## **High Level Programming Models And Supportive Environments 2nd Workshop Hips 97:**

*High-Level Programming Models and Supportive Environments, 2nd Workshop (HIPS '97, 1997*      **High-Level Parallel Programming Models and Supportive Environments** Frank Mueller, 2003-05-15 On the 23rd of April 2001 the 6th Workshop on High Level Parallel Programming Models and Supportive Environments LCTES 98 was held in San Francisco HIPS has been held over the past six years in conjunction with IPDPS the International Parallel and Distributed Processing Symposium The HIPS workshop focuses on high level programming of networks of workstations computing clusters and of massively parallel machines Its goal is to bring together researchers working in the areas of applications language design compilers system architecture and programming tools to discuss new developments in programming such systems In recent years several standards have emerged with an increasing demand of support for parallel and distributed processing On one end message passing frameworks such as PVM MPI and VIA provide support for basic communication On the other hand distributed object standards such as CORBA and DCOM provide support for handling remote objects in a client server fashion but also ensure certain guarantees for the quality of services The key issues for the success of programming parallel and distributed environments are high level programming concepts and efficiency In addition other quality categories have to be taken into account such as scalability security bandwidth guarantees and fault tolerance just to name a few Today's challenge is to provide high level programming concepts without sacrificing efficiency This is only possible by carefully designing for those concepts and by providing supportive programming environments that facilitate program development and tuning

Second International Workshop on High-Level Parallel Programming Models and Supportive Environments Hermann Hellwagner, 1997 Proceedings Parallel Computing      **Parallel Computing Technologies** Victor Malyshev, 2007-08-07 This book constitutes the refereed proceedings of the 9th International Conference on Parallel Computing Technologies PaCT 2007 held in conjunction with the Russian Taiwan symposium on Methods and Tools of Parallel Programming of Multicomputers It covers models and languages applications techniques for parallel programming supporting cellular automata as well as methods and tools of parallel programming of multicomputers      **Parallel Computing: Fundamentals And Applications - Proceedings Of The International Conference Parco99** Erik H D'hollander, Gerhard R Joubert, F J Peters, Henk Sips, 2000-05-31 This millennium will see the increased use of parallel computing technologies at all levels of mainstream computing Most computer hardware will use these technologies to achieve higher computing speeds high speed access to very large distributed databases and greater flexibility through heterogeneous computing These developments can be expected to result in the extended use of all types of parallel computers in virtually all areas of human endeavour Compute intensive problems in emerging areas such as financial modelling and multimedia systems in addition to traditional application areas of parallel computing such as scientific computing and simulation will stimulate the developments Parallel computing as a field of scientific research and development will move from a niche concentrating on solving compute

intensive scientific and engineering problems to become one of the fundamental computing technologies This book gives a retrospective view of what has been achieved in the parallel computing field during the past three decades as well as a prospective view of expected future developments a      **Formal and Practical Aspects of Domain-Specific Languages:**

**Recent Developments** Mernik, Marjan,2012-09-30 This book presents current research on all aspects of domain specific language for scholars and practitioners in the software engineering fields providing new results and answers to open problems in DSL research      **Towards Next Generation Grids** Thierry Priol,Marco Vanneschi,2007-08-28 This book is the fifth volume of the CoreGRID series Organized jointly with the Euro Par 2007 conference The CoreGRID Symposium intends to become the premiere European event on Grid Computing The aim of this symposium is to strengthen and advance scientific and technological excellence in the area of Grid and Peer to Peer Computing The book includes all aspects of Grid Computing including service infrastructure It is designed for a professional audience composed of researchers and practitioners in industry This volume is also suitable for advanced level students in computer science      *Concurrent*

*Object-Oriented Programming and Petri Nets* Gul A. Agha,Fiorella De Cindio,Grzegorz Rozenberg,2003-06-29 Concurrency and distribution have become the dominant paradigm and concern in computer science Despite the fact that much of the early research in object oriented programming focused on sequential systems objects are a natural unit of distribution and concurrency as elucidated early on by research on the Actor model Thus models and theories of concurrency the oldest one being Petri nets and their relation to objects are an attractive topic of study This book presents state of the art results on Petri nets and concurrent object oriented programming in a coherent and competent way The 24 thoroughly reviewed and revised papers are organized in three sections The first consists of long papers each presenting a detailed approach to integrating Petri nets and object orientation Section II includes shorter papers with emphasis on concrete examples to demonstrate the approach Finally section III is devoted to papers which significantly build on the Actor model of computation

*Cellular Automata* Alejandro Salcido,2011-04-11 Cellular automata make up a class of completely discrete dynamical systems which have become a core subject in the sciences of complexity due to their conceptual simplicity easiness of implementation for computer simulation and their ability to exhibit a wide variety of amazingly complex behavior The feature of simplicity behind complexity of cellular automata has attracted the researchers attention from a wide range of divergent fields of study of science which extend from the exact disciplines of mathematical physics up to the social ones and beyond Numerous complex systems containing many discrete elements with local interactions have been and are being conveniently modelled as cellular automata In this book the versatility of cellular automata as models for a wide diversity of complex systems is underlined through the study of a number of outstanding problems using these innovative techniques for modelling and simulation      Implementation of Functional Languages Kevin Hammond,Tony Davie,Chris Clack,2003-07-31

This book constitutes the thoroughly refereed post workshop proceedings of the 10th International Workshop on the
