High Coup:

United We Stand? Aaron Belkin, 2012-02-01 It has long been assumed that leaders engage in international conflict to unify their followers what is often called the rally round the flag hypothesis Despite its intuitive appeal however this hypothesis does not always provide a compelling explanation of the relationship between domestic politics and international conflict In *United We Stand* Aaron Belkin shows that in one important realm civil military relations leaders often prefer divisiveness over cohesion When they feel domestically vulnerable leaders use international conflict in order to create and exacerbate rivalries among their own military forces to lower the risk of a coup and to contribute to the consolidation and stability of the political order Case studies include post Soviet Georgia and Syria **Desertion** Theodore D.

McLauchlin, 2020-12-15 Theodore McLauchlin's *Desertion* examines the personal and political factors behind soldiers' choices to stay in their unit or abandon their cause He explores what might spur widespread desertion in a given group how some armed groups manage to keep their soldiers fighting over long periods and how committed soldiers are to their causes and their comrades To answer these questions McLauchlin focuses on combatants in military units during the Spanish Civil War He pushes against the preconception that individual soldiers' motivations are either personal or political either selfish or ideological Instead he draws together the personal and the political showing how soldiers come to trust each other or not *Desertion* demonstrates how the armed groups that hold together and survive are those that foster interpersonal connections allowing soldiers the opportunity to prove their commitment to the fight McLauchlin argues that trust keeps soldiers in the fray mistrust pushes them to leave and political beliefs and military practices shape both *Desertion* brings the reader into the world of soldiers and rigorously tests the factors underlying desertion It asks honestly and without judgment what would you do in an army in a civil war Would you stand and fight Would you try to run away And what if you found yourself fighting for a cause you no longer believe in or never did in the first place [Explaining Post-Conflict Reconstruction](#) Desha

Girod, 2015-02-02 The international community has donated nearly one trillion dollars during the last four decades to reconstruct post conflict countries and prevent the outbreak of more civil war Yet reconstruction has eluded many of these countries and 19 million people have been killed in reignited conflict Where did the money go This book documents how some leaders do bring about remarkable reconstruction of their countries using foreign aid but many other post conflict leaders fail to do so Offering a global argument that is the first of its kind Desha Girod explains that post conflict leaders are more likely to invest aid in reconstruction when they are desperate for income and thus depend on aid that comes with reconstruction strings attached Leaders are desperate for income when they lack access to rents from natural resources or to aid from donors with strategic interests in the country Using data on civil wars that ended between 1970 and 2009 and evidence both from countries that succeeded and from countries that failed at post conflict reconstruction Girod carefully examines the argument from different perspectives and finds support for it The findings are important for theory and policy

because they explain why only some leaders have the political will to meet donor goals in the wake of civil war The findings also shed light on state building processes and on the political economy of postconflict countries Paradoxically donors are most likely to achieve reconstruction goals in countries where they have the least at stake **Political Fragility: Coups**

D'État and Their Drivers Aliona Cebotari, Enrique Chueca-Montuenga, Yoro Diallo, Yunsheng Ma, Ms. Rima A Turk, Weining Xin, Harold Zavarce, 2024-02-16 The paper explores the drivers of political fragility by focusing on coups d'état as symptomatic of such fragility It uses event studies to identify factors that exhibit significantly different dynamics in the runup to coups and machine learning to identify these stressors and more structural determinants of fragility as well as their nonlinear interactions that create an environment propitious to coups The paper finds that the destabilization of a country's economic political or security environment such as low growth high inflation weak external positions political instability and conflict set the stage for a higher likelihood of coups with overlapping stressors amplifying each other These stressors are more likely to lead to breakdowns in political systems when demographic pressures and underlying structural weaknesses especially poverty exclusion and weak governance are present or when policies are weaker through complex interactions Conversely strengthened fundamentals and macropolicies have higher returns in structurally fragile environments in terms of staving off political breakdowns suggesting that continued engagement by multilateral institutions and donors in fragile situations is likely to yield particularly high dividends The model performs well in predicting coups out of sample having predicted a high probability of most 2020-23 coups including in the Sahel region **The Financial Review**, 1876 *Historical Dictionary of Modern Coups d'état* John J. Chin, Joseph Wright, David B. Carter, 2022-12-13 For readers interested in international relations politics and global issues Library Journal Starred Review The Historical Dictionary of Modern Coups d'état surveys the history of coups d'état in the post World War II period The term modern in the title therefore demarcates the period since January 1946 This book documents over 582 coup attempts that have occurred in 108 different countries worldwide over a period of 75 years Historical Dictionary of Modern Coups d'état contains a chronology an introduction and an extensive bibliography The dictionary section has more than 1,400 cross-referenced dictionary entries This book is an excellent resource for students and researchers **Scriptures, Shrines, Scapegoats, and World Politics** Zeev Maoz, Errol A

