High Frontier:

Department of Defense Authorization for Appropriations for Fiscal Year 1986 United States. Congress. Senate. Committee on Armed Services, 1985 *Ballistic missile defense technologies.* ,1985 **Single Stage to Orbit** Andrew J. Butrica, 2004-12-01 Winner of the Michael C Robinson Prize for Historical Analysis given by the National Council on Public History While the glories and tragedies of the space shuttle make headlines and move the nation the story of the shuttle forms an inseparable part of a lesser known but no less important drama the search for a reusable single stage to orbit rocket Here an award winning student of space science Andrew J Butrica examines the long and tangled history of this ambitious concept from its first glimmerings in the 1920s when technicians dismissed it as unfeasible to its highly expensive heyday in the midst of the Cold War when conservative backed government programs struggled to produce an operational flight vehicle Butrica finds a blending of far sighted engineering and heavy handed politics To the first and oldest idea that of the reusable rocket powered single stage to orbit vehicle planners who belonged to what President Eisenhower referred to as the military industrial complex added experimental X aircraft like capabilities and eventually a faster cheaper smaller managerial approach Single Stage to Orbit traces the interplay of technology corporate interest and politics a combination that well served the conservative space agenda and ultimately triumphed not in the realization of inexpensive reliable space transport but in a vision of space militarization and commercialization that would appear settled United States policy in the early twenty first century **Dark Skies** Daniel Deudney, 2020-03-02 Space is again in the headlines E billionaires Jeff Bezos and Elon Musk are planning to colonize Mars President Trump wanted a Space Force to achieve space dominance with expensive high tech weapons The space and nuclear arms control regimes are threadbare and disintegrating Would be asteroid collision diverts space solar energy collectors asteroid miners and space geo engineers insistently promote their Earth changing mega projects Given our many looming planetary catastrophes from extreme climate change to runaway artificial superintelligence looking beyond the earth for solutions might seem like a sound strategy for humanity And indeed bolstered by a global network of fervent space advocates and seemingly rendered plausible even inevitable by oceans of science fiction and the wizardry of modern cinema space beckons as a fully hopeful path for human survival and flourishing a positive future in increasingly dark times But despite even basic questions of feasibility will these many space ventures really have desirable effects as their advocates insist In the first book to critically assess the major consequences of space activities from their origins in the 1940s to the present and beyond Daniel Deudney argues in *Dark Skies* that the major result of the Space Age has been to increase the likelihood of global nuclear war a fact conveniently obscured by the failure to recognize that nuclear armed ballistic missiles are inherently space weapons The most important practical finding of Space Age science also rarely emphasized is the discovery that we live on Oasis Earth tiny and fragile and teeming with astounding life but surrounded by an utterly desolate and inhospitable wilderness stretching at least many trillions of miles in all directions As he stresses our

focus must be on Earth and nowhere else Looking to the future Deudney provides compelling reasons why space colonization will produce new threats to human survival and not alleviate the existing ones That is why he argues we should fully relinquish the quest Mind bending and profound Dark Skies challenges virtually all received wisdom about the final frontier

Committee on Foreign Affairs,1983 *Air Force Magazine* ,2012 [Future Space Programs](#) United States. Congress. House. Committee on Science and Technology,1978 **Freeze!** Henry Richard Maar III,2022-01-15 In *Freeze* Henry Richard Maar III chronicles the rise of the transformative and transnational Nuclear Weapons Freeze Campaign Amid an escalating Cold War that pitted the nuclear arsenal of the United States against that of the Soviet Union the grassroots peace movement emerged sweeping the nation and uniting people around the world The solution for the arms race that the Campaign proposed a bilateral freeze on the building testing and deployment of nuclear weapons on the part of two superpowers of the US and the USSR That simple but powerful proposition stirred popular sentiment and provoked protest in the streets and on screen from New York City to London to Berlin Movie stars and scholars bishops and reverends governors and congress members and ultimately US President Reagan and General Secretary Gorbachev took a stand for or against the Freeze proposal With the Reagan administration so openly discussing the prospect of winnable and survivable nuclear warfare like never before the Freeze movement forcefully translated decades of private fears into public action Drawing upon extensive archival research in recently declassified materials Maar illuminates how the Freeze campaign demonstrated the power and importance of grassroots peace activism in all levels of society The Freeze movement played an instrumental role in shaping public opinion and American politics helping establish the conditions that would bring the Cold War to an end
