## **Hiding The Elephant:**

*Hiding the Elephant* Jim Steinmeyer, 2005 Now in paperback comes Steinmeyer's astonishing chronicle of half a century of illusionary innovation backstage chicanery and keen competition within the world of magicians **Hiding the Elephant** Jim Steinmeyer, 2006 Pastplay Kevin Kee, 2014-03-10 A collection of scholars and teachers of history unpack how computing technologies are transforming the ways that we learn communicate and teach **A New Brand World** Scott Bedbury, Stephen Fenichell, 2003-02-25 What does it really take to succeed in business today In *A New Brand World* Scott Bedbury who helped make Nike and Starbucks two of the most successful brands of recent years explains this often mysterious process by setting out the principles that helped these companies become leaders in their respective industries With illuminating anecdotes from his own in the trenches experiences and dozens of case studies of other winning and failed branding efforts including Harley Davidson Guinness The Gap and Disney Bedbury offers practical battle tested advice for keeping any business at the top of its game **Revelations** Brian Rappert, 2024-12-16 From tabloid headlines to scientific discoveries to investigative documentaries the claim that truth is being revealed is commonplace today Such attention grabbing claims can conjure allure sell products launch careers cement authority and much more besides And yet despite the familiarity of revelation talk this notion has been subject to limited academic theorizing to date outside of matters divine *Revelations* sets out to examine how the making available through revealing is accomplished as well as the implications of revealing In other words it is concerned with how revelations are realized and what is realized through them Central to the argument will be treating attempts to make available as processes that can entail mix that is as processes that combine treating truth as publicly demonstrable but also as beyond simple verification as alternately intelligible but also as unknowable In taking the pervasive appeal to revealing as its topic and through drawing inspiration from a range of disciplines this book should appeal to a variety of audiences including those interested in secrecy conspiracy expertise celebrity science and technology **Childhood Education**, 1928 Includes music Defending the Indefensible Jock McCulloch, Geoffrey Tweedale, 2008-07-24 Until the mid 1960s asbestos had a reputation as a lifesaver In 1960 it became known that exposure to asbestos can cause mesothelioma a virulent and lethal cancer Yet the bulk of the world's asbestos was mined after 1960 This is the first global history of how the asbestos industry defended the product throughout the 20th century *Performing Dark Arts* Michael Mangan, 2007-08-01 Magic and conjuring inhabit the boundaries and the borderlands of performance The conjuror's act of demonstrating the apparently impossible the uncanny the marvellous or the grotesque challenges the spectator's sense of reality It brings him or her up against their own assumptions about how the world works at its most extreme it asks the spectator to re-evaluate his or her sense of the limits of the human *Performing Dark Arts* is an exploration of the paradox of the conjuror the actor who pretends to be a magician It aims to illuminate the history of conjuring by examining it in the context of performance studies and to throw light on aspects of performance

studies by testing them against the art of conjuring The book examines not only the performances of individual magicians from Dedi to David Blaine but also the broader cultural contexts in which their performances were received and the meanings which they have attracted *The Secret History of Magic* Peter Lamont, Jim Steinmeyer, 2018-07-17 Pull back the curtain on the real history of magic and discover why magic really matters If you read a standard history of magic you learn that it begins in ancient Egypt with the resurrection of a goose in front of the Pharaoh You discover how magicians were tortured and killed during the age of witchcraft You are told how conjuring tricks were used to quell rebellious colonial natives The history of magic is full of such stories which turn out not to be true Behind the smoke and mirrors however lies the real story of magic It is a history of people from humble roots who made and lost fortunes and who deceived kings and queens In order to survive they concealed many secrets yet they revealed some and they stole others They engaged in deception exposure and betrayal in a quest to make the impossible happen They managed to survive in a world in which a series of technological wonders appeared which previous generations would have considered magical Even today when we now take the most sophisticated technology for granted we can still be astonished by tricks that were performed hundreds of years ago The Secret History of Magic reveals how this was done It is about why magic matters in a world that no longer seems to have a place for it but which desperately needs a sense of wonder **Conjuring Science** Sofie

Lachapelle, 2015-10-07 Conjuring Science explores the history of magic shows and scientific entertainment It follows the frictions and connections of magic and science as they occurred in the world of popular entertainment in France from the mid eighteenth to the early twentieth century It situates conjurers within the broader culture of science and argues that stage magic formed an important popular conduit for science and scientific enthusiasm during this period From the scientific recreations of the fairs to the grand illusions of the theatre stage and the development of early cinema conjurers used and were inspired by scientific and technological innovations to create illusions provoke a sense of wonder and often even instruct their audience In their hands science took on many meanings and served different purposes it was a set of pleasant facts and recreational demonstrations upon which to draw it was the knowledge presented in various scientific lectures accompanied by optical projections at magic shows it was the techniques necessary to create illusions and effects on stage and later on at the cinema and it was a way to separate conjuring from the deceit of mediums mystical showmen and quacks in order to gain a better standing within an increasingly scientifically minded society *A Companion to Early Cinema*

André Gaudreault, Nicolas Dulac, Santiago Hidalgo, 2012-07-02 A COMPANION TO EARLY CINEMA This collection of essays by early cinema scholars from Europe and North America offers manifold perspectives on early cinema fiction which perfectly reflect the state of international research Martin Loiperdinger Universitaet Trier A fabulous selection of first rate articles Rick Altman University of Iowa One of the most challenging books in recent film studies in it early cinema is both a historical object and a contemporary presence As in a great novel we can retrace the adventures of the past the films styles

discourses and receptions that made cinema the breakthrough reality it was in its first decades But we can also come to appreciate how much of this reality is still present in our digital world Francesco Casetti Yale University A Companion to Early Cinema is an authoritative reference on the field of early cinema Its 30 peer reviewed chapters offer cutting edge research and original perspectives on the major concerns in early cinema studies and take an ambitious look at ideas and themes that will lead discussions about early cinema into the future Including work by both established and up and coming scholars in early cinema film theory and film history this will be the definitive volume on early cinema history for years to come and a must have reference for all those working in the field

**Project Wim** John Rojewski, 2018-11-28 We live in a universe full of matter We live on a planet and in a civilization that is continually hungry for energy It seems that we cannot get enough Electrical power is essential in this present Digital Age and it is not cheap But what if it was What if energy was as plentiful and as cheap as sand Would that make a difference Would it matter See the world through the eyes of an inventor that has the vision and the knowledge to create a reality where matter and energy are directly interchangeable How is it done Who else knows about the process And what are they doing to take that power as their very own Project WIM has the thrills of invention secrets armed conflict and disasters all enshrouded in the magic and mystery of quantum physics and human nature

**Elephant** Anoushka Lucas, 2022-11-07 Winner of Best Writer at The Stage Debut Awards 2023 The men with the Piano look up the narrow staircase of our little flat and they turn to Dad light their fags and say We might have to take the windows out A piano came through the sky and landed in Lylah s council flat just for her As she pours over the keys and sound floods into all the rooms Lylah falls in love At school Lylah can t ask questions she s got to be good good good or else she ll lose her scholarship At home she can t ask questions her cousins say she talks weird and her parents are distracted So she asks her piano Where did you come from Why are you here And their shared history tumbles into the light Part gig part piano lesson part journey through Empire Elephant is a powerful new play from Anoushka Lucas This edition is published to coincide with the world premiere at the Bush Theatre London in October 2022