Regional Organizations and Their Responses to Coups Franziska Hohlstein, 2022-09-30 Coups d'état continue to present one of the most extreme risks to democracy and stable governance worldwide This book examines the unique role played by regional organizations ROs following the occurrence of a coup d'état The book analyses the factors that influence the strength of reactions demonstrated by ROs and explores the different post coup solutions ROs pursue It argues that when confronted with a coup ROs take both basic democratic standards and regional stability into account before forming their responses Using a mixed methods approach the book concludes that ROs response to a coup depends on how detrimental it will be for the state of democracy in a country and how far it risks destabilizing the region

The Spectre of Islamic Terrorism: Comparative Insights Hussein Solomon, 2024-11-15 This book presents the result of an innovative challenge to create a systematic literature overview driven by machine generated content Questions and related keywords were prepared for the machine to query discover collate and structure by Artificial Intelligence AI clustering The AI based approach seemed especially suitable to provide an innovative perspective as the topics are indeed both complex interdisciplinary and multidisciplinary for example climate planetary and evolution sciences Springer Nature has published much on these topics in its journals over the years so the challenge was for the machine to identify the most relevant content and present it in a structured way that the reader would find useful The automatically generated literature summaries in this

book are intended as a springboard to further discoverability They are particularly useful to readers with limited time looking to learn more about the subject quickly and especially if they are new to the topics Springer Nature seeks to support anyone who needs a fast and effective start in their content discovery journey from the undergraduate student exploring interdisciplinary content to Master or PhD thesis developing research questions to the practitioner seeking support materials this book can serve as an inspiration to name a few examples It is important to us as a publisher to make the advances in technology easily accessible to our authors and find new ways of AI based author services that allow human machine interaction to generate readable usable collated research content **Index of Specifications and Standards** ,1988

Tullock,2012-12-06 My first serious thought about a scientific approach to politics was in Communist China When the Communists seized China the American Department of State which was planning to recognize them left its entire diplomatic establishment in place At the time I was a Vice Consul in Tientsin so I found myself living under the Communists While the Department of State was planning on recognizing the Communists the Communist plans were obscure In any event they weren t going to recognize us in the Consulate General until formal relations were established between the two governments so I had a great deal of leisure As a man who then intended to spend his life as a political officer in the Department of State I decided to fill in this time by reading political science I rapidly realized not only that the work was rather unsatisfactory from a scientific standpoint but also that it didn t seem to have very much relevance to the Communist government under which I was then living I was unable to solve the problem at the time and after a number of vicissitudes which included service in Hong Kong and South Korea neither of which was really a model of democracy I resigned and switched over to an academic career primarily concerned with that mixture of economics and political science which we call Public Choice Most of my work in Public Choice has dealt with democratic governments *Andy and Mark and the Time Machine* Wilfred Reed,2003-02 In the third book of the series Andy unveils a scientific breakthrough that will make time travel practical He and Mark and new friend Amy test the enhanced program and discover that something has gone wrong The trio becomes separated in the past and returning home seems impossible But the friends are determined to reunite and the only way to accomplish their goal is to travel the roads that lead to the one place that they desperately wanted to avoid the banks of the Little Bighorn River Along the way the time travelers meet Sioux leaders Sitting Bull and Crazy Horse ride with General George Armstrong Custer and the U S
