule broad fields of astronomical interest and are meant to give basic information also to scientists from other branches Subjects which call for a more detailed technical approach are dealt with in the Joint Discussions or at Special Meetings Here invited speakers present authoritative surveys complemented by communications on current or envisaged projects The proceedings of two other meetings on Moon Probes and on Coordination of Solar Observations Made at Ground based Observatories and with Space Vehicles are of a sufficiently wide interest to warrant the inclusion into this volume **Stars and the Milky Way System** L.  Niels Bohr Institute for Astronomy Physics and Geophysics Astronomical Observatory Copenhagen ja astro ku dk The
 development of astronomy worldwide begins at the roots Already from childhood humans of all nations and civilizations seem
 to share an innate fascination with the sky Yet people in different regions of the world have vastly different possibilities for
 pursuing this interest In wealthy industrialised societies the way is open to a school or higher education in science possibly
 leading to a career in astronomy or basic or applied space science for the benefit of the country as well as the individual In
 other regions neither the financial nor the trained human resources are sufficient to offer that avenue to the future of the
 young generation or those intellectual resources to the development of their country This book addresses ways and means by
 which these obstacles can be if not fully overcome then at least significantly reduced Astronomy and Astrophysics
